Methodology

UCR Programs gather crime information from the law enforcement agencies under their domain and forward the data to the FBI. All 50 states in the nation have their own UCR Programs that streamline the collection of UCR data from local law enforcement agencies, ensure consistency and comparability of data, and provide a higher quality of service to the law enforcement community. Establishment of a UCR Program is not limited to state governments. Territorial, tribal, and federal agencies may also institute UCR Programs.

On January 1, 2021, the FBI's Uniform Crime Reporting (UCR) Program transitioned to a National Incident-Based Reporting System (NIBRS) only data collection. Since the transition, the FBI's UCR Program has worked diligently to offer resources such as programming and technical support, training, and outreach to law enforcement agencies. Despite more than 11,500 law enforcement agencies submitting NIBRS data, participation for 2021 remained below a statistically acceptable level to be nationally representative. To mitigate risks associated with low participation due to the NIBRS transition, the UCR Program published a limited release of the traditional *CIUS, 2021,* along with a trend study comparing 2020 and 2021 crime data using a selection of the new NIBRS estimation data. For the 2022, 2023, and 2024 data years, to provide nationally representative data, the FBI accepted Summary Reporting System (SRS) data submissions from non-transitioned agencies.

Criteria for UCR Programs

The following are the standards under which a UCR Program must operate.

A UCR Program must:

- Conform to the FBI's UCR Program submission standards, definitions, specifications, and required deadlines.
- Establish data integrity procedures and have personnel assigned to assist contributing agencies in quality assurance practices and crime reporting procedures. Data integrity procedures should include crime trend assessments, offense classification verification, and technical specification validation.

- Ensure submissions must cover more than 50 percent of the law enforcement agencies within its established reporting domain and be willing to cover any and all UCR-contributing agencies that wish to use the UCR Program from within its domain. (An agency wishing to become a UCR Program must be willing to report for all of the agencies within the state.)

- Furnish the FBI's UCR Program with all of the UCR data collected by the law enforcement agencies within its domain.

These requirements do not prohibit the state from gathering other statistical data beyond the national collection.

Data Collection

The FBI's Uniform Crime Reporting (UCR) Program collects the number of offenses that come to the attention of law enforcement for violent crime and property crime, as well as data regarding clearances of these offenses. In addition, the FBI collects auxiliary information about these offenses (e.g., time of day of burglaries). The expanded offense data include trends in both crime volume and crime rate per 100,000 inhabitants. Finally, the UCR Program collects expanded homicide data, which includes information about homicide victims and offenders, weapons used, the circumstances surrounding the offenses, and justifiable homicides.

The data presented in Crime in the United States reflect the Hierarchy Rule, which requires that only the most serious offense in a multiple-offense criminal incident be counted. The descending order of UCR violent crimes are murder and nonnegligent manslaughter, rape, robbery, and aggravated assault, followed by the property crimes of burglary, larceny-theft, and motor vehicle theft. Although arson is also a property crime, the Hierarchy Rule does not apply to the offense of arson. In cases in which an arson occurs in conjunction with another violent or property crime, both the arson and the additional crime are reported. Violent crimes are defined in the UCR Program as those offenses that involve force or threat of force. The object of the theft-type offenses is the taking of money or property, but there is no force or threat of force against the victims.

Murder

The classification of murder is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body. The UCR Program does not include the following situations in this offense classification: deaths caused by negligence, suicide, or accident; justifiable homicides; and attempts to murder or assaults to murder, which are classified as aggravated assaults.

In addition to the number of murder offenses known, the UCR Program also encourages law enforcement agencies to report supplementary homicide data as well as information about justifiable homicides that may have occurred within their jurisdictions.

The UCR Program's supplementary homicide data provide information regarding the age, sex, race, and ethnicity of the murder victim and the offender; the type of weapon used; the relationship of the victim to the offender; and the circumstances surrounding the incident. Law enforcement agencies are asked—but not required—to provide complete supplementary homicide data for each murder they report to the UCR Program. Information gleaned from these supplementary homicide data can be viewed in the Expanded Homicide Data section.

Homicides determined through law enforcement investigation to be justifiable are tabulated separately from murder and nonnegligent manslaughter.

Rape

In 2013, the FBI Uniform Crime Reporting (UCR) Program began collecting rape data under a revised definition within the Summary Reporting System. Previously, offense data for forcible rape were collected under the legacy UCR definition: the carnal knowledge of a female forcibly and against her will. Beginning with the 2013 data year, the term "forcible" was removed from the offense title, and the definition was changed. The revised UCR definition of rape is penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim. Attempts or assaults to commit rape are also included in the statistics presented here; however, statutory rape and incest are excluded.

In 2016, the FBI Director approved the recommendation to discontinue the reporting of rape data using the UCR legacy definition beginning in 2017. However, to maintain the 20-year trend in Table 1, national estimates for rape under the legacy definition are provided along with estimates under the revised definition for 2017.

Robbery

The FBI's Uniform Crime Reporting (UCR) Program defines robbery as taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear. Since the underlying motive for robbery is to obtain money or property from a person, every instance of this offense involves at least one victim who has suffered physical and/or psychological trauma. Despite the actual or threatened violence inherent in this very personal crime, for UCR purposes robbery is considered to be a crime against property. Accordingly, law enforcement officials report one offense for each separate robbery occurrence

Aggravated Assault

The FBI's Uniform Crime Reporting (UCR) Program defines aggravated assault as an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. The UCR Program further specifies that this type of assault is usually accompanied by the use of a weapon or by other means likely to produce death or great bodily harm. Attempted aggravated assault that involves the display of—or threat to use—a gun, knife, or other weapon is included in this crime category because serious personal injury would likely result if the assault were completed. When aggravated assault and larceny-theft occur together, the offense falls under the category of robbery.

Burglary

The FBI's Uniform Crime Reporting (UCR) Program defines burglary as the unlawful entry of a structure to commit a felony or theft. To classify an offense as a burglary, the use of force to gain entry need not have occurred. The UCR Program has three subclassifications for burglary: forcible entry, unlawful entry where no force is used, and attempted forcible entry. The UCR definition of "structure" includes an apartment, barn, house trailer, or houseboat when used as a permanent dwelling, office, railroad car (but not automobile), stable, or vessel (i.e., ship).

Larceny-theft

The FBI's Uniform Crime Reporting (UCR) Program defines larceny-theft as the unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Examples are thefts of bicycles, thefts of motor vehicle parts and accessories, shoplifting, pocket-picking, or the stealing of any property or article that is not taken by force, violence, or fraud. Attempted larcenies are included in offense totals. Embezzlement, confidence games, forgery, check fraud, etc., are excluded.

Motor Vehicle Theft

In the FBI's Uniform Crime Reporting (UCR) Program, motor vehicle theft is defined as the theft or attempted theft of a motor vehicle. A motor vehicle is defined in the UCR Program as a self-propelled vehicle that runs on land surfaces and not on rails. Examples of motor vehicles include sport utility vehicles, automobiles, trucks, buses, motorcycles, motor scooters, all-terrain vehicles, and snowmobiles. Motor vehicle theft does not include farm equipment, bulldozers, airplanes, construction equipment, or watercraft, such as motorboats, sailboats, houseboats, or jet skis. The taking of a motor vehicle for temporary use by persons having lawful access is excluded from this definition.

Arson

Only the fires that investigation determined to have been willfully set are included in this arson data collection. Fires labeled as suspicious or of unknown origin are excluded from these data.

This data collection does not include any estimates for arson because the degree of reporting arson offenses varies from agency to agency. Because of this disparity in reporting, arson offenses are excluded from Tables 1-7, all of which contain offense estimations.

Arson rates are calculated based upon data received from all law enforcement agencies that provide the UCR Program with data for 12 complete months and are presented in Arson Table 1.

Offenses Cleared

In the FBI's Uniform Crime Reporting (UCR) Program, law enforcement agencies can clear, or "close," offenses in one of two ways: by arrest or by exceptional means. Although an agency may administratively close a case, that does not necessarily mean that the agency can clear the offense for UCR purposes. To clear an offense within the UCR Program's guidelines, the reporting agency must adhere to certain criteria, which are outlined in the following text. (Note: The UCR Program does not distinguish between offenses cleared by arrest and those cleared by exceptional means in collecting or publishing data via the traditional Summary Reporting System.)

In the UCR Program, a law enforcement agency reports that an offense is cleared by arrest, or solved for crime reporting purposes, when three specific conditions have been met. The three conditions are that at least one person has been:

- Arrested.
- Charged with the commission of the offense.
- Turned over to the court for prosecution (whether following arrest, court summons, or police notice).

In its clearance calculations, the UCR Program counts the number of offenses that are cleared, not the number of persons arrested. The arrest of one person may clear several crimes, and the arrest of many persons may clear only one offense. In addition, some clearances that an agency records in a particular calendar year, such as 2022, may pertain to offenses that occurred in previous years.

In certain situations, elements beyond law enforcement's control prevent the agency from arresting and formally charging the offender. When this occurs, the agency can clear the offense exceptionally. Law enforcement agencies must meet the following four conditions in order to clear an offense by exceptional means. The agency must have:

- Identified the offender.

- Gathered enough evidence to support an arrest, make a charge, and turn over the offender to the court for prosecution.
- Identified the offender's exact location so that the suspect could be taken into custody immediately.
- Encountered a circumstance outside the control of law enforcement that prohibits the agency from arresting, charging, and prosecuting the offender.

Examples of exceptional clearances include, but are not limited to, the death of the offender (e.g., suicide or justifiably killed by police or citizen); the victim's refusal to cooperate with the prosecution after the offender has been identified; or the denial of extradition because the offender committed a crime in another jurisdiction and is being prosecuted for that offense. In the UCR Program, the recovery of property alone does not clear an offense.

When an offender under the age of 18 is cited to appear in juvenile court or before other juvenile authorities, the UCR Program considers the incident for which the juvenile is being held responsible to be cleared by arrest, even though a physical arrest may not have occurred. When clearances involve both juvenile and adult offenders, those incidents are classified as clearances for crimes committed by adults. Because the clearance percentages for crimes committed by juveniles include only those clearances in which no adults were involved, the figures in this publication should not be used to present a definitive picture of juvenile involvement in crime.

Expanded Offense Data

Expanded offense data are the details of the various offenses that the Uniform Crime Reporting Program collects beyond the count of how many crimes law enforcement agencies report. These details may include the type of weapon used in a crime, type or value of items stolen, and so forth. For example, expanded homicide data provide supplemental details about murders, such as the age, sex, race, and ethnicity of both the victim and the offender, the weapon used in the homicide, the circumstances surrounding the offense, and the relationship of the victim to the offender. In addition to these types of details, expanded data include trends (for example, 2-year comparisons) and crime rates per 100,000 inhabitants. Expanded offense data, including expanded homicide data, are details collected in addition to the reports of the number of crimes known. As a result, law enforcement agencies can report an offense without providing the supplemental information about that offense.

Juveniles

The UCR Program considers a juvenile to be an individual under 18 years of age regardless of state definition. The program does not collect data regarding police contact with a juvenile who has not committed an offense, nor does it collect data on situations in which police take a juvenile into custody for his or her protection, e.g., neglect cases.

Police Employees

Each year, law enforcement agencies across the United States report to the UCR Program the total number of sworn law enforcement officers and civilians in their agencies as of October 31. The Uniform Crime Reporting (UCR) Program defines law enforcement officers as individuals who ordinarily carry a firearm and a badge, have full arrest powers, and are paid from governmental funds allocated specifically for sworn law enforcement representatives.

Because of law enforcement's varied service requirements and functions, as well as the distinct demographic traits and characteristics of each jurisdiction, users should use caution when drawing comparisons between agencies' staffing levels based on police employment data from the UCR Program. In addition, the data reflect existing staffing levels and should not be interpreted as preferred officer strengths recommended by the FBI. Lastly, it should be noted that the totals given for sworn officers for any particular agency reflect not only the patrol officers on the street, but also the officers assigned to various other duties such as those in administrative and investigative positions and those assigned to special teams. Civilian employees include full-time agency personnel such as clerks, radio dispatchers, meter attendants, stenographers, jailers, correctional officers, and mechanics.

Data completeness and quality

In order to fulfill its responsibilities in connection with the UCR Program, the FBI edits and reviews individual agency data for both completeness and quality. Members of the national program's staff contact state UCR Programs in connection with crime-reporting matters and, as necessary, when approved by the state, individual contributors. Upon request, staff members conduct training programs within the state on law enforcement record-keeping and crime-reporting procedures. Following audit standards established by the federal government, the FBI conducts an audit of each state's UCR data collection procedures once every 3 years. Should circumstances develop whereby a state program does not comply with the aforementioned requirements, the national program may institute a direct collection of data from law enforcement agencies within that state.

NIBRS reporting and conversion

All 50 state programs are certified to provide their UCR data in the expanded NIBRS format. For presentation in this publication, the NIBRS data were converted to the historical SRS data. The UCR Program staff constructed the NIBRS database to allow for such conversion so that UCR's long-running time series could continue.

Editing procedures

The UCR Program thoroughly examines agency data for deviations in crime data from month to month and from present to past years' data that may indicate errors. UCR staff members compare aggregated data from agencies of similar population size to

identify any unusual fluctuations in an agency's crime counts. Large variations in crime levels may indicate modified records procedures, incomplete reporting, or changes in the jurisdiction's geopolitical structure.

Evaluation of trends—Data reliability is a high priority of the FBI, which brings any deviations or arithmetical adjustments to the attention of state UCR Programs or the submitting agencies. Typically, FBI staff members study the monthly reports to evaluate periodic trends prepared for individual reporting units. Any significant increase or decrease becomes the subject of a special inquiry. Changes in crime reporting procedures or annexations that affect an agency's jurisdiction can influence the level of reported crime. When this occurs, the FBI excludes the figures for specific crime categories or totals, if necessary, from the trend tabulations.

Training for contributors—In addition to the evaluation of trends, the FBI provides training seminars and instructional materials on crime reporting procedures to assist contributors in complying with UCR standards. Throughout the country, the national program maintains liaison with state UCR Programs and law enforcement personnel and holds training sessions to explain the purpose of the program, the rules of uniform classification and scoring, and the methods of assembling the information for reporting. When an individual agency has specific problems in compiling its crime statistics and its remedial efforts are unsuccessful, personnel from the FBI's Criminal Justice Information Services Division may visit the contributor to aid in resolving the difficulties.

Population estimation

For population estimates, the FBI computed individual rates of growth from one year to the next for every city/town and county using the current decennial counts through the most recent population estimates available from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its most recent Census population estimate to derive the agency's current year population estimate. Population totals for 2010 are from the U.S. Census Bureau's decennial population counts.

Crime trends

By showing fluctuations from year to year, trend statistics offer the data user an added perspective from which to study crime. Percent change tabulations in this publication are computed only for reporting agencies that provided comparable data for the periods under consideration. The FBI excludes from the trend calculations all figures except those received for common months from common agencies. Also excluded are unusual fluctuations of data that the FBI determines are the result of such variables as improved records procedures, annexations, etc.

Publication Annotation

Narrative portions of this publication present percentage breakdowns for various facets of tabular data. Where percentage breakdowns are used, percentages may not add to 100.0 percent due to rounding.

Caution to users

Data users should exercise care in making any direct comparison between data in this publication and those in prior issues of *Crime in the United States*. Because of differing levels of participation from year to year and reporting problems that require the FBI to estimate crime counts for certain contributors, some data may not be comparable from year to year. In addition, this publication may contain updates to data provided in prior years' publications.

Offense Estimation

Tables 1 through 5 and Table 7 of this publication contain estimates for the entire United States. Because not all law enforcement agencies provide data for complete reporting periods, the FBI includes estimated crime numbers in these national presentations. The FBI estimates data for three areas: Metropolitan Statistical Areas (MSAs), cities outside MSAs, and nonmetropolitan counties. The FBI computes estimates for participating agencies not providing 12 months of complete offense data. For agencies supplying 3 to 11 months of offense data, the national UCR Program estimates for the missing data by following a standard estimation procedure using the data provided by the agency. If an agency has supplied less than 3 months of data, the FBI computes estimates by using the known crime figures of similar areas within a state and assigning the same proportion of crime volumes to nonreporting agencies. The estimation process considers the following: population size covered by the agency; type of jurisdiction, e.g., police department versus sheriff's office; and geographic location.

Estimation Notes:

For the 2021 collection year, the FBI's UCR Program transitioned from the traditional Summary Reporting System to the more comprehensive National Incident-Based Reporting System. A significant number of agencies were unable to complete the transition to NIBRS in 2021. Due to the lower volume of participation, the FBI was unable to produce the traditional national estimates for that year. Because SRS data was not directly collected by the FBI, in order to compile estimates for 2021, the FBI has since gathered a sampling of 2021 SRS data to augment the information collected via NIBRS and compile reliable estimates.

Beginning in 2022, the FBI resumed collecting SRS data from agencies that had not yet transitioned to NIBRS to supplement the NIBRS data collection. The FBI will assess the level of NIBRS transition yearly and continue to accept SRS data until it is no longer needed.

Estimation of state-level data

In response to various circumstances, the FBI calculates estimated offense totals for certain states. For example, some states do not provide rape figures in accordance with UCR guidelines. In addition, problems at the state level have, at times, resulted in no useable data. Also, the efforts to convert to NIBRS have contributed to the need for unique estimation procedures. A summary of state-specific and offense-specific estimation procedures follows.

State	Year(s)	Reason for Estimation	Estimation Method
Illinois	2005 2006 2007 2008 2009	The state UCR Program was unable to provide complete offense figures in accordance with UCR guidelines.	Valid violent crime and property crime offense counts, with the exception of forcible rape, were available for most of the largest cities (100,000 and over in population). For other agencies, the only available counts generated by the Illinois state UCR Program were state totals based upon an incident-level system without indication of multiple offenses recorded within single incidents. Therefore, the UCR Hierarchy Rule could not be applied in order to convert the state's data to SRS data. (The Hierarchy Rule requires that only the most serious offense in a multiple-offense criminal incident is counted.) To arrive at a comparable state estimate to be included in national compilations, the Illinois state UCR Program's state totals (which were inflated because of the nonapplication of the Hierarchy Rule) were reduced by the proportion of multiple offenses reported within single incidents in the NIBRS database. Valid totals for the large cities were excluded from the reduction process.
	2006 2007 2008 2009	The state UCR Program was unable to provide forcible rape figures in accordance with UCR guidelines.	Forcible rape figures for Rockford include only the forcible rape offenses with female victims that were extracted from the agency's NIBRS data. To derive the state forcible rape estimate, the percentage of female forcible rape victims was extracted from all NIBRS incidents in which a forcible sex offense was reported. That percentage was applied to the forcible rape count received from the Illinois state UCR Program.

Minnesota	2005 2006 2007 2008 2009 2010 2011 2012	The state UCR Program was unable to provide forcible rape figures in accordance with UCR guidelines.	2005–To arrive at a comparable state estimate for forcible rape offenses to be included in national compilations, Minnesota's forcible rape total was estimated by using the national rates per 100,000 inhabitants within the eight population groups and proportionally assigning forcible rape volumes to Minnesota's population groups. 2006-2012–Valid forcible rape figures were available for Minneapolis and St. Paul. To arrive at a comparable state estimate for forcible rape offenses to be included in national compilations, the rest of Minnesota's forcible rape totals were estimated by using the national rates per 100,000 inhabitants within the eight population groups and proportionally assigning forcible rape volumes to Minnesota's population groups.

Arrest data considerations

The FBI's Uniform Crime Reporting (UCR) Program counts one arrest for each separate instance in which a person is arrested, cited, or summoned for an offense. The UCR Program collects arrest data on 28 offenses, as described in Offense Definitions. (Please note that, as of 2010, the UCR Program no longer collects data on runaways.) Because a person may be arrested multiple times during a year, the UCR arrest figures do not reflect the number of individuals who have been arrested; rather, the arrest data show the number of times that persons are arrested, as reported by law enforcement agencies to the UCR Program.

Drunkenness figures were submitted by Summary reporting agencies only. As of 2021 drunkenness is no longer a separate offense in National Incident Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

Figures for suspicion include only data submitted by Summary reporting agencies because suspicion is not collected as a crime via NIBRS.

Table methodology

The tables in this report are based upon varying levels of data submissions. For example, some participating agencies may submit data for some but not all months of the reporting year. Using well-established procedures, the FBI estimates for missing offense data

for agencies with partial reports and for nonreporting agencies and then aggregates these estimates with data reported to determine the number of offenses for each state and the nation. Tables 1–5, 7, and 29 present these approximations. In addition, various circumstances require the FBI to estimate offense totals from time to time for some states.

To be included in Tables 8–11 and 21 and 22, which provide statistics for specific jurisdictions and states, agencies must submit 12 months of complete data prior to the FBI's established deadlines. To be included in Table 20, agencies must submit supplementary homicide data. Tables 12–19, 23–28, 30–75, and 77 provide the number of reporting agencies (data source) and the total population covered by their collective jurisdictions. To be included in Tables 78–81, agencies must submit officer and civilian law enforcement employee counts as of October 31. For information on the classification of jurisdictions, see *Area Definitions*.

The tabular presentation that follows briefly describes the data sources and the methods used to construct Tables 1-69.

(1) Table	(2) Database	(3) Table Construction	(4) General Comments
Table 1 – Crime in the United States, by Volume and Rate per 100,000 Inhabitants (20 year table) Table 1A – Crime in the United States, Percent Change in Volume and Rate per 100,000 Inhabitants for	The data used in creating the estimates for these tables were from all law enforcement agencies participating in the UCR Program (including those submitting less than 12 months of data). Crime statistics for the nation include estimated offense totals (except arson) for agencies submitting less than 12 months of offense reports for each year.	These tables provide the estimated number and rate (per 100,000 inhabitants) of reported crimes in the United States for 20 years, as well as the 2-, 5-, and 10-year trends for the reporting year based on these estimates. This table contains estimates based on both the legacy and revised definitions of rape. For population estimates, the FBI computed individual rates of growth from one year to the next for every city/town and county using the current decennial counts through the most recent population estimates available from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its most recent Census population estimate to derive the agency's current year population estimate.	The UCR Program does not have sufficient data to estimate for arson. Estimates are updated to include data submitted as of the latest publication cutoff date for *Crime in the United States*. Because agencies can submit or update prior years' data, prior year estimates may change from previous releases. In 2013, the FBI's UCR Program initiated the

2 years, 5 years, and 10 years		Population totals for 2010 are from the U.S. Census Bureau's decennial population counts. This table contains estimates based on both the legacy and revised definitions of rape. Agencies submit data based on only one of these definitions. Within each population group size, the proportion of female rape victims was calculated from all NIBRS reports of rape, sodomy, and sexual assault with an object. For agencies that reported using the revised definition, the actual number of reported rapes was decreased by the calculated proportion to arrive at an estimate for the number of rapes using the legacy definition. Conversely, for agencies that reported using the legacy definition, the actual number of reported rapes was increased by the inverse of the proportion to arrive at an estimate for the number of rapes using the revised definition.	collection of rape data under a revised definition within the Summary Based Reporting System. The term "forcible" was removed from the offense name, and the definition was changed to "penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim." In 2016, the FBI Director approved the recommendation to discontinue the reporting of rape data using the UCR legacy definition beginning in 2017.
Table 2 – Crime in the United States, by Community Type	The data used in creating the estimates for this table were from all law enforcement agencies participating in the UCR Program (including those submitting less than 12 months of data).	This table provides estimated crime statistics for the nation, Metropolitan Statistical Areas (MSAs), cities outside metropolitan areas, and nonmetropolitan counties; the rate (per 100,000 inhabitants) for each grouping; and their estimated populations. For MSAs, cities outside metropolitan areas, and nonmetropolitan counties, the table also includes crime statistics by area actually reporting.	The UCR Program does not have sufficient data to estimate for arson.

	Crime statistics for the nation and for community types include estimated offense totals (except arson) for agencies submitting less than 12 months of offense reports for each year.	The statistics under the heading "Area actually reporting" represent offense totals for agencies submitting 12 months of data and estimated totals for agencies submitting less than 12 but more than 2 months of data. The statistics under the heading "Estimated total" represent the totals under "Area actually reporting" plus estimated totals for agencies submitting 2 months or less of data. The FBI derives national statistics for community types by using the community type estimates for individual states as shown in Table 5. For population estimates, the FBI computed individual rates of growth from one year to the next for every city/town and county using the current decennial counts through the most recent population estimates available from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its most recent Census population estimate to derive the agency's current year population estimate.	
Table 3 – Crime in the United States, Offense and Population Percent Distribution by Region	The data used in creating this table were from all law enforcement agencies participating in the UCR Program (including those submitting less than 12 months of data).	This table provides the percent distribution of estimated offenses and populations by region. The FBI computes regional offense distribution percentages using the volume estimates as shown in Table 4.	The UCR Program does not have sufficient data to estimate for arson.

Table 4 – Crime in the United States, by Region, Geographic Division, and State (2 year table)	The data used in creating the estimates for this table were from all law enforcement agencies in the UCR Program (including those submitting less than 12 months of data). Crime statistics include estimated offense totals (except arson) for agencies submitting less than 12 months of offense reports for each year.	This table provides estimated number and rate (per 100,000 inhabitants) of crime in each region, geographic division, and state for the previous and current year, and the percent change in each. The FBI derives state totals by estimating for nonreporting and partially reporting agencies within each state. Using the state's individual agency data and estimates, the program aggregates a state total. For population estimates, the FBI computed individual rates of growth from one year to the next for every city/town and county using the current decennial counts through the most recent population estimates available from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its most recent Census population estimate to derive the agency's current year population estimate.	Any comparisons of crime among different locales should take into consideration relevant factors in addition to the area's crime statistics. *UCR Statistics: Their Proper Use* provides more details concerning the proper use of UCR statistics. The UCR Program does not have sufficient data to estimate for arson.
Table 5 – Crime in the United States, by State	The data used in creating the estimates for this table were from all law enforcement agencies in the UCR Program (including those submitting less than 12 months of data). Crime statistics include estimated offense totals (except arson) for agencies submitting less	This table provides the estimated number of offenses and the rate of offenses per 100,000 inhabitants for each state. This table provides the estimated number of offenses and the actual number of offenses reported in MSAs, cities outside metropolitan areas, and nonmetropolitan counties; the rate (per 100,000 inhabitants) for each grouping; and the estimated population for each state. The statistics under the heading "Area actually reporting" represent offense totals for agencies	The UCR Program does not have sufficient data to estimate for arson. Any comparisons of crime among different locales should take into consideration relevant factors in addition to the area's crime statistics. *UCR Statistics: Their Proper Use* provides more details concerning the

	than 12 months of offense reports for each year.	submitting 12 months of data and estimated totals for agencies submitting less than 12 but more than 2 months of data. The statistics in the table under the heading "Estimated total" represent the totals under "Area actually reporting" plus estimated totals for agencies submitting 2 months or less of data. For population estimates, the FBI computed individual rates of growth from one year to the next for every city/town and county using the current decennial counts through the most recent population estimates available from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its most recent Census population estimate to derive the agency's current year population estimate.	proper use of UCR statistics.
Table 6 – Crime in the United States, by Metropolitan Area	The data used in creating the estimates for this table were from all law enforcement agencies in the UCR Program (including those submitting less than 12 months of data). Crime statistics include estimated offense totals (except arson) for agencies submitting less	This table provides actual and estimated crime data for MSAs and their estimated populations, the counties included in each MSA, and estimated populations for principal cities in MSAs. The table also includes statistics by area actually reporting, estimated total, and rate (per 100,000 inhabitants). This table provides crime statistics for the Metropolitan Divisions (MDs), which are subdivisions of MSAs that have a core population of at least 2.5 million people. The table also includes the rate (per 100,000 inhabitants) of offenses for each MD and actual and estimated offense totals.	The UCR Program does not have sufficient data to estimate for arson. Any comparisons of crime among different locales should take into consideration relevant factors in addition to the area's crime statistics. *UCR Statistics: Their Proper Use* provides more details concerning the

	than 12 months of offense reports for each year.	This table includes all currently designated MSAs in which at least 75 percent of the agencies within the MSA reported data to the UCR Program and for which the principal city/cities submitted 12 months of complete data. The statistics under the heading "Total area actually reporting" represent offense totals for agencies submitting 12 months of data and estimated totals for agencies submitting less than 12 but more than 2 months of data. The statistics under the heading "Estimated total" represent the above "Total area actually reporting" plus estimated totals for agencies submitting 2 months or less of data. For population estimates, the FBI computed individual rates of growth from one year to the next for every city/town and county using the current decennial counts through the most recent population estimates available from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its most recent Census population estimate to derive the agency's current year population estimate.	proper use of UCR statistics.
Table 7 – Offense Analysis, United States (5 year table)	The data used in creating the estimates for this table were from all law enforcement agencies participating in the UCR Program (including those	This table provides estimations for the offenses of murder, rape, robbery, burglary, larceny-theft, and motor vehicle theft for the nation for the most recent five years.	The data source from which the FBI derives Table 7 does not include aggravated assault or arson data.

	submitting less than 12 months of data). Crime statistics include estimated offense tables (except arson) for agencies submitting less than 12 months of offense reports for each year.	This table provides additional detail for the following offenses: Robbery by location (such as street/highway, bank, residence). Burglary by location (residence or nonresidence) and time of day (night, day, or unknown). Larceny-theft by type (such as pocket-picking, purse-snatching, and shoplifting). The FBI estimates the breakdowns for robbery, burglary, and larceny-theft by first calculating the proportion of the total offenses represented by the breakdowns as presented in Table 23 and applying those percentages to the estimated offense totals as presented in Table 4. This table contains estimates based on the revised definition of rape.	
Table 8 – Offenses Known to Law Enforcement, by State and City	The data used in creating this table were from all city and town law enforcement agencies submitting 12 months of complete offense data for the year.	This table provides the volume of violent crime (murder and nonnegligent manslaughter, rape, robbery, and aggravated assault) and property crime (burglary, larceny-theft, and motor vehicle theft) as reported by city and town law enforcement agencies (listed alphabetically by state) that contributed data to the UCR Program. (Note: Arson is not included in the property crime total in this table; however, if complete arson data were provided, they will appear in the arson column.)	Readers should take into consideration relevant factors in addition to the areas' crime statistics when making any valid comparisons of crime among different locales. *UCR Statistics: Their Proper Use* provides more details concerning the

		The FBI does not publish arson data unless it receives data from either the agency or the state for all 12 months of the calendar year. For population estimates, the FBI computed individual rates of growth from one year to the next for every city/town and county using the current decennial counts through the most recent population estimates available from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its most recent Census population estimate to derive the agency's current year population estimate.	proper use of UCR statistics.
Table 9 – Offenses Known to Law Enforcement, by State by University and College	The data used in creating this table were from all university/college law enforcement agencies submitting 12 months of complete offense data for the year.	This table provides the volume of violent crime (murder and nonnegligent manslaughter, rape, robbery, and aggravated assault) and property crime (burglary, larceny-theft, and motor vehicle theft) as reported by university/college law enforcement agencies (listed alphabetically by state) that contributed data to the UCR Program. (Note: Arson is not included in the property crime total in this table; however, if complete arson data were provided, they will appear in the arson column.) The student enrollment figures provided by the U.S. Department of Education are for 2023, the most recent available. They include full- and part-time students.	Readers should take into consideration relevant factors in addition to the areas' crime statistics when making any valid comparisons of crime among different locales. *UCR Statistics: Their Proper Use* provides more details concerning the proper use of UCR statistics.

		The FBI does not publish arson data unless it receives data from either the agency or the state for all 12 months of the calendar year.	
Table 10 – Offenses Known to Law Enforcement, by State by Metropolitan and Nonmetropolitan Counties	The data used in creating this table were from all county law enforcement agencies submitting 12 months of complete offense data for the year.	This table provides the volume of violent crime (murder and nonnegligent manslaughter, rape, robbery, and aggravated assault) and property crime (burglary, larceny-theft, and motor vehicle theft) as reported by law enforcement agencies (such as individual sheriffs' offices and/or county police departments) in metropolitan counties and nonmetropolitan counties (listed alphabetically by state) that contributed data to the UCR Program. (Note: Arson is not included in the property crime total in this table; however, if complete arson data were provided, they will appear in the arson column.) The Metropolitan Counties classification encompasses jurisdictions covered by noncity law enforcement agencies located within currently designated Metropolitan Statistical Areas (MSAs). The Nonmetropolitan Counties classification encompasses jurisdictions covered by noncity agencies located outside currently designated MSAs. The FBI does not publish arson data unless it receives data from either the agency or the state for all 12 months of the calendar year.	These data do not represent county totals because they exclude crime counts for city agencies and other types of agencies that have jurisdiction within each county. Readers should take into consideration relevant factors in addition to the areas' crime statistics when making any valid comparisons of crime among different locales. *UCR Statistics: Their Proper Use* provides more details concerning the proper use of UCR statistics.
Table 11 – Offenses Known to Law Enforcement,	The data used in creating this table were from all state, tribal, and other law enforcement agencies	This table provides the volume of violent crime (murder and nonnegligent manslaughter, rape, robbery, and aggravated assault) and property crime (burglary, larceny-theft, and motor vehicle theft) as	These data represent reported crime from individual state or territorial law enforcement

by State by State, Tribal, and Other Agencies	submitting 12 months of complete offense data for the year.	reported by state, tribal, and other law enforcement agencies (listed alphabetically by state) that contributed data to the UCR Program. (Note: Arson is not included in the property crime total in this table; however, if complete arson data were provided, they will appear in the arson column.) The FBI does not publish arson data unless it receives data from either the agency or the state for all 12 months of the calendar year.	agencies (i.e., state police, highway patrol, tribal, and/or other law enforcement agencies managed by the state or territory) participating in the UCR Program. Readers should take into consideration relevant factors in addition to the areas' crime statistics when making any valid comparisons of crime among different locales. *UCR Statistics: Their Proper Use* provides more details concerning the proper use of UCR statistics.
Table 12 – Crime Trends, by Population Group (2 year table) Table 13 – Crime Trends, by Suburban and Nonsuburban Cities by	The data used in creating these tables were from all law enforcement agencies submitting at least 6 common months of complete offense reports for the previous year and the current year.	These 2-year trend tables provide the number of offenses for the previous and current years and the percent change between these 2 years. In calculating trends, the UCR Program includes only common reported months for individual agencies. For population estimates, the FBI computed individual rates of growth from one year to the next for every city/town and county using the current decennial counts through the most recent population estimates available from the U.S. Census Bureau.	

Population Group (2 year table) Table 14 – Crime Trends, by Metropolitan and Nonmetropolitan Counties by Population Group (2 year table) Table 15 – Crime Trends, Additional Information About Selected Offenses by Population Group (2 year table)		Each agency's rates of growth were averaged; that average was then applied and added to its most recent Census population estimate to derive the agency's current year population estimate.	
Table 16 – Rate: Number of Crimes per 100,000 Inhabitants by Population Group	The data used in creating these tables were from all law enforcement agencies submitting 12 months of complete data (except arson, which is not	These tables provide the rate per 100,000 inhabitants and the number of offenses known to law enforcement for violent crime (murder and nonnegligent manslaughter, rape, robbery, and aggravated assault) and property crime (burglary, larceny-theft, and motor vehicle theft) for law enforcement agencies submitting 12 months of complete data (except arson) for the year. In addition, these tables furnish the	

Table 17 – Rate: Number of Crimes per 100,000 Inhabitants by Suburban and Nonsuburban Cities by Population Group Table 18 – Rate: Number of Crimes per 100,000 Inhabitants by Metropolitan and Nonmetropolitan Counties by Population Group Table 19 – Rate: Number of Crimes per 100,000 Inhabitants, Additional Information About Selected Offenses by	included in these tables) for the year.	number of agencies meeting the criteria for inclusion in these tables and provide the estimated population for each population group. The FBI derived the offense rates by first dividing the total aggregated offense counts by the aggregated populations covered by contributing agencies for which 12 months of complete data were supplied and then multiplying the resulting figure by 100,000. The suburban and nonsuburban cities classifications in Table 17 encompass all cities other than principal cities served by municipal law enforcement agencies in MSAs. For population estimates, the FBI computed individual rates of growth from one year to the next for every city/town and county using the current decennial counts through the most recent population estimates available from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its most recent Census population estimate to derive the agency's current year population estimate.	

Population Group			
Table 20 – Murder, by State, Types of Weapons	The data used in creating this table were from all law enforcement agencies that submitted supplementary homicide data for the year.	This table provides the type of weapons used in murder offenses. The data are based on the aggregated data from agencies within each state for which supplementary homicide data (e.g., weapon information) were reported to the FBI. The table also includes a breakdown of the types of firearms used in murders (i.e., handguns, rifles, shotguns, or firearms [type unknown]). The weapon totals are aggregated from all murders for which the FBI received supplemental homicide data for calendar year.	The FBI received limited supplementary homicide data from Florida. NIBRS homicide data were included in this table for Florida. The SRS supplementary homicide data submitted by the Florida state UCR Program did not meet UCR guidelines and were not included.
Table 21 – Robbery, by State, Types of Weapons Table 22 – Aggravated Assault, by State, Types of Weapons	The data used in creating these tables were from all law enforcement agencies that submitted complete offense reports for 12 months for the year.	These tables provide the type of weapons used in robberies (Table 21) and aggravated assaults (Table 22). The tables include the number of agencies that submitted data by state and the population covered by those agencies. The weapon totals are aggregated from all robberies and aggravated assaults for which the FBI received weapon breakdowns. For population estimates, the FBI computed individual rates of growth from one year to the next for every city/town and county using the current decennial counts through the most recent population	The FBI received limited data from Florida.

		estimates available from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its most recent Census population estimate to derive the agency's current year population estimate.	
Table 23 – Offense Analysis, Number and Percent Change (2 year table) Table 24 – Property Stolen and Recovered, by Type and Value	The data used in creating these tables were from all law enforcement agencies submitting at least 6 months of complete property/circumstance data for the year.	The FBI derives trends by comparing statistics from agencies with at least 6 common months of complete data reports for the previous and current year. Table 23 provides an analysis of the crimes of murder, rape, robbery, burglary, larceny-theft, and motor vehicle theft. The table also lists the number of these offenses reported in the current year and the percentage change in the number of these offenses when compared with the previous year's data. Due to technical system changes and data quality issues, some average values may be inflated in Table 23. Due to technical system changes and data quality issues, some property stolen and recovered data may be inflated in Table 24. The offense of aggravated assault is not included in Table 23. In the UCR Program, the taking of money or property in connection with an assault is reported as robbery. The percent distribution statistics are based on the offense totals for the crimes of robbery, burglary, and larceny-theft.	The FBI presents offense totals for the crimes of murder and rape, and then, based on supplemental data supplied by law enforcement, the FBI computes average value lost totals for the crimes of robbery, burglary, larceny-theft, and motor vehicle theft. The data source from which the FBI derives the information for this table does not include arson. Information regarding the average value of property damage due to arson can be found in Arson Table 2.

		Table 24 provides property types, the reported value of stolen property, and the value of recovered property. This table also lists the percentage of recovered value of each property type. For population estimates, the FBI computed individual rates of growth from one year to the next for every city/town and county using the current decennial counts through the most recent population estimates available from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its most recent Census population estimate to derive the agency's current year population estimate.	
Table 25 – Percent of Offenses Cleared by Arrest or Exceptional Means, by Population Group Table 26 – Percent of Offenses Cleared by Arrest or Exceptional Means, by Region and	The data used in creating these tables were from all law enforcement agencies submitting at least 6 months of complete offense reports for the year.	These tables provide the number of violent crimes, property crimes, and arsons with a breakdown of the offenses known to law enforcement and the percentage of those offenses that were cleared by arrest or exceptional means. Not all agencies submit data reports for arson to the FBI. Therefore, the agency counts and estimated population presented in this table do not represent participation for the reporting of arson. The FBI bases percent cleared statistics on aggregated offense and clearance totals. For population estimates, the FBI computed individual rates of growth from one year to the next for every city/town and county using the current decennial counts through the most recent population	The following information pertains only to Table 28: • When an offender under the age of 18 is cited to appear in juvenile court or before other juvenile authorities, the UCR Program considers the incident to be cleared by arrest, even though a physical arrest may not have occurred. • Clearances for offenses that include both adult and

Geographic Division Table 27 – Percent of Offenses Cleared by Arrest or Exceptional Means, Additional Information About Selected Offenses by Population Group Table 28 – Number of Offenses Cleared by Arrest or Exceptional Means, Percent of Clearances Involving Persons Under 18 Years of Age by Population Group		estimates available from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its most recent Census population estimate to derive the agency's current year population estimate.	juvenile offenders are classified as clearances for crimes committed by adults and are, therefore, not included in this table. • Because the clearance percentages for crimes committed by juveniles include only those clearances in which no adults were involved, the figures in this table should not be used to present a definitive picture of juvenile involvement in crime.

Table 29 – Estimated Number of Arrests, United States	The data used in creating the estimates for this table were from all law enforcement agencies submitting 12 months of arrest data for the year.	This table provides the estimated number of persons arrested in the United States. The arrest totals presented are national estimates based on the arrest statistics of all law enforcement agencies submitting 12 months of arrest data to the UCR Program. The estimated total number of arrests in this table is the sum of estimated arrest volumes for 27 offenses, not including suspicion. The arrest data for each of the individual offenses in this table is the sum of the estimated volume of arrests for that offense within each of the eight population groups. (See *Area Definitions*.) The FBI calculated each of the eight population group's arrest estimates by dividing the reported 12-month volume figures (as shown in Table 31) by the contributing agencies' jurisdictional populations. The resulting figure was then multiplied by the total population for each population group as estimated by the UCR Program.	
Table 30 – Number and Rate of Arrests by Region Table 31 – Number and Rate of Arrests	The data used in creating these tables were from all law enforcement agencies submitting 12 months of arrest data for the year.	These tables provide the number of persons arrested and the arrest rate per 100,000 inhabitants for the four regions of the United States (Table 30), the eight UCR population groups (Table 31), and the nation as a whole (both tables). The FBI derived the arrest rates by first dividing the total number of arrests by the aggregated populations	These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistics in this table could, in some cases,

by Population Group		covered by contributing agencies and then multiplying the resulting figure by 100,000. For population estimates, the FBI computed individual rates of growth from one year to the next for every city/town and county using the current decennial counts through the most recent population estimates available from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its most recent Census population estimate to derive the agency's current year population estimate.	represent multiple arrests of the same person.
Table 32 – Ten-Year Arrest Trends, Totals Table 33 – Ten-Year Arrest Trends by Sex	The data used in creating these tables were from all law enforcement agencies submitting 12 months of arrest data for both comparison years.	These 10-year trend tables provide the number of persons arrested in the comparison years and the percent change when the data for these 2 years are compared. Table 32 furnishes a breakdown of these data by juveniles (persons under age 18) and adults. Table 33 furnishes a breakdown of these data by juveniles and adults. For population estimates, the FBI computed individual rates of growth from one year to the next for every city/town and county using the current decennial counts through the most recent population estimates available from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its most recent Census population estimate to derive the agency's current year population estimate.	These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistics in this table could, in some cases, represent multiple arrests of the same person.
Table 34 – Five-Year	The data used in creating these tables were from all	These 5-year trend tables provide the number of persons arrested in the comparison years and the	These data represent the number of persons

Arrest Trends, Totals Table 35 – Five-Year Arrest Trends by Sex	law enforcement agencies submitting 12 months of arrest data for both comparison years.	percent change when the data for these 2 years are compared. Table 34 furnishes a breakdown of these data by juveniles (persons under age 18) and adults. Table 35 furnishes a breakdown of these data by gender for juveniles. For population estimates, the FBI computed individual rates of growth from one year to the next for every city/town and county using the current decennial counts through the most recent population estimates available from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its most recent Census population estimate to derive the agency's current year population estimate.	arrested; however, some persons may be arrested more than once during a year. Therefore, statistics in this table could, in some cases, represent multiple arrests of the same person.
Table 36 – Current Year Over Previous Year Arrest Trends, Totals Table 37 – Current Year Over Previous Year Arrest Trends by Sex	The data used in creating these tables were from all law enforcement agencies submitting 12 months of arrest data for both previous and current years.	These 2-year trend tables provide the number of persons arrested in previous and current years and the percent change when the data for these 2 years are compared. Table 36 furnishes a breakdown of these data by juveniles (persons under age 18) and adults. Table 37 furnishes a breakdown of these data by gender for juveniles. For population estimates, the FBI computed individual rates of growth from one year to the next for every city/town and county using the current decennial counts through the most recent population estimates available from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its most recent	These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistics in this table could, in some cases, represent multiple arrests of the same person.

		Census population estimate to derive the agency's current year population estimate.	
Table 38 – Arrests, by Age Table 39 – Arrests, Males, by Age Table 40 – Arrests, Females, by Age Table 41 – Arrests, Persons Under 15, 18, 21, and 25 Years of Age Table 42 – Arrests, by Sex Table 43 – Arrests, by Race and Ethnicity	The data used in creating these tables were from all law enforcement agencies submitting 12 months of arrest data for the year.	These tables provide the number of persons arrested nationwide for the offenses for which the UCR Program collects arrest data. Tables 38–40 provide these data broken down by the age of the arrestee and include the percent distribution of arrests by offense type. Table 41 furnishes the data within the following age groups: Under 15, Under 18, Under 21, and Under 25 years. Table 42 supplies breakdowns of these data for each offense and supplies a percent distribution of males and females arrested among all offense types. Table 43 provides the data by the race and ethnicity of the arrestee and the percent distribution of arrests by race for each offense. For population estimates, the FBI computed individual rates of growth from one year to the next for every city/town and county using the current decennial counts through the most recent population estimates available from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its most recent Census population estimate to derive the agency's current year population estimate.	These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistics in this table could, in some cases, represent multiple arrests of the same person. Table 39 provides these data for males only and Table 40 provides the data for females only. The totals provided in Table 43 reflect only those persons arrested by law enforcement agencies that provided race information to the UCR Program; therefore, the totals may not match those shown in other arrest tables for the nation. In Table 43, the ethnicity totals are representative of those agencies that

			provided ethnicity breakdowns. Not all agencies provide ethnicity data; therefore, the race and ethnicity totals will not be equal.
Table 44 – Arrest Trends, Cities (2 year table) Table 45 – Arrest Trends, Cities, by Sex (2 year table)	The data used in creating these tables were from all city law enforcement agencies submitting 12 months of arrest data for both previous and current years.	These 2-year trend tables provide the number of persons arrested in cities in previous and current years and the percent change when the data for these 2 years are compared. Table 44 furnishes a breakdown of these data by juveniles (persons under age 18) and adults. Table 45 furnishes a breakdown of these data by gender for juveniles. For population estimates, the FBI computed individual rates of growth from one year to the next for every city/town and county using the current decennial counts through the most recent population estimates available from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its most recent Census population estimate to derive the agency's current year population estimate.	These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistics in these tables could, in some cases, represent multiple arrests of the same person.
Table 46 – Arrests, Cities, by Age Table 47 – Arrests, Cities, Persons Under 15, 18, 21, and	The data used in creating these tables were from all city law enforcement agencies submitting 12 months of arrest data for the year.	These tables provide the number of persons arrested in cities for the offenses for which the UCR Program collects arrest data. Table 46 provides these data broken down by the age of the arrestee and includes the percent distribution of arrests by offense type. Table 47 furnishes the data within the following age groups: Under 15, Under 18, Under 21, and Under 25 years. Table 48 supplies breakdowns of these data for	These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistics in this table could, in some cases,

25 Years of Age Table 48 – Arrests, Cities, by Sex Table 49 – Arrests, Cities, by Race and Ethnicity		each offense and supplies a percent distribution of males and females arrested among all offense types. Table 49 provides the data by the race and ethnicity of the arrestee and the percent distribution of arrests by race for each offense. For population estimates, the FBI computed individual rates of growth from one year to the next for every city/town and county using the current decennial counts through the most recent population estimates available from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its most recent Census population estimate to derive the agency's current year population estimate.	represent multiple arrests of the same person. The totals provided in Table 49 reflect only those persons arrested by law enforcement agencies that provided race information to the UCR Program; therefore, the totals may not match those shown in other arrest tables for cities. Not all agencies that provide race data provide ethnicity data; therefore, numbers will not match.
Table 50 – Arrest Trends, Metropolitan Counties (2 year table) Table 51 – Arrest Trends, Metropolitan Counties, by Sex (2 year table)	The data used in creating these tables were from all metropolitan county law enforcement agencies submitting 12 months of arrest data for both previous and current years.	These 2-year trend tables provide the number of persons arrested in metropolitan counties in the previous and current years and the percent change when the data for these 2 years are compared. Table 50 furnishes a breakdown of these data by juveniles (persons under age 18) and adults. Table 51 furnishes a breakdown of these data by gender for juveniles. For population estimates, the FBI computed individual rates of growth from one year to the next for every city/town and county using the current decennial counts through the most recent population estimates available from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its most recent	These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistics in this table could, in some cases, represent multiple arrests of the same person.

		Census population estimate to derive the agency's current year population estimate.	
Table 52 – Arrests, Metropolitan Counties, by Age Table 53 – Arrests, Metropolitan Counties, Persons Under 15, 18, 21, and 25 Years of Age Table 54 – Arrests, Metropolitan Counties, by Sex Table 55 – Arrests, Metropolitan Counties, by Race and Ethnicity	The data used in creating these tables were from all metropolitan county law enforcement agencies submitting 12 months of arrest data for the year.	These tables provide the number of persons arrested in metropolitan counties for the offenses for which the UCR Program collects arrest data. The data in Table 52 are broken down by age of the arrestee and include the percent distribution of arrests by offense type. Table 53 supplies the number arrested within the following age groups: Under 15, Under 18, Under 21, and Under 25 years. Table 54 furnishes breakdowns of these data by gender for each offense and supplies a percent distribution of males and females arrested among all offense types. Table 55 furnishes a breakdown by race and ethnicity of the arrestee and the percent distribution of arrests by race for each offense. For population estimates, the FBI computed individual rates of growth from one year to the next for every city/town and county using the current decennial counts through the most recent population estimates available from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its most recent Census population estimate to derive the agency's current year population estimate.	These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistics in this table could, in some cases, represent multiple arrests of the same person. The totals provided in Table 55 reflect only those persons arrested by law enforcement agencies that provided race and ethnicity information to the UCR Program; therefore, the totals may not match those shown in other arrest tables for metropolitan counties.
Table 56 – Arrest Trends, Nonmetropolit	The data used in creating these tables were from all nonmetropolitan county	These 2-year trend tables provide the number of persons arrested in nonmetropolitan counties in in the previous and current years and the percent change	These data represent the number of persons arrested; however, some

an Counties (2 year table) Table 57 – Arrest Trends, Nonmetropolitan Counties, by Sex (2 year table)	law enforcement agencies submitting 12 months of arrest data for both the previous and current years.	when the data for these 2 years are compared. Table 56 furnishes a breakdown of these data by juveniles (persons under age 18) and adults. Table 57 furnishes a breakdown of these data by gender for juveniles. For population estimates, the FBI computed individual rates of growth from one year to the next for every city/town and county using the current decennial counts through the most recent population estimates available from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its most recent Census population estimate to derive the agency's current year population estimate.	persons may be arrested more than once during a year. Therefore, the statistics in this table could, in some cases, represent multiple arrests of the same person.
Table 58 – Arrests, Nonmetropolitan Counties, by Age Table 59 – Arrests, Nonmetropolitan Counties, Persons Under 15, 18, 21, and 25 Years of Age Table 60 – Arrests, Nonmetropolitan Counties, by	The data used in creating these tables were from all nonmetropolitan county law enforcement agencies submitting 12 months of arrest data for the year.	These tables provide the number of persons arrested in nonmetropolitan counties for the offenses for which the UCR Program collects arrest data. Table 58 supplies these data broken down by age of the arrestee and includes the percent distribution of arrests by offense type. Table 59 furnishes the number arrested within the following age groups: Under 15, Under 18, Under 21, and Under 25 years. Table 60 provides breakdowns of these data for each offense and supplies a percent distribution of males and females arrested among all offense types. Table 61 furnishes the data broken down by race and ethnicity of the arrestee and the percent distribution of arrests by race for each offense. For population estimates, the FBI computed individual rates of growth from one year to the next for every city/town and county using the current	These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistics in this table could, in some cases, represent multiple arrests of the same person. The totals provided in Table 61 reflect only those persons arrested by law enforcement agencies that provided race and ethnicity information to the UCR Program;

Sex Table 61 – Arrests, Nonmetropolitan Counties, by Race and Ethnicity		decennial counts through the most recent population estimates available from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its most recent Census population estimate to derive the agency's current year population estimate.	therefore, the totals may not match those shown in other arrest tables for nonmetropolitan counties.
Table 62 – Arrest Trends, Suburban Areas (2 year table) Table 63 – Arrest Trends, Suburban Areas, by Sex (2 year table)	The data used in creating these tables were from all suburban area law enforcement agencies submitting 12 months of arrest data for both previous and current years.	These 2-year trend tables provide the number of persons arrested in suburban areas for the previous and current years and the percent change when the data for these 2 years are compared. Table 62 furnishes a breakdown of these data by juveniles (persons under age 18) and adults. Table 63 furnishes a breakdown of those data by gender for juveniles. For population estimates, the FBI computed individual rates of growth from one year to the next for every city/town and county using the current decennial counts through the most recent population estimates available from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its most recent Census population estimate to derive the agency's current year population estimate.	These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistics in this table could, in some cases, represent multiple arrests of the same person.
Table 64 – Arrests, Suburban Areas, by Age Table 65 –	The data used in creating these tables were from all suburban area law enforcement agencies	These tables provide the number of arrests in suburban areas for the offenses for which the UCR Program collects arrest data. The data included in Table 64 are broken down by age of the arrestee and include the percent distribution of arrests by offense type. Table 65 provides the number arrested within	These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the

Arrests, Suburban Areas, Persons Under 15, 18, 21, and 25 Years of Age Table 66 – Arrests, Suburban Areas, by Sex Table 67 – Arrests, Suburban Areas, by Race and Ethnicity	submitting 12 months of arrest data for the year.	the following age groups: Under 15, Under 18, Under 21, and Under 25 years. Table 66 furnishes breakdowns for each offense and supplies a percent distribution of males and females arrested among all offense types. Table 67 furnishes the data broken down by race and ethnicity of the arrestee. In addition, the table shows the percent distribution of arrests by race for each offense. For population estimates, the FBI computed individual rates of growth from one year to the next for every city/town and county using the current decennial counts through the most recent population estimates available from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its most recent Census population estimate to derive the agency's current year population estimate.	statistics in this table could, in some cases, represent multiple arrests of the same person. The totals provided in Table 67 reflect only those persons arrested by law enforcement agencies that provided race and ethnicity information to the UCR Program; therefore, the totals may not match those shown in other arrest tables for suburban areas.
Table 68 – Police Disposition, Juvenile Offenders Taken into Custody	The data used in creating this table were from all law enforcement agencies submitting 12 months of arrest data for the year and providing juvenile disposition information.	The totals in this table represent the reported number of juvenile offenders taken into custody, aggregated by population group. In addition, this table provides the number of juveniles handled within six different disposition categories. The percent distribution within these categories for each population group is also included. For population estimates, the FBI computed individual rates of growth from one year to the next for every city/town and county using the current decennial counts through the most recent population estimates available from the U.S. Census Bureau. Each agency's rates of growth were averaged; that	These data represent the reported number of juvenile offenders taken into custody; however, some juveniles may be taken into custody more than once during a year. Therefore, the statistics in this table could, in some cases, represent multiple detentions of the same person.

		average was then applied and added to its most recent Census population estimate to derive the agency's current year population estimate.	In constructing this table, the FBI accepted each individual state's age definition for juveniles.
Table 69 – Arrests, by State	The data used in creating this table were from all law enforcement agencies that submitted 12 months of arrest data for the year.	This table provides arrest data for the offenses for which the UCR Program collects data and is broken down by state. The table provides both total arrests and arrests of juveniles (persons under the age of 18). Arrest totals are aggregates of the totals reported by agencies providing data to the UCR Program within each state. For population estimates, the FBI computed individual rates of growth from one year to the next for every city/town and county using the current decennial counts through the most recent population estimates available from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its most recent Census population estimate to derive the agency's current year population estimate.	These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistics in this table could, in some cases, represent multiple arrests of the same person. Any comparison of statistics in this table should take into consideration variances in arrest practices, particularly for Part II crimes. (*Offenses in Uniform Crime Reporting* defines the UCR Program's Part II offenses.)

Methodologies Explain Potential Differences in UCR Data

The Uniform Crime Reporting (UCR) Program is in the process of migrating its data releases from static web publications hosted on www.fbi.gov to more dynamic, multi-year displays of data on the Crime Data Explorer (CDE). Just as the data in the tables of the annual publications sometimes differ from those available in the master files for the same year, the data in the publication tables may also differ from those released on the Explorer Pages of the CDE. These variations are due to the difference in methodologies between the publication tables and data displayed on the CDE.

Historically, the agency, state, regional, and national data in Crime in the United States, Hate Crime Statistics, and Law Enforcement Officers Killed and Assaulted must pass internal data quality reviews prior to publication. According to the methodology, data that do not meet established criteria are not included in the publication tables. Individuals who typically use data from tables in Crime in the United States and other UCR web publications on www.fbi.gov will continue to have access to that format via the downloadable publication tables for 2020 and prior years.

As is the case with all the data files released for 1960 through 2020, the data displayed on the CDE include all reported data from agencies and entities aggregated from the agency data, such as states. According to methodology of typical open data websites, all reported data remain in file. Individuals who typically work with data files, such as the Master Files, can also access the CDE releases of data from 2020 and earlier for data based on the same quality methodology.

Starting with the release of 2021 data in calendar year 2022, the UCR Program will be consolidating its data quality review and management practices, which will reduce or eliminate potential differences between the two presentations going forward.

UCR Summary of
Reported Crimes in the Nation, 2024

Introduction

The FBI's Uniform Crime Reporting (UCR) Program provides a nationwide view of crime based on data submissions from law enforcement agencies throughout the country. The data submitted to various distinct collections, within the FBI's UCR Program, detail criminal incidents as well as law enforcement data. For decades, several of these compilations have been published annually. Though each collection presents details of crime or law enforcement data based on data provided by participating agencies, the reports vary in context, participation, and publication criteria.

"Reported Crimes in the Nation (RCN), 2024" includes data received from 16,675 law enforcement agencies that provided data through either the National Incident-Based Reporting System (NIBRS) or the Summary Reporting System (SRS).[1] These agencies represent 86.3% of agencies actively enrolled in the FBI's UCR Program and cover a combined population of 325,100,512 (95.6%) inhabitants. Notably, every city agency covering a population of 1,000,000 or more inhabitants contributed a full 12 months of data to the FBI's UCR Program in 2024.

Estimates based on data submitted by the participating agencies show the following nationwide year-to-year trends:[2]

Violent crime decreased an estimated 4.5% from 2023 to 2024

Property crime decreased an estimated 8.1% from 2023 to 2024

The number of agencies contributing NIBRS data to "RCN, 2024" increased by 562 agencies compared with the number of agencies that contributed NIBRS data to the previous year's "Crime in the Nation, 2023." In 2024, NIBRS data represented 75.5% of agencies actively enrolled in the FBI's UCR Program with a population coverage of 87.2%.

[1] Data included in "RCN, 2024" are as of April 2, 2025.

[2] These 2-year trends are the percentage change in estimated offenses between the calendar years of 2023 and 2024.

Table 1: Participation, 2023-2024

	2023 Volume	2023 Percentage	2024 Volume	2024 Percentage
NIBRS Agencies	14,039	73.2%	14,601	75.5%
NIBRS Population	278,449,430	83.1%	296,527,998	87.2%
SRS Agencies	2,295	12.0%	2,074	10.7%
SRS Population	37,312,250	11.1%	28,572,514	8.4%
Total Participating Agencies	16,334	85.2%	16,675	86.3%
Total Participating Population	315,761,680	94.3%	325,100,512	95.6%
Enrolled Agencies	19,169		19,328	
Enrolled Population	334,914,895		340,110,988	

"RCN, 2024" is comprised of the following components:

- "Crime in the United States (CIUS), 2024"
- "National Incident-Based Reporting System (NIBRS), 2024"
- "Hate Crime Statistics, 2024"
- "Law Enforcement Officers Killed and Assaulted (LEOKA), 2024"

Each of these components contains multiple distinct tables providing details on various facets of crime and law enforcement data submitted to the FBI's UCR Program. A description of each component's content and publication criteria is provided in the Appendix.

While the "NIBRS, 2024"; "Hate Crime Statistics, 2024"; and "LEOKA, 2024" publications provide data reported by law enforcement agencies, "CIUS, 2024" provides a combination of reported, estimated, and trended data. *Estimation* allows for the assessment of crime statistics representative of the entire United States population, including the population represented by agencies that did not provide complete information to the FBI's UCR Program. Another method of reviewing year-over-year changes in crime, "CIUS" trends also reflect *reported data* from agencies consistently supplying data over the comparative years.

The following synopsis incorporates data from each collection, and examines a variety of reported, estimated, and trended numbers published in "RCN, 2024."

Violent Crime

Violent crime consists of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Nationwide, from 2023 to 2024, the estimated volume of violent crime offenses showed the following changes:

Violent crime decreased an estimated 4.5%.

Murder and nonnegligent manslaughter decreased an estimated 14.9%.

Rape decreased an estimated 5.2%.

Robbery decreased an estimated 8.9%.

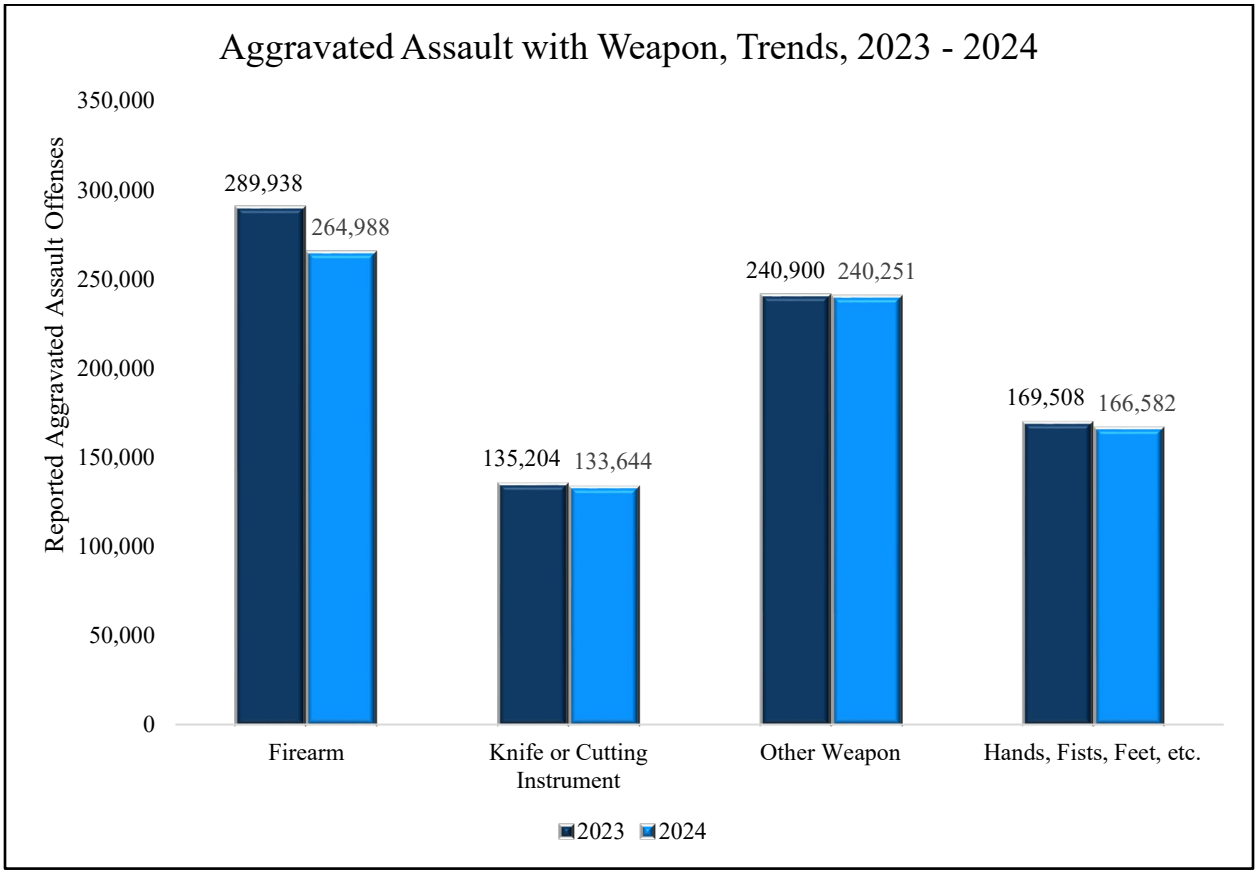

Aggravated assault decreased an estimated 3.0%.

An estimated 1,221,345 violent crime offenses were committed in 2024, indicating a rate of 359.1 violent crimes per 100,000 inhabitants, down from the 2023 estimated offense rate of 379.5 violent crimes per 100,000 inhabitants.[3] An estimated 419,423 arrests for violent crime offenses were made in 2024.

[3] The 2023 violent crime rate has been updated for inclusion in "CIUS, 2024."

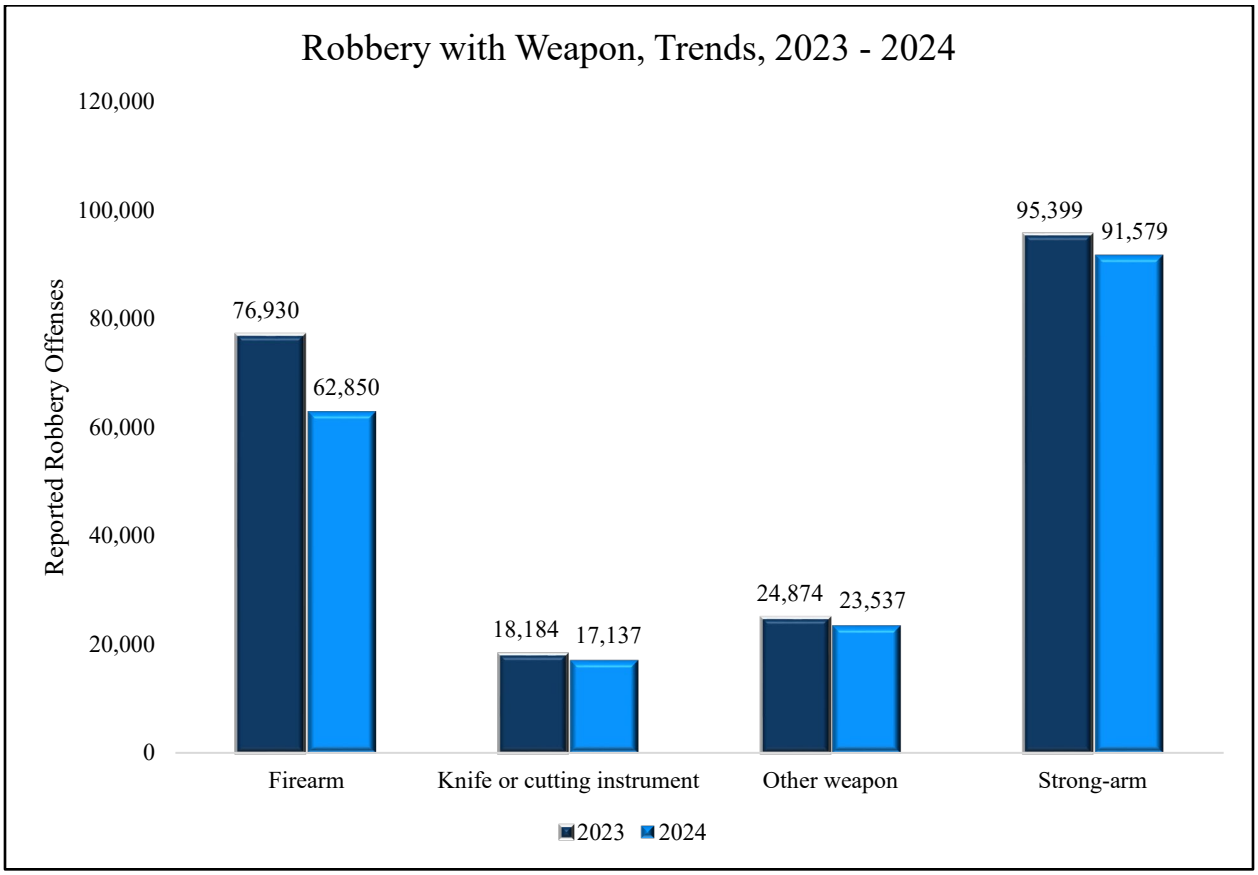

"CIUS, 2024" features trends developed from 15,060 agencies that submitted 6 or more common months of crime data to the FBI's UCR Program in 2023 and 2024, representing over 315 million inhabitants. These trends show that aggravated assault with a firearm decreased 8.6% from 289,938 reported offenses in 2023 to 264,988 reported offenses in 2024. Smaller decreases were observed for aggravated assaults with hands, fists, or feet (down 1.7%); knives or cutting instruments (down 1.2%); and other weapons (down 0.3%).

Figure 1

Trend data submitted by the referenced 15,060 agencies show firearm use in connection with robberies decreased 18.3%, from 76,930 offenses in 2023 to 62,850 offenses in 2024. Smaller decreases were observed for robberies involving knives or cutting instruments (down 5.8%), other weapons (down 5.4%), and strong-arm robbery (down 4.0%).

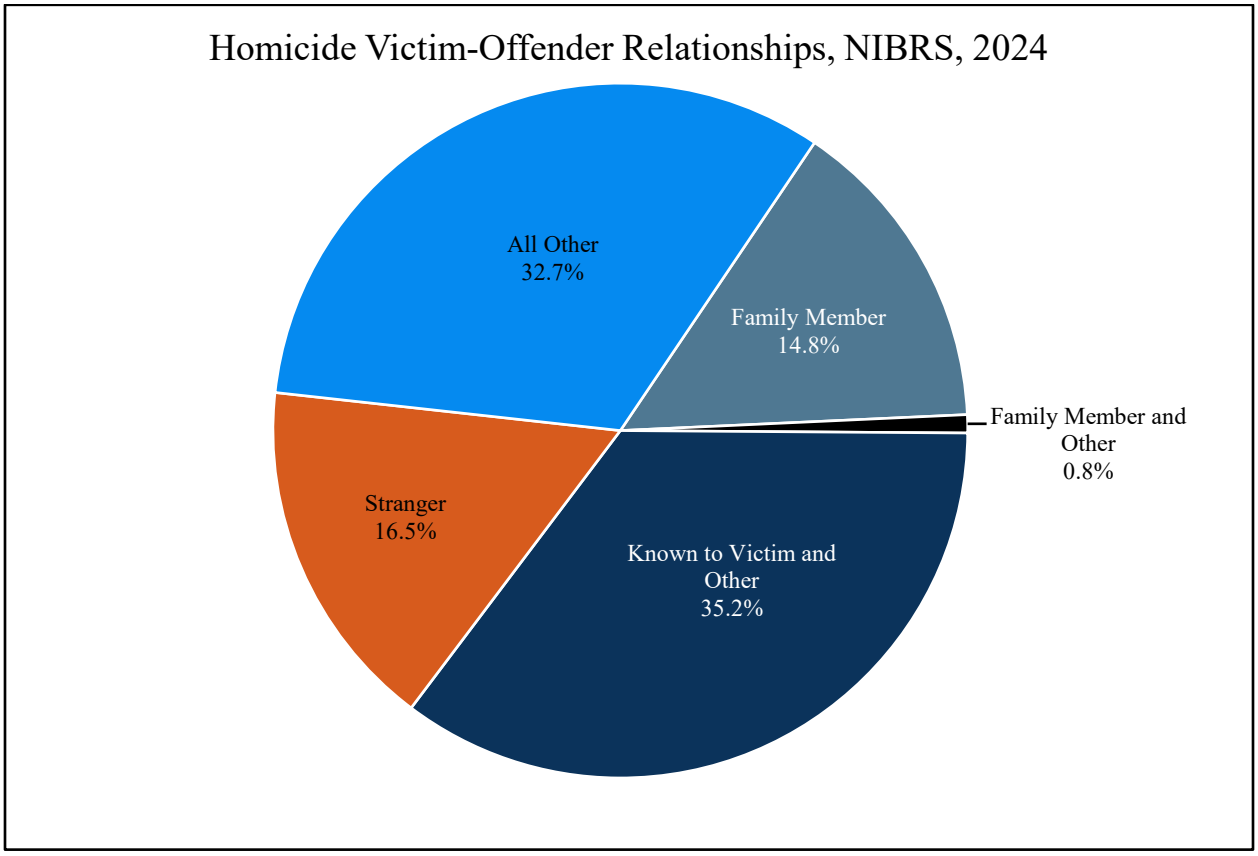

Figure 2

Law enforcement agencies reporting via NIBRS may report the relationship between victims and offenders for offenses where the victim is an individual or law enforcement officer. Although up to 10 relationship types may be reported per victim for each offense, the relationships of all offenders to a given victim are consolidated to 1 category for the following evaluation of victims (figures 3 through 6).[4]

In 2024, 35.2% of homicide[5] victims knew their offender(s) (or at least 1 offender when more than 1 was present) but were not related to them. NIBRS data also showed 16.5% of homicide victims were killed by a stranger, 14.8% by a family member, and 0.8% by a family member and at least 1 other offender who was not related to the victim. About one-third of homicide victims (32.7%) had relationships categorized as "all other," meaning the victim(s) did not see the offender to determine whether they knew them, was a mutual combatant of the offender, or had a combination of other undefined relationships with multiple offenders.

Figure 3

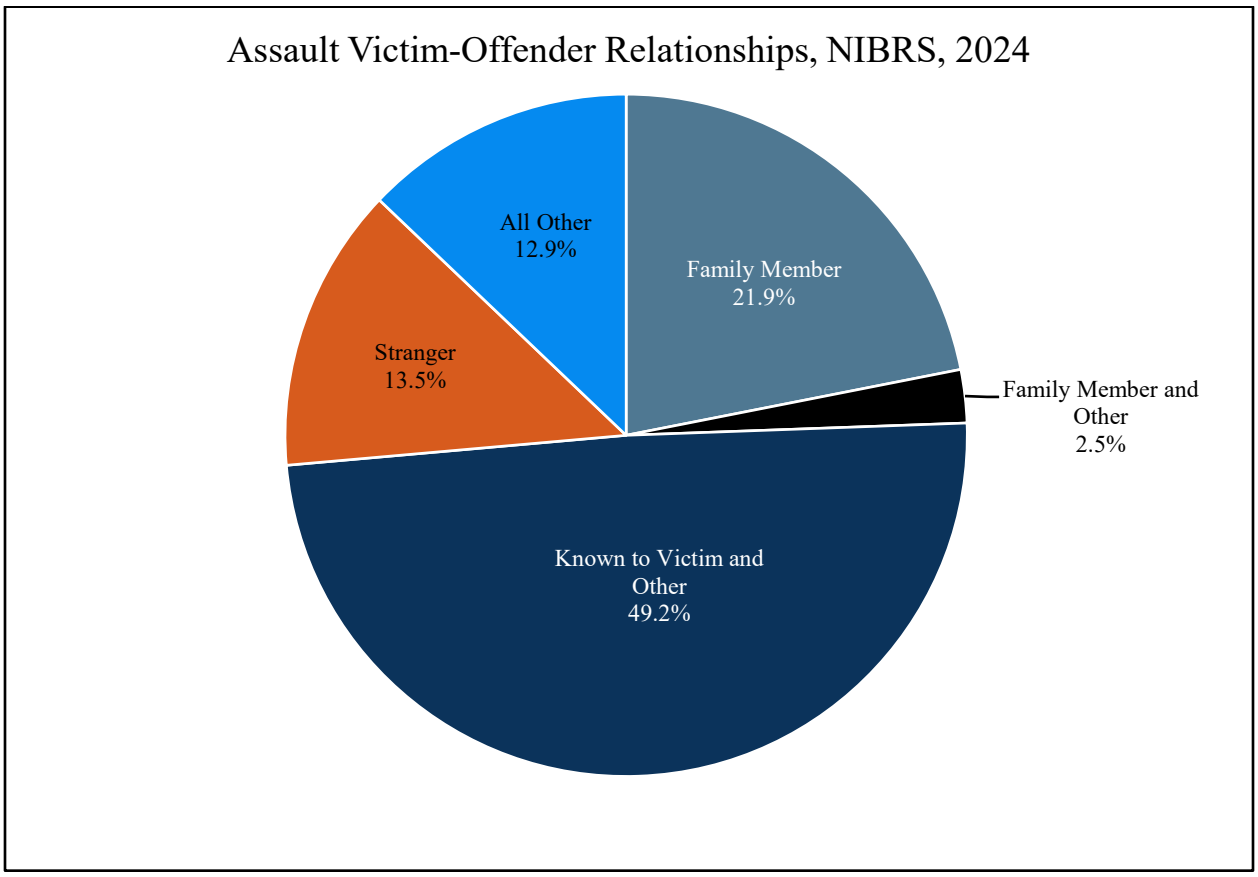

[4] For example, if a victim was murdered by the victim's brother and two acquaintances, the most personal relationship of the victim to his/her offenders is recognized, and the relationship is categorized as Family Member and Other. For further clarification, see NIBRS Table 16 methodology located in the Documents & Downloads section on the FBI's Crime Data Explorer (CDE) website.

[5] Homicide offenses include murder, nonnegligent manslaughter, and manslaughter by negligence.

Nearly half (49.2%) of assault victims[6] were assaulted by multiple offenders, at least 1 of whom was known to the victim but was not related to the victim. Over one-fifth (21.9%) of assault victims were assaulted by a family member, and 13.5% were assaulted by strangers.

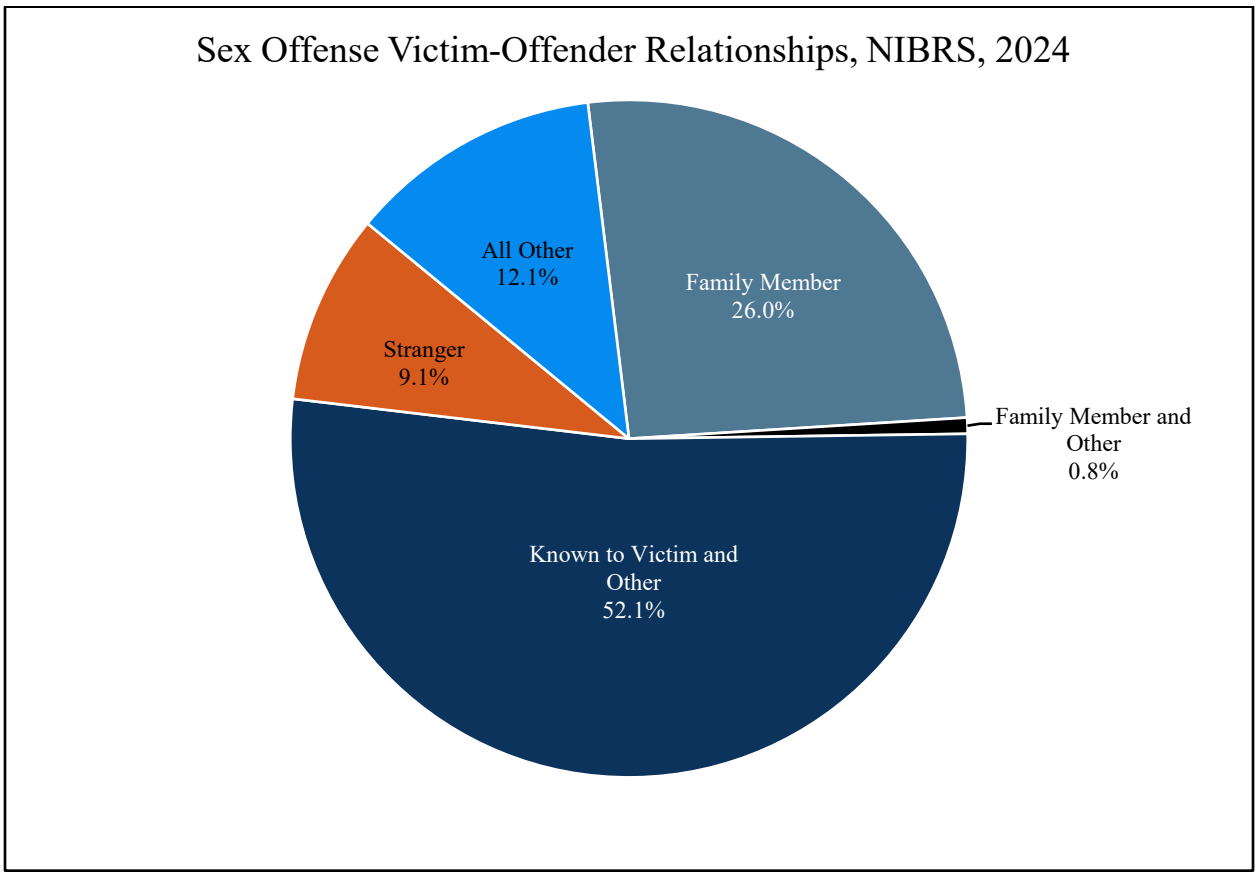

Figure 4

[6] Assault offenses include aggravated assault, simple assault, and intimidation.

The most common relationship reported by sex offense[7] victims was "known to victim and other" (52.1%), while more than one-quarter (26.0%) of sex offense victims reported a family member as the offender.

Figure 5

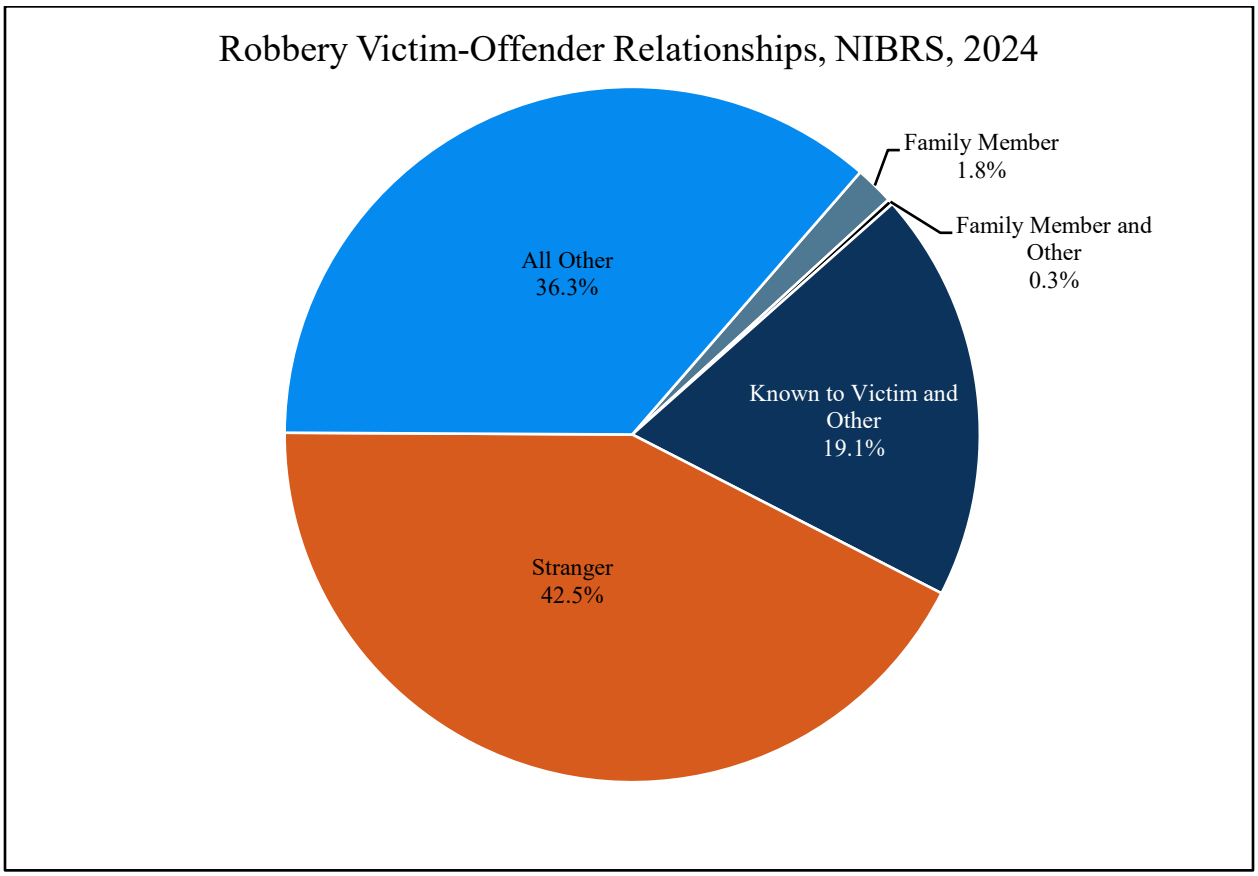

Due to rounding, the victim-offender relationship breakdowns percentages add to over 100%.

[7] Sex offenses include rape, sodomy, sexual assault with an object, criminal sexual contact, incest, and statutory rape.

Concerning robbery offenses submitted by NIBRS agencies, the most common relationship type reported by robbery victims in 2024 was stranger (42.5%).

Figure 6

Property Crime

Property crime consists of burglary, larceny-theft, and motor vehicle theft. Nationwide, from 2023 to 2024, the estimated volume of property crime offenses showed the following changes:

Property crime decreased an estimated 8.1%.

Burglary decreased an estimated 8.6%.

Larceny-theft decreased an estimated 5.5%.

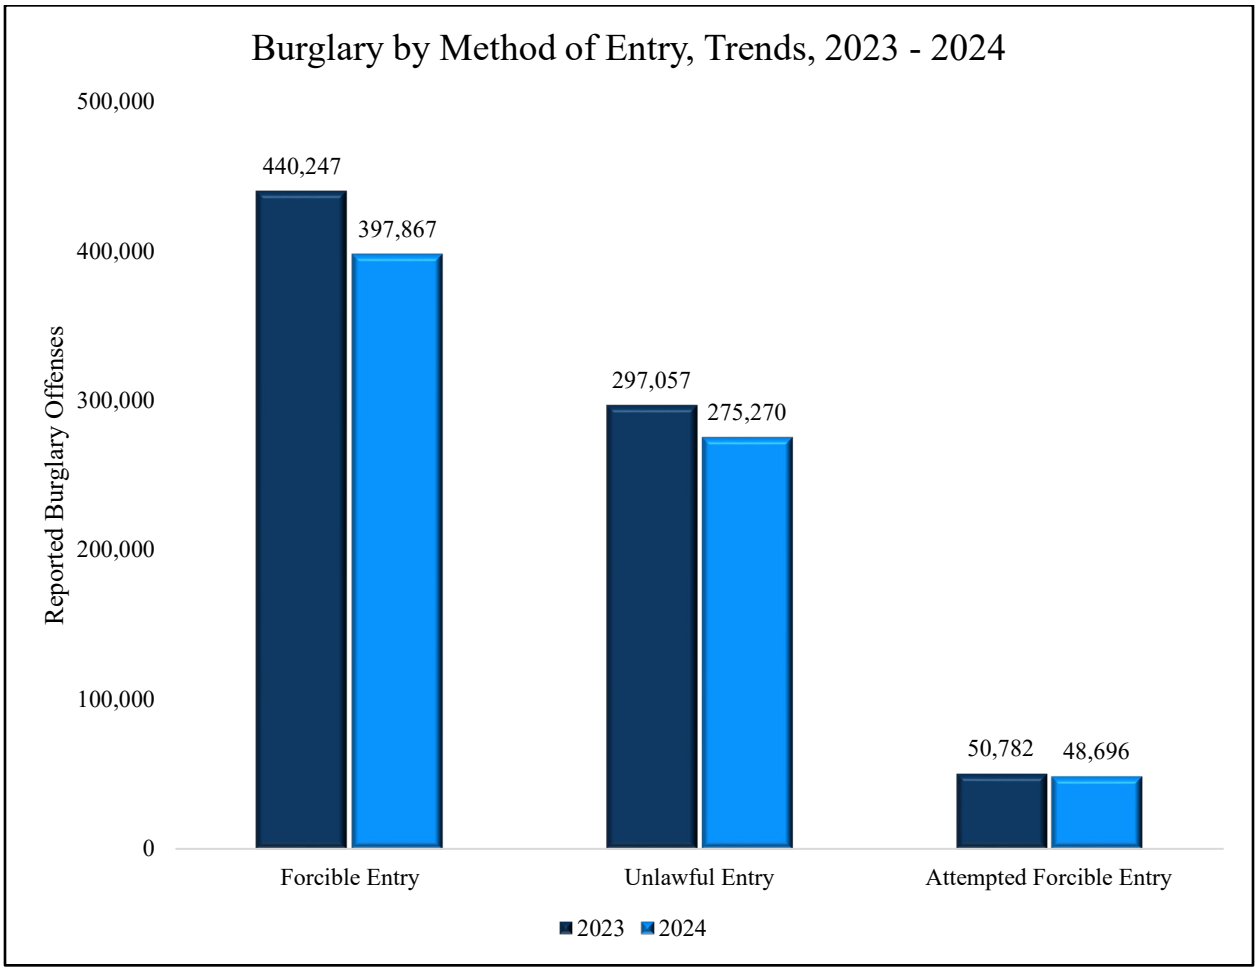

Motor vehicle theft decreased an estimated 18.6%.

An estimated 5,986,400 property crime offenses were committed in 2024, indicating an offense rate of 1,760.1 property crimes per 100,000 inhabitants, down from the 2023 estimated offense rate of 1,934.1 property crimes per 100,000 inhabitants.[8] An estimated 910,654 arrests for property crime offenses were made in 2024.

[8] The 2023 property crime rate has been updated for inclusion in "CIUS, 2024."

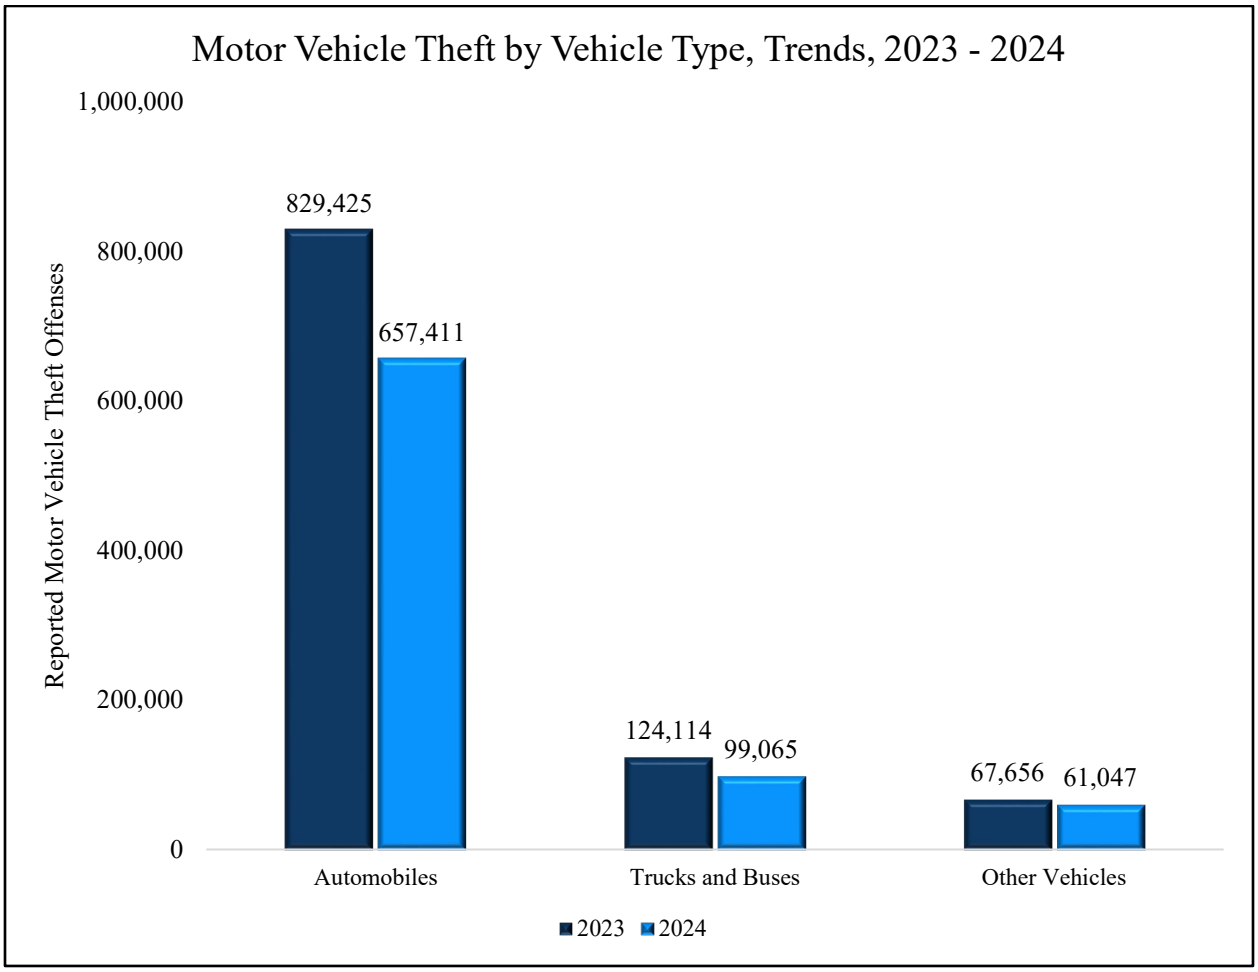

Each burglary method of entry—forcible entry, attempted forcible entry, and unlawful entry—decreased between 4.1% and 9.6% from 2023 to 2024, based on data reported by 15,060 agencies. The same agencies reported forcible entry as the most common method of entry in burglary offenses in both 2023 and 2024.

Figure 7

Motor vehicle thefts involving automobiles—the most common type of motor vehicle theft compared to those involving trucks, buses, and other vehicles—decreased more than 20% from 829,425 in 2023, to 657,411 in 2024, based on offenses reported by 15,060 agencies. A comparison of data for the same agencies showed a 20.2% decrease in motor vehicle thefts involving trucks and buses and a 9.8% decrease in motor vehicle thefts involving other vehicles from 2023 to 2024.

Figure 8

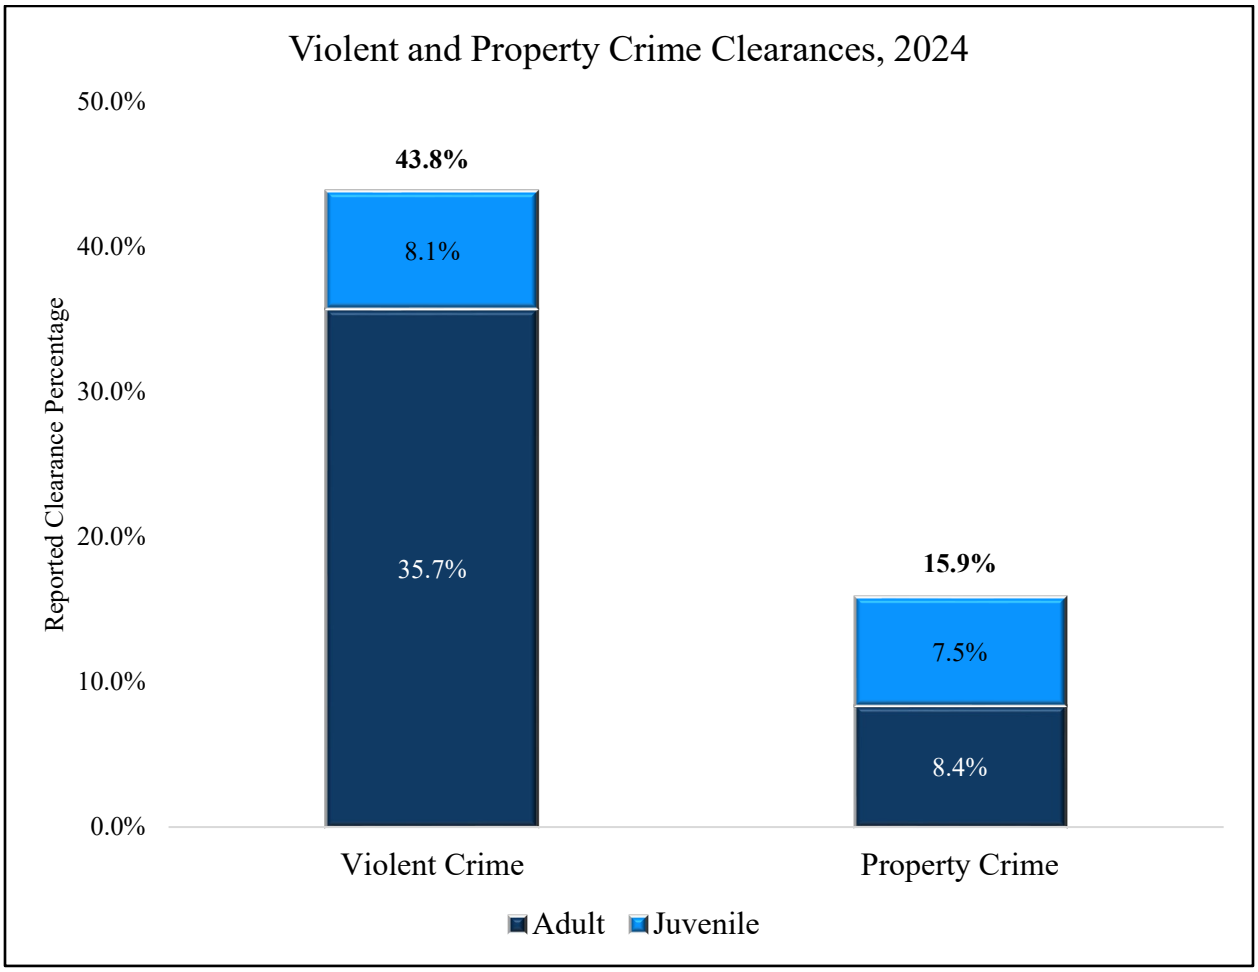

Clearances and Arrests

In 2024, law enforcement agencies cleared 43.8% of reported violent crimes by arrest or exceptional means. In addition, 15.9% of reported property crimes were cleared by arrest or exceptional means in 2024.

Of the proportion of violent crime offenses cleared by law enforcement in 2024, 8.1% involved solely juvenile offenders under the age of 18. In addition, 7.5% of cleared property crime offenses involved only juvenile offenders during that year.[9]

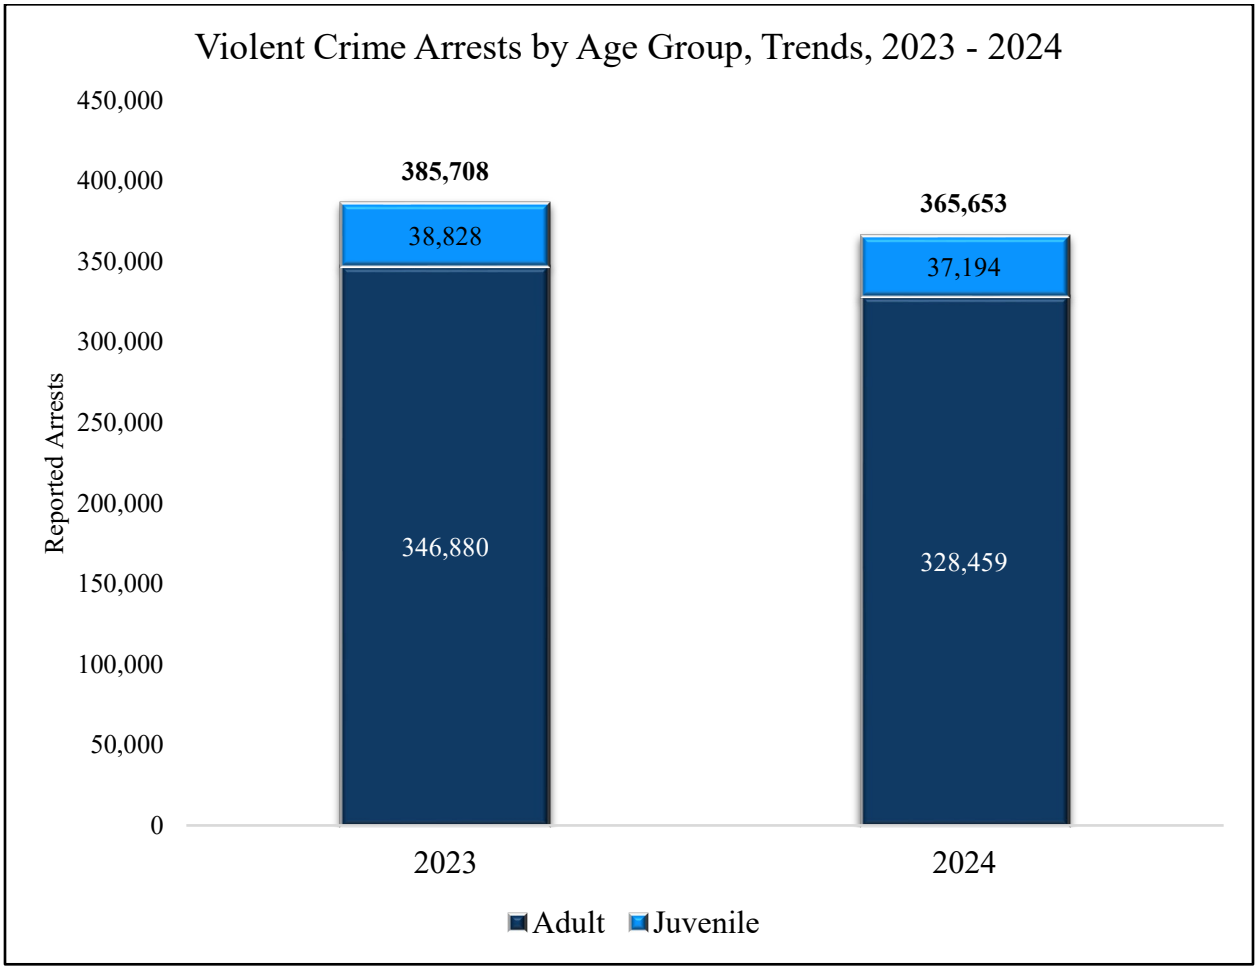

Figure 9

[9] When clearances involve both juvenile and adult offenders, those incidents are classified as clearances for crimes committed by adults.

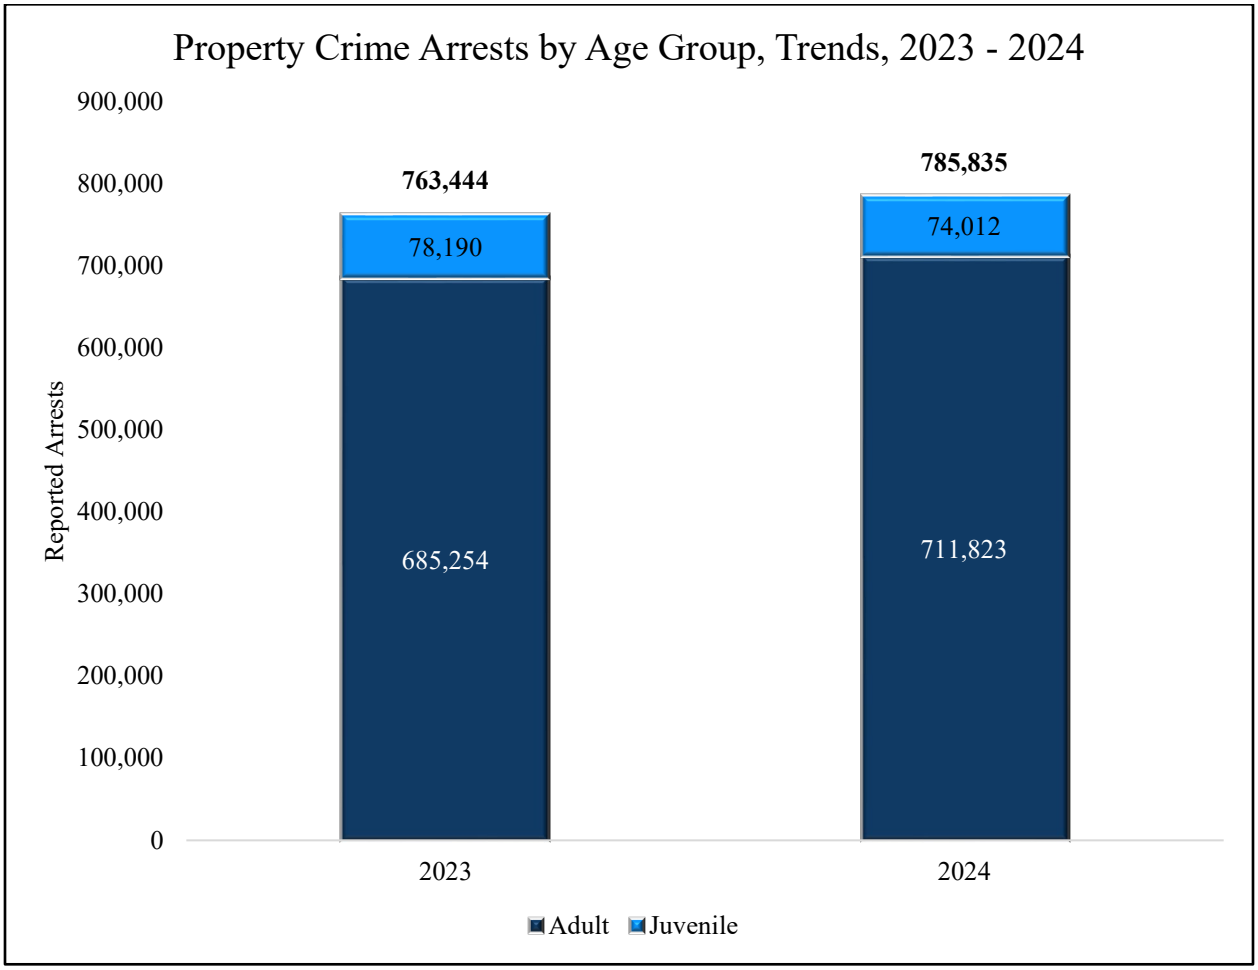

Year-to-year arrest trends were calculated based on data submitted by the 12,342 agencies that submitted 12 months of arrest data for both 2023 and 2024. Based on these trends, the reported volume of juvenile violent crime arrestees under the age of 18 decreased 4.2% from 38,828 in 2023, to 37,194 in 2024. The reported volume of adult violent crime arrestees aged 18 years or older decreased 5.3% in 2024 compared with the reported volume of the previous year.

Figure 10

Year-to-year arrest trends were calculated based on data submitted by the 12,342 agencies that submitted 12 months of arrest data for both 2023 and 2024. Based on these trends, the reported volume of juvenile property crime arrestees under the age of 18 decreased 5.3% from 78,190 in 2023, to 74,012 in 2024. The reported volume of adult property crime arrestees aged 18 years or older increased 3.9% in 2024 compared with the reported volume of the previous year.

Figure 11

Crime Trends by Population Group

Crime trends developed from agencies reporting 6 or more common months of data to the FBI's UCR Program in 2023 and 2024 mostly mirrored the estimated decreases in nationwide violent crime offenses. Metropolitan county agencies showed the largest decrease (6.5%) in overall violent crime in 2024. No population group designated within "CIUS, 2024" showed an increase in the year-to-year violent crime trend.

Trends from each population group recorded decreases for all violent crime offenses. City agencies of 1,000,000 or more inhabitants showed the largest decrease in murder (19.1%). Agencies of 50,000 to 99,999 showed the largest decrease in robbery offenses (10.5%). Nonmetropolitan counties showed the largest decrease in rape offenses (9.1%), while metropolitan counties had the largest decrease (6.3%) in aggravated assault offenses.

Table 2: Violent Crime by Population Group, Trends, 2023–2024

Agency	Violent Crime	Murder	Rape	Robbery	Aggravated Assault
City agencies 1,000,000+	-4.2	-19.1	-5.7	-9.8	-1.0
City agencies 500,000 to 999,999	-5.7	-18.3	-6.4	-10.0	-4.0
City agencies 250,000 to 499,999	-6.1	-8.6	-8.6	-7.1	-5.4
City agencies 100,000 to 249,999	-4.2	-17.4	-4.3	-9.4	-2.6
City agencies 50,000 to 99,999	-4.2	-10.9	-4.0	-10.5	-2.5
City agencies 25,000 to 49,999	-3.4	-12.1	-2.1	-7.3	-2.7
City agencies 10,000 to 24,999	-5.4	-16.7	-8.0	-9.8	-3.9
City agencies under 10,000	-5.0	-19.0	-6.1	-10.3	-3.8
Metropolitan counties	-6.5	-10.7	-4.3	-9.8	-6.3
Nonmetropolitan counties	-4.6	-16.0	-9.1	-7.9	-3.1
Suburban areas	-5.7	-12.4	-4.3	-9.4	-5.1

Nationwide estimates of all property crime offenses decreased for 2024 compared to those for 2023; trends from agencies reporting 6 or more common months of data show similar decreases. Overall property crime decreased in all city population groups, largely driven by considerable decreases in motor vehicle theft, which declined in these population groups between 16.2% and 26.9%. Burglary offenses in each population group declined from 2023 to 2024, with the largest drop (11.9%) observed for nonmetropolitan counties.

Table 3: Property Crime by Population Group, Trends, 2023–2024

Agency	Property Crime	Burglary	Larceny-theft	Motor vehicle theft
City agencies 1,000,000+	-10.5	-4.1	-6.2	-26.9
City agencies 500,000 to 999,999	-8.4	-5.5	-4.9	-19.0
City agencies 250,000 to 499,999	-10.6	-9.2	-6.7	-22.8
City agencies 100,000 to 249,999	-7.3	-8.4	-4.8	-17.1
City agencies 50,000 to 99,999	-8.3	-10.5	-5.7	-19.8
City agencies 25,000 to 49,999	-7.4	-8.9	-5.6	-18.2
City agencies 10,000 to 24,999	-8.2	-9.7	-6.6	-18.0
City agencies under 10,000	-8.6	-10.5	-7.1	-16.2
Metropolitan counties	-9.5	-9.1	-8.1	-16.2
Nonmetropolitan counties	-10.9	-11.9	-10.2	-12.7
Suburban areas	-8.4	-8.8	-6.8	-16.7

Hate Crime

The following information from "Hate Crime Statistics, 2024," reflects data received from 84.9% of agencies actively enrolled in the FBI's UCR Program with a population coverage of 95.1%.

Table 4: Hate Crime Statistics Participation, 2023–2024

	2023 Volume	2023 Percentage	2024 Volume	2024 Percentage
Agencies Submitting Hate Crime Data	16,009	83.5%	16,419	84.9%
Population Covered by Agencies Submitting Hate Crime Data	318,788,491	95.2%	323,341,545	95.1%
Enrolled Agencies	19,169		19,328	
Enrolled Population	334,914,895		340,110,988	

Data from agencies submitting at least 1 hate crime incident report or Zero Report[10] are included in "Hate Crime Statistics, 2024." This data publication, therefore, does not necessarily represent reports for all 12 months (or 4 quarters) of the calendar year from every participating agency.

[10] A Zero Report for hate crime is reported by an agency to indicate that no hate crimes occurred in their jurisdiction. Zero Reports can be submitted monthly in NIBRS and quarterly in SRS. Zero Reports are necessary to distinguish when an agency fails to report to the FBI's UCR program from when an agency has no hate crimes occur.

Considering all reported hate crime data in 2023 and 2024, regardless of the number of months or quarters submitted by law enforcement agencies, the number of hate crime incidents decreased from 11,862 to 11,679, offenses decreased from 13,829 to 13,683, and victims decreased from 14,416 to 14,243. The number of known offenders increased from 9,739 to 10,096.

Figure 12

Two-Year Hate Crime Trend, 2023 - 2024

To determine a meaningful national trend, the FBI's UCR Program created a dataset that includes the hate crime incidents and Zero Reports submitted by agencies reporting 6 or more common months of hate crime data to the FBI's UCR Program for both 2023 and 2024. According to this dataset, reported hate crime incidents decreased 1.5% from 11,041 in 2023, to 10,873 in 2024.

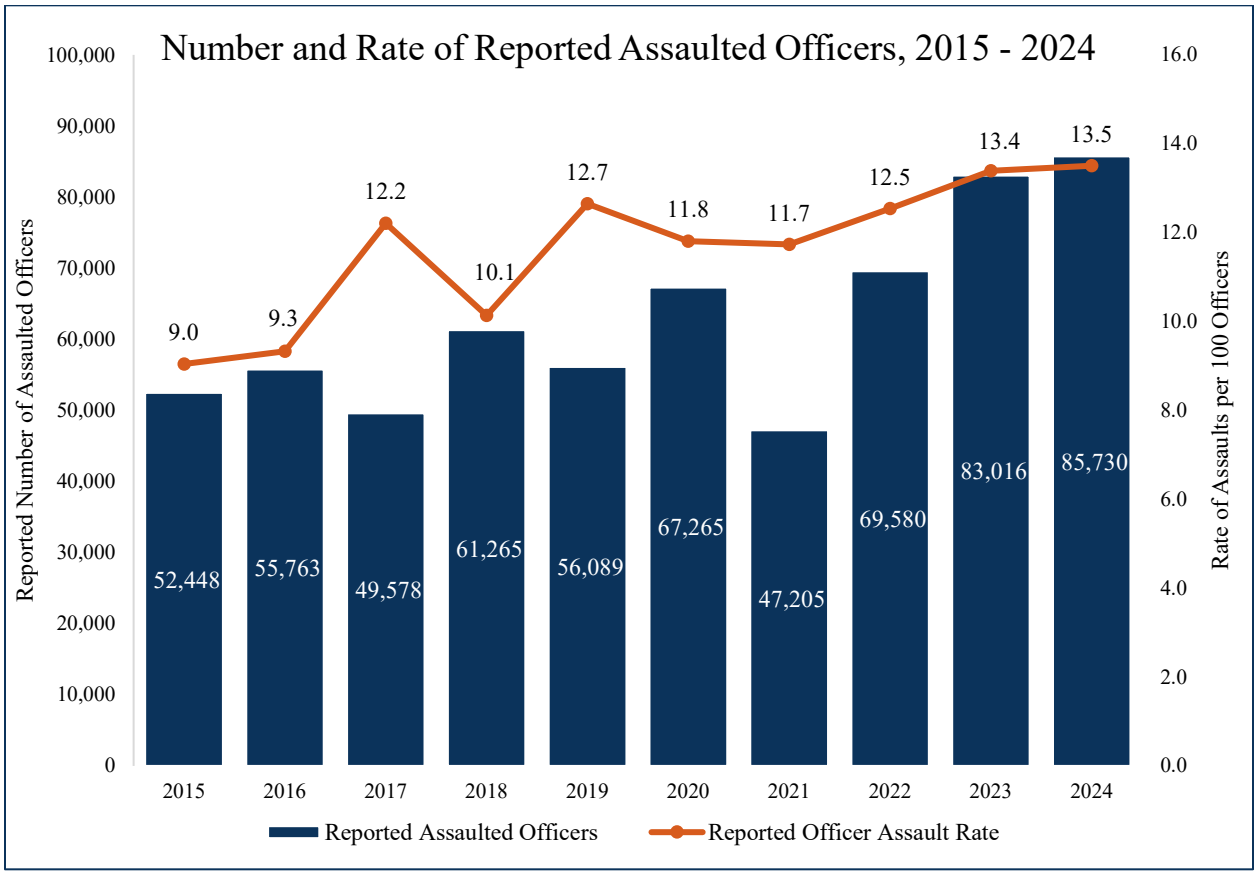

An overall comparative year-to-year decrease in reported hate crime may not reflect changes among individual hate crime biases. Data provided in this year's "Hate Crime Statistics, 2024" and last year's "Hate Crime Statistics, 2023" can be reviewed to observe how the number of reported hate crime incidents, offenses, victims, and known offenders fluctuated for each distinct bias type.

Law Enforcement Officers Killed and Assaulted (LEOKA)

In 2024, 64 officers were feloniously killed in the line of duty. A total of 61 offenders were reported in connection with these felonious killings. Firearms were involved in 46 of the 64 felonious deaths. During the same year, 43 officers were accidentally killed while on duty, most of whom died due to motor vehicle-related injuries.

In 2024, reported LEOKA assaults ─ which include aggravated and simple assault offenses ─ reached a 10-year high with 85,730 officers assaulted in the line of duty.

Figure 13

Most (77.3%) victim officers were assaulted with personal weapons, 4.0% were assaulted with firearms, and 1.9% were assaulted with knives or other cutting instruments; 16.8% were assaulted with weapons classified as other dangerous weapons. Officers were most commonly assaulted while responding to disturbance calls (26.7%).

For further LEOKA analyses, refer to the May 2025 special report "Officers Killed and Assaulted in the Line of Duty, 2024," which is located on the FBI's Crime Data Explorer (CDE) website at cde.ucr.cjis.gov.

Select Statistics from "Reported Crimes in the Nation (RCN), 2024"

The following topics were determined to be of interest due to public inquiries received by the FBI's UCR Program.

- University/College Agencies
  - In 2024, 685 university/college agencies with over 10,000,000 enrolled students reported 2,972 violent crime offenses, including 5 murders, 1,119 rapes, 342 robberies, and 1,506 aggravated assaults.
  - Property crime reported by the 685 university/college agencies totaled 47,113 offenses, including 3,298 burglaries, 38,375 larceny-thefts, and 5,440 motor vehicle thefts.
- Tribal Agencies
  - In 2024, 140 tribal agencies reported 2,646 violent crime offenses, including 34 murders, 246 rapes, 107 robberies, and 2,259 aggravated assaults.
  - Property crime reported by the 140 tribal agencies totaled 7,469 offenses, including 1,269 burglaries, 5,213 larceny-thefts, and 987 motor vehicle thefts.
- Drug Types
  - The most frequent specified drug types (i.e., excluding those drug types described as "Other") seized in connection with drug/narcotic violations in 2024 were marijuana (seized in 386,540 incidents), meth/amphetamines (seized in 322,279 incidents), and cocaine (seized in 78,248 incidents).
- Human Trafficking
  - A total of 3,702 human trafficking offenses were reported in 2024.
  - Over three-quarters (2,914) were classified as commercial sex acts, and 783 were classified as involuntary servitude.[11]
- Fraud Offenses
  - Nearly one million (967,387) victims were reported in connection with 891,661 fraud offenses in 2024.
- Police Employees
  - Nationwide in 2024, an average of 2.3 law enforcement officers were employed per 1,000 inhabitants.

[11] Puerto Rico submitted 5 human trafficking offenses without classification.

Extended-Year Violent and Property Crime Trends, 2005-2024

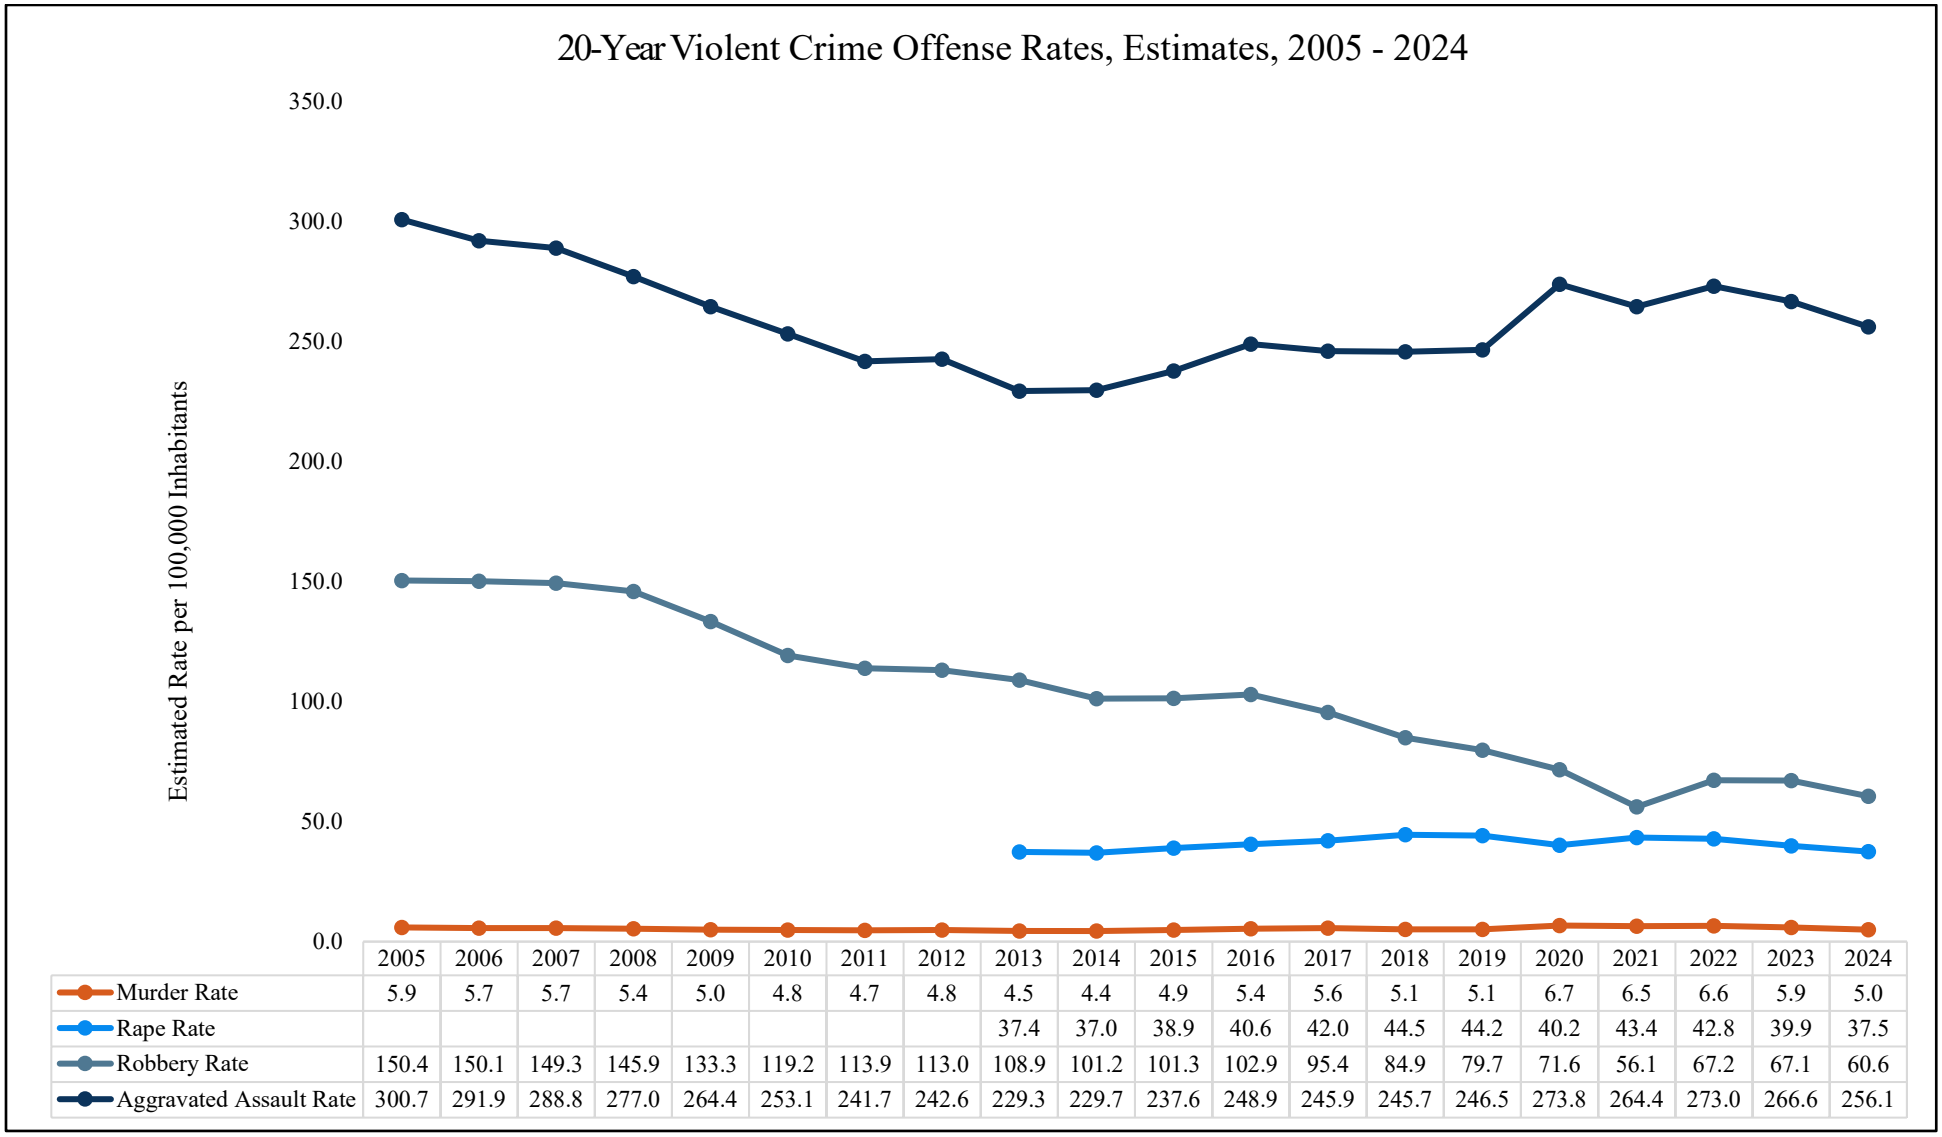

Figure 14 shows 20-calendar-year trends in estimated violent crime rates per 100,000 inhabitants from 2005 to 2024. Rates of murder and nonnegligent manslaughter range from a 20-year low of 4.4 offenses per 100,000 inhabitants in 2014 to a high of 6.7 offenses per 100,000 inhabitants in 2020. Estimated rates during the 3 years from 2020 through 2022 were an average of 6.6 murders per 100,000 inhabitants per year, while the most recent 2024 estimate of 5.0 murders per 100,000 inhabitants returned to a rate closer to the 5.1 murders per 100,000 inhabitants estimated in 2019.

Considering the estimated rape offense rates shown in Figure 14, a full 20-year trend comparison for this offense is unavailable due to changes in the FBI's UCR Program's definition of rape in 2013.[12] In 2024, the estimated rape offense rate was 37.5 per 100,000 inhabitants. Although higher than estimated rape offense rates in 2013 and 2014—37.4 and 37.0 per 100,000 inhabitants, respectively—the estimated rape rate in 2024 constituted a 6.1% decrease from the previous year of 2023, and a 6.7% decrease from 5 years prior in 2020.

Robbery rates have dropped nearly every year since 2005, with the estimated 60.6 offenses per 100,000 inhabitants in 2024 among the lowest rates in the last 20 years. Aggravated assault rates decreased each year from 2005 to 2011. While lower than recent years, the estimated 256.1 aggravated assault offenses per 100,000 inhabitants in 2024 is higher than each year's estimated rate from 2010 through 2019.

[12] In 2013, the FBI's UCR Program initiated the collection of rape data under a revised definition. The term "forcible" was removed from the offense name, and the definition was changed to "penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim."

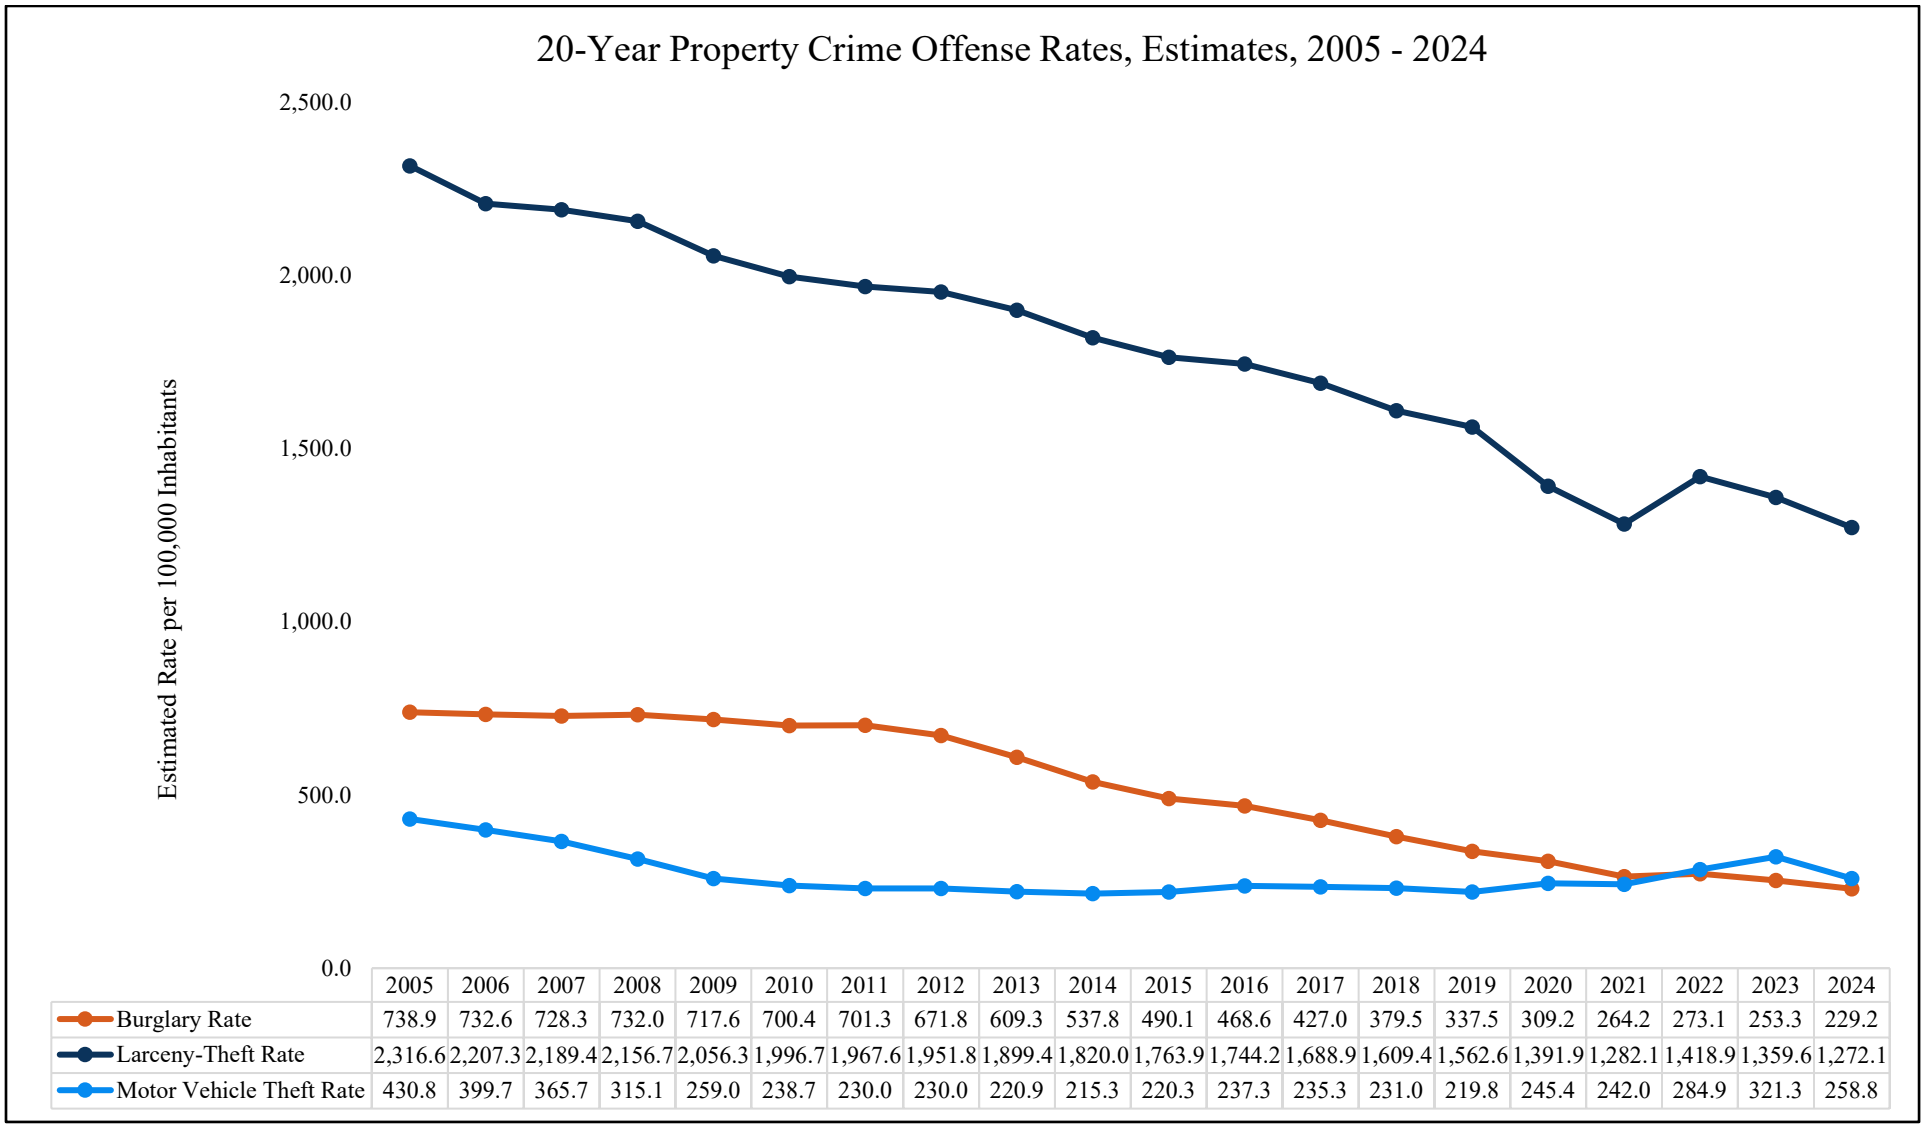

Figure 14

	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024

Figure 15 shows 20-calendar-year trends in property crime rates per 100,000 inhabitants from 2005 to 2024. Burglary and larceny-theft rates have each decreased nearly every year since 2005, with few exceptions. In 2023, the estimated number of motor vehicle thefts exceeded 1,000,000 offenses for the first time since 2007, exhibiting a rate of 321.3 offenses per 100,000 inhabitants. In 2024, the estimated motor vehicle theft rate dropped 19.4% compared with the previous year, though it remains higher than the estimated motor vehicle theft rates from 2010 through 2021.

Figure 15

	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024

A 5-year analysis of estimated figures for robbery locations revealed the most common locations for robberies to occur are on streets/highways.[13] In 2023 and 2024, nearly one-third of all robbery locations fell into this category. In 2020 and 2021, the second and third highest specified robbery locations were residences and commercial houses,[14] respectively. From 2022 to 2024, the second and third highest specified robbery locations switched to commercial house and residence, respectively.

The FBI's UCR Program receives data on specific types of reported larceny-thefts. From 2020 through 2022, larceny-theft from motor vehicles and shoplifting were estimated to be the first and second most common specified larceny-theft types, respectively (excluding larceny-thefts designated as "all other"). In 2023 and 2024, shoplifting surpassed larceny-theft from motor vehicles as the most common specified larceny-theft type.

[13] Street/highway—includes highways, roads, streets, alleys, or sidewalks.

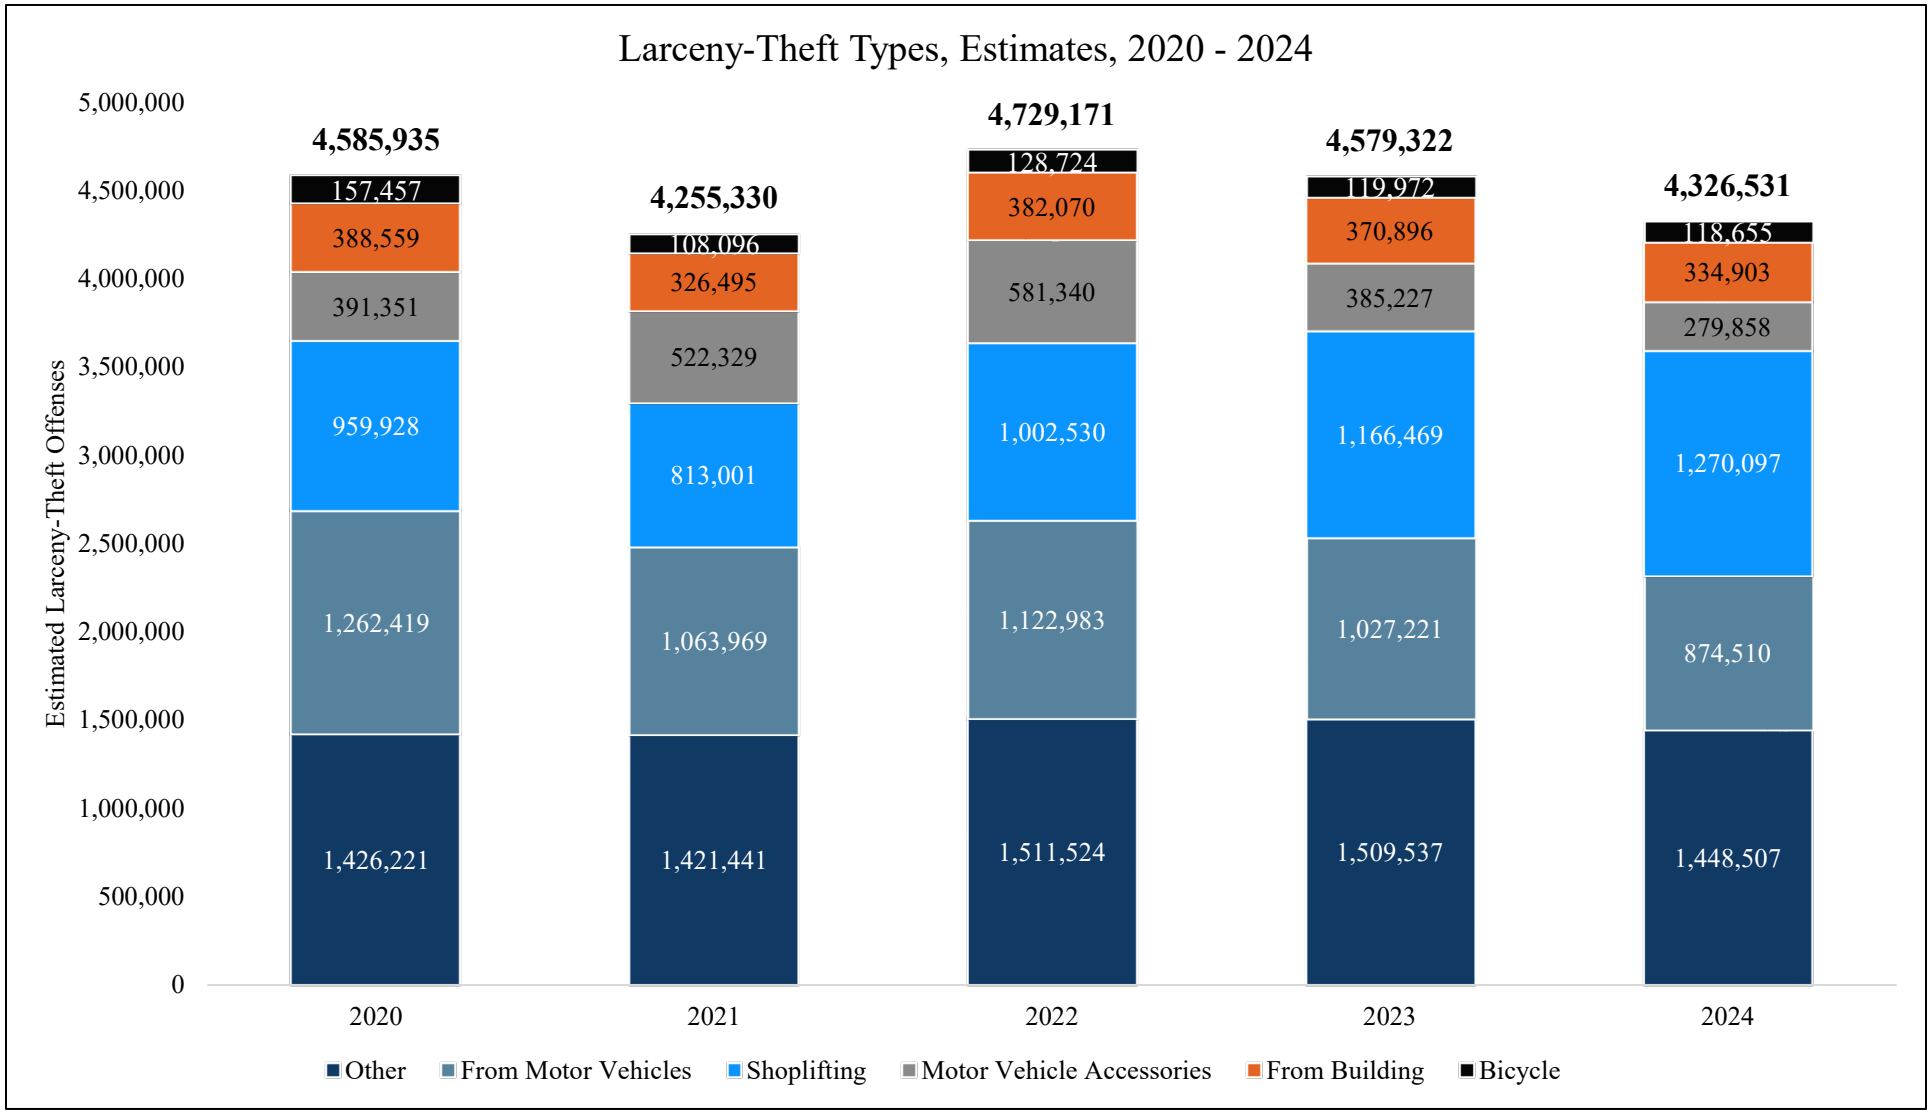

[14] Commercial house—includes commercial establishments, such as payday lenders, supermarkets, department stores, restaurants, taverns, finance companies, motels, and hotels. Gas stations, convenience stores, and banking institutions are excluded because separate categories for each are provided.

Figure 16

Note: Due to rounding, the sum of the offenses may not add to the total.

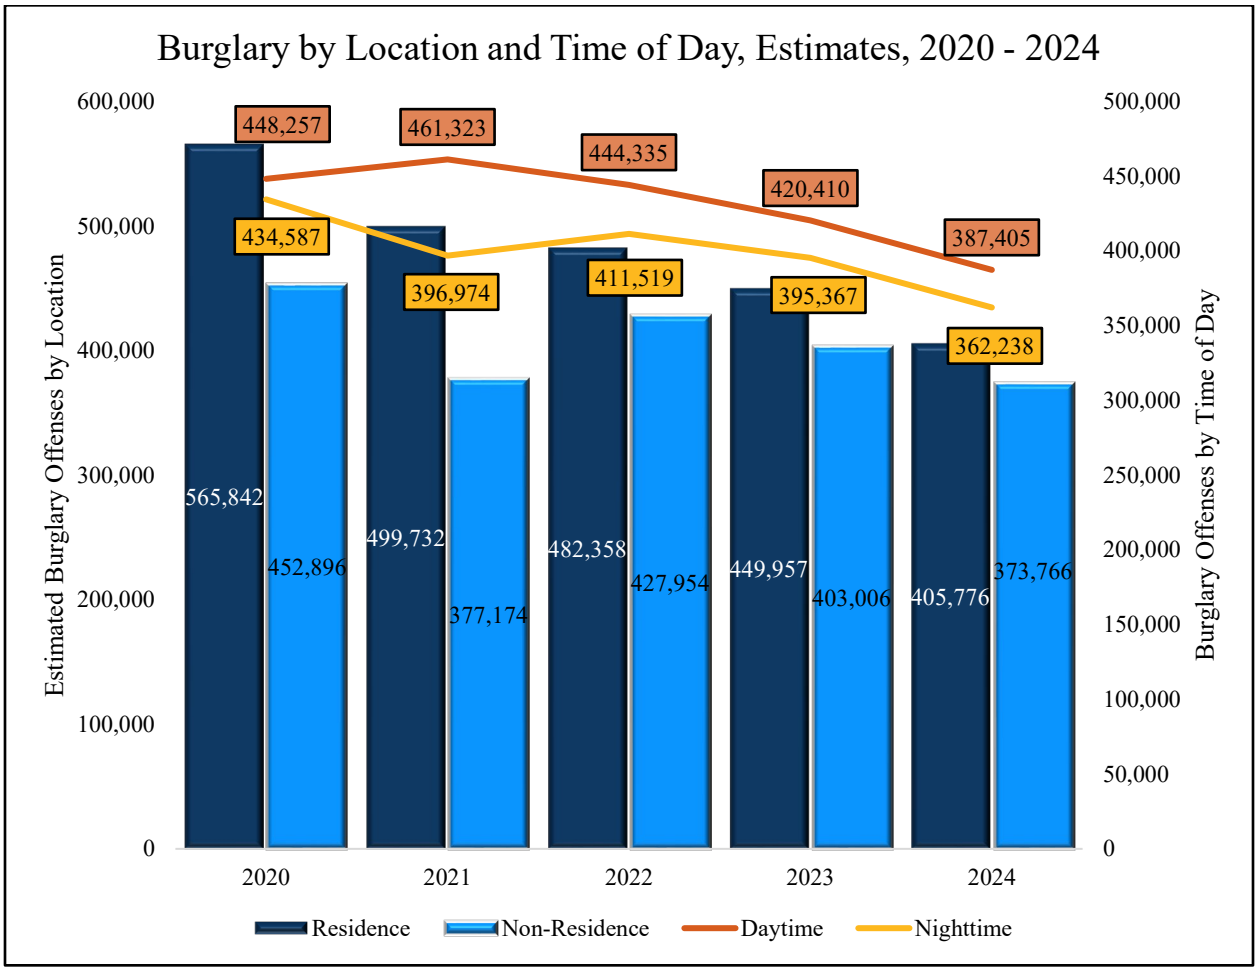

Figure 17

Note: Due to rounding, the sum of the offenses may not add to the total.

Burglaries occurring in residence locations decreased each year from an estimated 565,842 offenses in 2020, to an estimated 405,776 in 2024. Burglaries occurring in non-residence locations, e.g., stores and offices, fluctuated over the past 5 years from an estimated 452,896 offenses in 2020, to an estimated 373,766 in 2024.

Figure 18

Differences in Crime Measures

Information provided in "RCN, 2024" may not be directly comparable to material provided by other organizations that collect or publish data using other methodologies.

Each component of "RCN, 2024" was compiled from law enforcement data submitted to the FBI's UCR Program. Except for select "CIUS" estimation tables, which are approximations based on data provided by law enforcement agencies, "RCN, 2024" shows data *reported by law enforcement*. To ensure the consistency and comparability of data, the FBI's UCR program requires the reported data to conform to certain submission standards, definitions, and specifications. Consequently, entities collecting crime data through different means and applying different methodologies may report volumes or statistics that are not equivalent to those published in "RCN, 2024."

The FBI has consistently used estimation techniques to generate annual crime statistics reports. Estimation allows for the reporting of crime statistics representative of the entire population, including the population represented by agencies that did not provide complete information to the FBI's UCR Program. Produced for decades, "CIUS" estimations are based on a combination of aggregated SRS data, wherein only the one most serious offense within a criminal incident is counted, and detailed NIBRS data converted to SRS. First published in "Crime in the Nation, 2021," the newer NIBRS-only estimates are based exclusively on data submitted through NIBRS. Both collections are *estimates* and should be viewed as analogous measures, rather than as one being more accurate than the other.

In addition to data published by the FBI's UCR Program, the U.S. Department of Justice administers other statistical programs to measure the impact of nationwide crime. Estimates based on NIBRS-only data will be available through the Bureau of Justice Statistics (BJS) this year in "Crime Known to Law Enforcement, 2024: NIBRS Estimation Program." This report will produce valuable information about aspects of crime occurring nationwide and should be viewed as complementary to "RCN, 2024."

Also available through BJS, the National Crime Victimization Survey (NCVS) collects information on crimes experienced by individuals and households *whether or not those crimes were reported to law enforcement*. There are several differences between BJS's NCVS and data published by the FBI's UCR Program, and each program has unique strengths. Together, they can provide a greater understanding of crime trends in the United States.

Appendix: Collection Summaries

"Crime in the United States (CIUS), 2024"

For more than 90 years, the FBI has published crime data reported by law enforcement. A long running source of published data, the "CIUS" report contains a compilation of the volume and rate of violent and property crime offenses for the nation by state using SRS data and summarized data from NIBRS. Data from local law enforcement agencies are also provided for those contributors supplying 12 months of complete offense data. Because not all law enforcement agencies provide data for complete reporting periods, the FBI includes estimated crime numbers in these national presentations.

CIUS presents data tables containing information on topics of offenses known to law enforcement, arrests, clearances, trends, rates, property stolen and recovered, and law enforcement employee data. Data in "CIUS, 2024," include the following:

- Traditional Summary Estimations–statistics for the entire United States with estimated crime numbers accounting for law enforcement agencies that did not provide data for complete reporting periods.
    - Includes information about violent crime offenses (murder and nonnegligent manslaughter, rape, robbery, and aggravated assault) and property crime offenses (burglary, larceny-theft, and motor vehicle theft)
        - Estimated offense volume and rate–20-year table presenting national estimates
        - Estimated offense percent change for 2 years, 5 years, and 10 years
        - Estimated offense volume and rate by community type
        - Estimated offense volume percent distribution by region
        - Estimated offense volume and rate percent change by region, geographic division, and state
        - Estimated offense volume and rate for each state by community type
        - Estimated offense volume and rate for each individual metropolitan statistical area
        - Estimated breakdown for the offenses of robbery (by location), burglary (by time of day), and larceny-theft (by type) over the last 5 years
- Offenses Known to Law Enforcement–information about violent crime offenses and property crime offenses for those agencies reporting 12 months of complete data
- Traditional Summary Trends–2-year crime trends by population groupings and additional information about selected offenses
- Traditional Summary Rates–crime rates by population groupings and additional information about selected offenses

- Weapons–data concerning weapons used in the violent crimes of murder, robbery, and aggravated assault by state
- Property–
    - Analysis of the value of property lost through the crimes of robbery, burglary, motor vehicle theft, and larceny-theft
        - Table provides a percent change in offense volume, percent distribution of offense breakdowns, and the average value of property lost
    - Type and value of property stolen and recovered
- Clearances–information about crimes cleared either by arrest or exceptional means
    - By population groupings, geographic region, division, and additional information about selected offense
    - Percent of clearances involving persons under 18 years of age by population group
- Expanded Homicide Data–additional details about homicides and justifiable homicides that include information about murder victims, offenders, weapons, victim to offender relationships, and circumstances
- Expanded Offense Data–additional data the program collects on the 8 offenses
    - May include the type of weapon and the type and value of items stolen, depending on the offense
- Persons Arrested–
    - Number of arrests made by law enforcement and the age, sex, race, and ethnicity of arrestees for 28 offenses
    - Estimated number of arrests by offense
    - Number and rate of arrests by region and population groupings
    - 2-year, 5-year, and 10-year arrest trends
    - Disposition of juvenile offenders taken into custody
- Full-time Law Enforcement Employee Data–information regarding sworn officers and civilian law enforcement personnel
    - Volume and rate of law enforcement employees by region, geographic division, state, and by population group
    - Volume and rate of law enforcement officers by region, geographic division, state, and by population group
    - Volume of full-time law enforcement employees by sex
- Federal Data–information about violent crime offenses and property crime offenses from contributing federal law enforcement agencies and employee data from participating federal agencies
- "Human Trafficking, 2024" –information about human trafficking (commercial sex acts and involuntary servitude) offenses, clearances, and arrests
- "Cargo Theft, 2024" –data collected on reported cargo theft offenses

Users can access “CIUS, 2024” data through the Documents & Downloads section on the CDE website. This offers users the ability to download tables and resources, including methodology, tables by titles, area definitions, and offense definitions.

"National Incident-Based Reporting System (NIBRS), 2024"

NIBRS, established in 1989, is a crime data collection that improves the overall quality of crime data collected by law enforcement. NIBRS collects data for 71 Group A offenses that include 58 NIBRS data elements, plus 10 additional Group B offenses for which only arrest data are gathered. It captures details about each single crime incident as well as details about separate offenses within the same incident. This includes information on victims, known offenders, relationships between victims and offenders, arrestees, and property involved in crimes. For crime incidents, NIBRS can also provide context such as location, time of day, and whether the incident was cleared by arrest or exceptional means.

In 2024, 14,601 law enforcement agencies submitted NIBRS data either through a state UCR Program or directly to the FBI. All 50 states are NIBRS certified and are submitting their agencies' crime data via NIBRS. Additionally, the UCR Program has two agencies in the District of Columbia and one in the territory of Guam that directly reported UCR data through NIBRS.

Thirty-one federal agencies submitted their data via NIBRS. While the data of those agencies is included in the U.S. table in "NIBRS, 2024," federal data are not included in the aggregate tables. The agencies' converted data are also published in "CIUS, 2024," which is also available on the FBI's CDE website.

"NIBRS, 2024" is based on data submitted to the FBI's UCR Program by law enforcement agencies via NIBRS for 1 or more months of the 2024 calendar year. It presents an overview of the offense categories that show the breadth and complexity of the data collected only via NIBRS and is not augmented by SRS data. Data tables in "NIBRS, 2024" include the following:

- Participation–
    - Number of law enforcement agencies and population covered, enrolled, participation status, and method of data submission by population group and participation by state
- Incident–
    - Incidents, offenses, victims, and known offenders by offense
- Victim–
    - Adult and juvenile age by offense
    - Age, sex, and race by offense
- Offender–
    - Adult and juvenile age by offense
    - Age, sex, and race by offense
- Arrestee–
    - Adult and juvenile age by offense
    - Age, sex, and race by offense

- Relationship–
    - Victims to offenders by offense
- Location–
    - Crimes against persons, property, and society by location
- Time-of-Day–
    - Crimes against persons, property, and society by time of day
- Type Weapon/Force Involved–
    - Offenses involving weapon use by type of weapon/force involved
- Offense Circumstance–
    - Murder and nonnegligent manslaughter and aggravated assault victims by circumstance
    - Negligent manslaughter victims by circumstance
    - Individuals justifiably killed by aggravated assault/homicide circumstance
- State Offense (Totals)–
    - Crimes against persons, property, and society by state
- Completed and Attempted Offenses–
    - Number of offenses completed and attempted by offense
- Clearance–
    - Incidents cleared by offense
- Suspected Use, Drugs/Narcotics and Alcohol–
    - Incidents with drugs/narcotics seized by suspected drug type
    - Offenses involving offender's suspected use of drugs/narcotics and alcohol
- State –
    - Offenses by agency
- Federal–
    - Offenses by federal agencies that submitted NIBRS

Users can access the "NIBRS, 2024" data, tables, and methodology through the Documents & Downloads section on the CDE website.

"Hate Crime Statistics, 2024"

Each year, the FBI publishes data concerning bias-motivated offenses reported by law enforcement to gauge the scope and nature of hate crime in the nation. This report chronicles crimes that were motivated, in whole or in part, by the offender's bias against the victim's race, ethnicity, ancestry, religion, sexual orientation, disability, gender, or gender identity, and were committed against persons, property, or society. Because determining motivation is subjective, it is sometimes difficult to know with certainty whether a crime resulted from the offender's bias. Moreover, the presence of bias alone does not necessarily mean that a crime can be considered a hate crime. An agency should report an incident as a hate crime only when a law enforcement investigation reveals sufficient evidence to lead a reasonable and prudent person to conclude that the offender's *actions* were motivated, in whole or in part, by his or her bias.

Law enforcement agencies report hate crimes brought to their attention monthly or quarterly to the FBI either through their state UCR Programs or directly. To be included in this release, NIBRS agencies must have submitted at least 1 *Group A Incident Report*, a *Group B Arrest Report,*[15] or a *Zero Report* for at least 1 month of the calendar year. Agencies that have not transitioned to NIBRS reporting must have either submitted a *Hate Crime Incident Report* or a *Zero Report* via the electronic hate crime record layout specified in the "Hate Crime Technical Specification." The published data, therefore, do not necessarily represent reports from each participating agency for all 12 months (or 4 quarters) of the calendar year. Please note the FBI's UCR Program does not apply offense estimation procedures to account for missing data from agencies that do not participate in the Hate Crime Statistics Data Collection. Data tables in "Hate Crime Statistics, 2024" include the following:

- Number of Participating Agencies and Population Covered by Population Group and Federal
- Incidents, Offenses, Victims, and Known Offenders by Bias Motivation
- Incidents, Offenses, Victims, and Known Offenders by Offense Type
- Known Offender's Race and Ethnicity by Bias Motivation
- Victim Type by Offense Type
- Offense Type by Bias Motivation
- Victim Type by Bias Motivation
- Known Offender's Race, Ethnicity, and Age
- Bias Motivation by Location
- Offense Type by Participating State, Territory, and Federal
- Hate Crime Reporting by State, Territory, and Federal

[15] Group A includes 71 offenses captured within NIBRS that include 58 NIBRS data elements. Group B includes 10 additional offenses for which only arrest data are gathered.

- Hate Crime Incidents per Bias Motivation and Quarter by State, Territory, Federal, and Agency
- Hate Crime Zero Data Submitted per Quarter by State, Federal, and Agency

Users can access "Hate Crime Statistics, 2024" data through the Documents & Downloads section on the CDE website. This offers users the ability to download tables and resources, including methodology, component descriptions, and offense definitions.

"Law Enforcement Officers Killed and Assaulted (LEOKA), 2024"

An annual publication since 1972, the LEOKA report provides data on law enforcement officers who were feloniously killed, accidentally killed, or assaulted in the line of duty. The FBI's UCR Program collects information about deaths and assaults on duly sworn federal, state, county, city, tribal, and university and college law enforcement officers. For assault data to be included in "LEOKA, 2024," law enforcement agencies must have submitted information for all 12 months of 2024 regarding their sworn officers who were assaulted, as well as the number of officers and civilians their agencies employed full time for the reporting year.

Data tables in "Federal Law Enforcement Officers Assaulted, 2024" include:

- Department, Agency, and Office by Number of Victim Officers and Known Offenders
- Department, Agency, and Office by Number of Victim Officers Killed and Injured
- Department, Agency, and Office by Extent of Injury of Victim Officer
- Extent of Injury of Victim Officer by Type of Weapon
- Department/Agency by Type of Weapon
- Region, Geographic Division, and State by Type of Weapon
- Department, Agency, and Office by Type of Weapon
- Department, Agency, and Office by Activity of Victim Officer
- Department, Agency, and Office by Disposition of Known Offender

Data tables in "LEOKA, 2024: Officers Assaulted" include:

- Law Enforcement Officers Assaulted by Region and Geographic Division
- Law Enforcement Officers Assaulted by Population Group
- Time of Incident by Number of Assaults and percent Distribution
- Circumstance at Scene of Incident by Population Group and percent Cleared
- Circumstance at Scene of Incident by Type of Assignment and percent Distribution
- Type of Weapon and percent Injured
- Region, Geographic Division, and State by Type of Weapon
- Population Group by Type of Weapon and percent Distribution
- Circumstance at Scene of Incident by Type of Weapon and percent Distribution

Users can access the "LEOKA, 2024, Officers Assaulted" data tables through the Documents & Downloads section on the CDE website. The CDE offers users the ability to download tables and resources, including methodologies, topic pages, data maps, and LEOKA figures. As of 2025, LEOKA Officers Killed tables are no longer published; instead, they will be replaced by visual representations on the CDE's LEOKA Data Explorer page.

Area Definitions

The FBI's Uniform Crime Reporting (UCR) Program collects crime data and supplemental information that make it possible to generate a variety of statistical compilations, including data presented by reporting areas. These statistics provide data users with the opportunity to analyze local crime data in conjunction with data for areas of similar geographic location or population size. The reporting areas that the UCR Program uses in its data breakdowns include community types, population groups, and regions and geographic divisions. For community types, the UCR Program considers proximity to metropolitan areas using the Office of Management and Budget's (OMB's) designations. (Generally, sheriffs, county police, and state police report crimes within counties but outside cities; local police report crimes within city limits.) The number of inhabitants living in a locale (based on the U.S. Census Bureau's figures) determines the population group into which the program places it. Finally, in its geographic breakdowns, the UCR Program divides the United States into regions and divisions.

Community types

In order to assist data users who wish to analyze and present uniform statistical data about metropolitan areas, the UCR Program uses reporting units that represent major population centers. The program compiles data for these areas according to three types of communities:

1. **Metropolitan Statistical Areas (MSAs)**—Each MSA contains a principal city or urbanized area with a population of at least 50,000 inhabitants. MSAs include the principal city; the county in which the city is located; and other adjacent counties that have, as defined by the OMB, a high degree of economic and social integration with the principal city and county as measured through commuting. In the UCR Program, counties within an MSA are considered metropolitan. In addition, MSAs may cross state boundaries.

Some presentations in this publication refer to Metropolitan Divisions, which are subdivisions of an MSA that consists of a core with "a population of at least 2.5 million persons. A Metropolitan Division consists of one or more main/secondary counties that

represent an employment center or centers, plus adjacent counties associated with the main county or counties through commuting ties," (*Federal Register* 65 [249]). Also, some tables reference suburban areas, which are subdivisions of MSAs that exclude the principal cities but include all the remaining cities (those having fewer than 50,000 inhabitants) and the unincorporated areas of the MSAs.
Note: Because the elements that comprise MSAs (particularly the geographic compositions) are subject to change, the program discourages data users from making year-to-year comparisons of MSA data.

2. **Cities Outside MSAs**—Ordinarily, cities outside MSAs are incorporated areas.

3. **Nonmetropolitan Counties Outside MSAs**—Most nonmetropolitan counties are composed of unincorporated areas.

Community types are further illustrated in the following table:

<table>
<tr><td>Metropolitan</td><td>Nonmetropolitan</td></tr>
<tr><td>Principal Cities
(50,000+ inhabitants)</td><td rowspan="2">Cities outside Metropolitan Areas</td></tr>
<tr><td>Suburban Cities</td></tr>
<tr><td>Metropolitan Counties</td><td>Nonmetropolitan Counties</td></tr>
</table>

Population groups

The UCR Program uses the following population group designations:

Population Group	Political Label	Population Range
I	City	250,000 and more
II	City	100,000 to 249,999
III	City	50,000 to 99,999
IV	City	25,000 to 49,999
V	City	10,000 to 24,999
VI[1, 2]	City	Less than 10,000
VIII (Nonmetropolitan County)[2]	County	N/A
IX (Metropolitan County)[2]	County	N/A

[1]Includes universities and colleges to which no population is attributed.

[2]Includes state police to which no population is attributed.

Individual law enforcement agencies are the source of UCR data. The number of agencies included in each population group may vary from year to year because of population growth, geopolitical consolidation, municipal incorporation, etc. In noncensus years, the UCR Program estimates population figures for individual jurisdictions. (A more comprehensive explanation of population estimations can be found in the *Methodology*.)

The table below shows the number of agencies within each population group that were eligible to participate in the UCR Program for 2024:

Population Group	Number of Agencies	Population Covered
I	91	63,709,415
II	245	35,551,452
III	518	36,095,523
IV	974	33,742,598
V	1,968	31,305,759
VI[1, 2]	10,296	25,995,561
VIII (Nonmetropolitan County)[2]	2,915	27,843,299
IX (Metropolitan County)[2]	2,321	85,867,381
Total	19,328	340,110,988

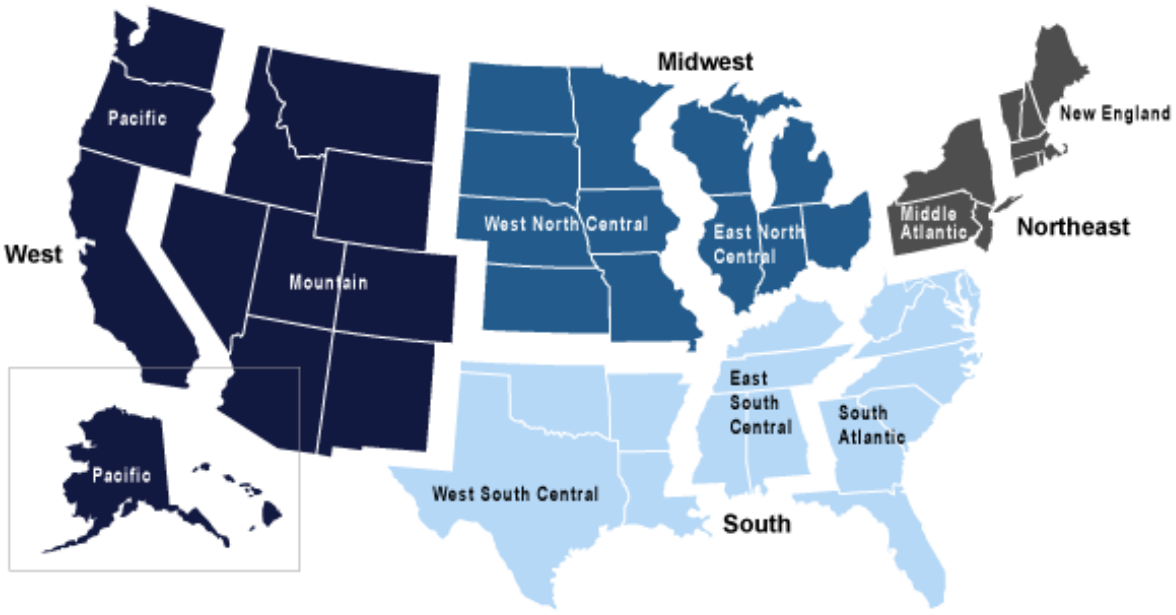

[1]Includes universities and colleges to which no population is attributed.

[2]Includes state police to which no population is attributed.

Regions and divisions

The map below illustrates the four regions of the United States along with their nine geographic divisions as established by the U.S. Census Bureau. The UCR Program uses this widely recognized geographic organization when compiling the nation's crime data.

The following table lists the 50 states and the District of Columbia arranged according to the regions and geographic divisions of the United States.

NORTHEASTERN STATES

New England	Middle Atlantic
Connecticut	New Jersey
Maine	New York
Massachusetts	Pennsylvania
New Hampshire	
Rhode Island	
Vermont	

MIDWESTERN STATES

East North Central	West North Central
Illinois	Iowa
Indiana	Kansas
Michigan	Minnesota
Ohio	Missouri
Wisconsin	Nebraska
	North Dakota
	South Dakota

SOUTHERN STATES

South Atlantic	East South Central
Delaware	Alabama
District of Columbia	Kentucky
Florida	Mississippi
Georgia	Tennessee
Maryland	West South Central

North Carolina	Arkansas
South Carolina	Louisiana
Virginia	Oklahoma
West Virginia	Texas

WESTERN STATES

Mountain	Pacific
Arizona	Alaska
Colorado	California
Idaho	Hawaii
Montana	Oregon
Nevada	Washington
New Mexico	
Utah	
Wyoming	

Offense Definitions

The Uniform Crime Reporting (UCR) Program's Summary Reporting System divides offenses into two groups, Part I and Part II crimes. For traditional presentations of data, such as the annual *Crime in the United States* publication, data submitted through the National Incident Based Reporting System (NIBRS) is converted to Summary. Each month participating law enforcement agencies submit information on the number of offenses that become known to them; those offenses cleared by arrest or exceptional means; and the age, sex, and race of persons arrested for each of the offenses. Summary reporting contributors provide only arrest data for Part II offenses.

The UCR Program collects data about **Part I** offenses in order to measure the level and scope of crime occurring throughout the nation. The program's founders chose these offenses because they are serious crimes, they occur with regularity in all areas of the country, and they are likely to be reported to the police. The **Part I** offenses are:

Criminal homicide—a.) ***Murder and nonnegligent manslaughter***: the willful (nonnegligent) killing of one human being by another. Deaths caused by negligence, attempts to kill, assaults to kill, suicides, and accidental deaths are excluded. The program classifies ***justifiable homicides*** separately and limits the definition to: (1) the killing of a felon by a law enforcement officer in the line of duty; or (2) the killing of a felon, during the commission of a felony, by a private citizen. b.) ***Manslaughter by negligence***: the killing of another person through gross negligence. Deaths of persons due to their own negligence, accidental deaths not resulting from gross negligence, and traffic fatalities are not included in the category manslaughter by negligence.

Rape—The penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim.

Robbery—The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

Aggravated assault—An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Simple assaults are excluded.

Burglary (breaking or entering)—The unlawful entry of a structure to commit a felony or a theft. Attempted forcible entry is included.

Larceny-theft (except motor vehicle theft)—The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Examples are thefts of bicycles, motor vehicle parts and accessories, shoplifting, pocket-picking, or the stealing of any property or article that is not taken by force and violence or by fraud. Attempted larcenies are included. Embezzlement, confidence games, forgery, check fraud, etc., are excluded.

Motor vehicle theft—The theft or attempted theft of a motor vehicle. A motor vehicle is self-propelled and runs on land surface and not on rails. Motorboats, construction equipment, airplanes, and farming equipment are specifically excluded from this category.

Arson—Any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

Human trafficking, commercial sex acts—Inducing a person by force, fraud, or coercion to participate in commercial sex acts, or in which the person induced to perform such act(s) has not attained 18 years of age.

Human trafficking, involuntary servitude—The obtaining of a person(s) through recruitment, harboring, transportation, or provision, and subjecting such persons by force, fraud, or coercion into involuntary servitude, peonage, debt bondage, or slavery (not to include commercial sex acts).

The **Part II** offenses, for which only arrest data are collected, are:

Other assaults (simple)—Assaults and attempted assaults where no weapon was used or no serious or aggravated injury resulted to the victim. Stalking, intimidation, coercion, and hazing are included.

Forgery and counterfeiting—The altering, copying, or imitating of something, without authority or right, with the intent to deceive or defraud by passing the copy or thing altered or imitated as that which is original or genuine; or the selling, buying, or possession of an altered, copied, or imitated thing with the intent to deceive or defraud. Attempts are included.

Fraud—The intentional perversion of the truth for the purpose of inducing another person or other entity in reliance upon it to part with something of value or to surrender a legal right. Fraudulent conversion, obtaining of money or property by false pretenses, confidence games, and bad checks, except forgeries and counterfeiting, are included.

Embezzlement—The unlawful misappropriation or misapplication by an offender to his/her own use or purpose of money, property, or some other thing of value entrusted to his/her care, custody, or control.

Stolen property: buying, receiving, possessing—Buying, receiving, possessing, selling, concealing, or transporting any property with the knowledge that it has been unlawfully taken, as by burglary, embezzlement, fraud, larceny, robbery, etc. Attempts are included.

Vandalism—To willfully or maliciously destroy, injure, disfigure, or deface any public or private property, real or personal, without the consent of the owner or person having custody or control by cutting, tearing, breaking, marking, painting, drawing, covering with filth, or any other such means as may be specified by local law. Attempts are included.

Weapons: carrying, possessing, etc.—The violation of laws or ordinances prohibiting the manufacture, sale, purchase, transportation, possession, concealment, or use of firearms, cutting instruments, explosives, incendiary devices, or other deadly weapons. Attempts are included.

Prostitution and commercialized vice—The unlawful promotion of or participation in sexual activities for profit.

Sex offenses (except rape, prostitution, and commercialized vice)—Offenses against chastity, common decency, morals, and the like.

Drug abuse violations—The violation of laws prohibiting the production, distribution, and/or use of certain controlled substances. The unlawful cultivation, manufacture,

distribution, sale, purchase, use, possession, transportation, or importation of any controlled drug or narcotic substance. Arrests for violations of state and local laws, specifically those relating to the unlawful possession, sale, use, growing, manufacturing, and making of narcotic drugs. The following drug categories are specified: opium or cocaine and their derivatives (morphine, heroin, codeine); marijuana; synthetic narcotics—manufactured narcotics that can cause true addiction (Demerol, methadone); and dangerous nonnarcotic drugs (barbiturates, Benzedrine).

Gambling—To unlawfully bet or wager money or something else of value; assist, promote, or operate a game of chance for money or some other stake; possess or transmit wagering information; manufacture, sell, purchase, possess, or transport gambling equipment, devices, or goods; or tamper with the outcome of a sporting event or contest to gain a gambling advantage.

Offenses against the family and children—Unlawful nonviolent acts by a family member (or legal guardian) that threaten the physical, mental, or economic well-being or morals of another family member and that are not classifiable as other offenses, such as assault or sex offenses. Attempts are included.

Driving under the influence—Driving or operating a motor vehicle or common carrier while mentally or physically impaired as the result of consuming an alcoholic beverage or using a drug or narcotic.

Liquor laws—The violation of state or local laws or ordinances prohibiting the manufacture, sale, purchase, transportation, possession, or use of alcoholic beverages, not including driving under the influence and drunkenness. Federal violations are excluded.

Drunkenness—To drink alcoholic beverages to the extent that one's mental faculties and physical coordination are substantially impaired. Driving under the influence is excluded.

Disorderly conduct—Any behavior that tends to disturb the public peace or decorum, scandalize the community, or shock the public sense of morality.

Vagrancy—The violation of a court order, regulation, ordinance, or law requiring the withdrawal of persons from the streets or other specified areas; prohibiting persons from remaining in an area or place in an idle or aimless manner; or prohibiting persons from going from place to place without visible means of support.

All other offenses—All violations of state or local laws not specifically identified as Part I or Part II offenses, except traffic violations.

Suspicion—Arrested for no specific offense and released without formal charges being placed.

Curfew and loitering laws (persons under age 18)—Violations by juveniles of local curfew or loitering ordinances.

Expanded data

Expanded offense data are the details of the various offenses that the UCR Program collects beyond the count of how many crimes law enforcement agencies report. Examples of these details may include the type of weapon used in a crime, type or value of items stolen, and victim/offender relationship. In addition, expanded data include trends (for example, 2-year comparisons) and rates per 100,000 inhabitants.

Murder

Trends (2-year): Tables 12, 13, and 14

Rates (per 100,000 inhabitants): Tables 16, 17, and 18

Weapons: Table 20

Expanded Homicide Data Tables

Victim data: Expanded Homicide Data Tables 1, 2, 4, 5, 6, 9, 10, and 13

Offender data: Expanded Homicide Data Tables 3, 4, 5, and 6

Victim/offender relationship data: Expanded Homicide Data Tables 4, 5, and 6

Circumstance data: Expanded Homicide Data Tables 10, 11, 12, and 13

Weapons: Expanded Homicide Data Tables 7, 8, 9, 11, 14, 15, and Table 20

Justifiable Homicide data: Expanded Homicide Data Tables 14 and 15

Rape

Trends (2-year): Tables 12, 13, 14, and 15

Rates (per 100,000 inhabitants): Tables 16, 17, 18, and 19

Robbery

Trends (2-year): Tables 12, 13, 14, and 15

Rates (per 100,000 inhabitants): Tables 16, 17, 18, and 19

Weapons: Tables 15, 19, 21, and Robbery Table 3

Offense analysis (e.g., location type): Table 23

Location type within region: Robbery Table 1

Location type within population group: Robbery Table 2

Aggravated assault

Trends (2-year): Tables 12, 13, 14, and 15

Rates (per 100,000 inhabitants): Tables 16, 17, 18, and 19

Weapons: Tables 15, 19, 22, and Aggravated Assault Table

Burglary

Trends (2-year): Tables 12, 13, 14, and 15

Rates (per 100,000 inhabitants): Tables 16, 17, 18, and 19

Offense analysis (e.g., location type): Table 23

Larceny-theft

Trends (2-year): Tables 12, 13, and 14

Rates (per 100,000 inhabitants): Tables 16, 17, and 18

Offense analysis (e.g., type and value): Table 23

Larceny-theft type within region: Larceny-theft Table

Motor vehicle theft

Trends (2-year): Tables 12, 13, 14, and 15

Rates (per 100,000 inhabitants): Tables 16, 17, 18, and 19

Offense analysis: Tables 23 and 24

Vehicle type: Tables 15, 19, and Motor Vehicle Theft Table

Arson

Trends (2-year): Tables 12, 13, 14, and 15

Rates (per 100,000 inhabitants): Arson Table 1

Type of property: Arson Table 2 and Table 15

Arrest

Age: Tables 32, 34, 36, 38, 39, 40, 41, 44, 46, 47, 50, 52, 53, 56, 58, 59, 62, 64, and 65

Gender: Tables 33, 35, 37, 39, 40, 42, 45, 48, 51, 54, 57, 60, 63, and 66

Race and Ethnicity: Tables 43, 49, 55, 61, and 67

Table 1

Crime in the United States

by Volume and Rate per 100,000 Inhabitants, 2005–2024[1]

Year	Population[2]	**Violent crime**[3]	*Violent crime rate*	Murder and nonnegligent manslaughter	*Murder and nonnegligent manslaughter rate*	Rape (revised definition)[4]	*Rape (revised definition) rate*[4]	Rape (legacy definition)[5]	*Rape (legacy definition) rate*[5]	Robbery	*Robbery rate*	Aggravated assault	*Aggravated assault rate*	**Property crime**	*Property crime rate*	Burglary	*Burglary rate*	Larceny-theft	*Larceny-theft rate*	Motor vehicle theft	*Motor vehicle theft rate*

[1] Estimates are updated to include data submitted as of the latest publication cutoff date for Crime in the United States. Because agencies can submit or update prior years' data, prior year estimates may change from previous releases.

[2] Populations are U.S. Census Bureau provisional estimates as of July 1 for each year except 2010, which are decennial census counts.

[3] For the years of 2005 to 2012, the violent crime figures include the offenses of murder, rape (legacy definition), robbery, and aggravated assault. For the years 2013 to 2024, the violent crime figures include the offenses of murder, rape (revised definition), robbery, and ag

[4] The figures shown in this column for the offense of rape were estimated using the revised UCR definition of rape. See data declaration for further explanation.

[5] The figures shown in this column for the offense of rape were estimated using the legacy UCR definition of rape. See data declaration for further explanation.

[6] The 2021 estimates are primarily NIBRS submissions and include nominal Summary Reporting System (SRS) statistics. As a result, estimates are below a statistically acceptable level to be nationally representative and are not comparable to other yearly estimates.

NOTE: Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense. Therefore, no arson data are published in this table.

Table 1A

Crime in the United States

Percent Change in Volume and Rate per 100,000 Inhabitants for 2 years, 5 years, and 10 years[1]

Years	**Violent crime**[2]	*Violent crime rate*	Murder and nonnegligent manslaughter	*Murder and nonnegligent manslaughter rate*	Rape (revised definition)[3]	*Rape (revised definition) rate*[3]	Rape (legacy definition)[4]	*Rape (legacy definition) rate*[4]	Robbery	*Robbery rate*	Aggravated assault	*Aggravated assault rate*	**Property crime**	*Property crime rate*	Burglary	*Burglary rate*	Larceny-theft	*Larceny-theft rate*	Motor vehicle theft	*Motor vehicle theft rate*

[1] Estimates are updated to include data submitted as of the latest publication cutoff date for Crime in the United States. Because agencies can submit or update prior years' data, prior year estimates may change from previous releases.

[2] The violent crime figures include the offenses of murder, rape (revised definition), robbery, and aggravated assault.

[3] The figures shown in this column for the offense of rape were estimated using the revised UCR definition of rape. See data declaration for further explanation.

[4] The figures shown in this column for the offense of rape were estimated using the legacy UCR definition of rape. See data declaration for further explanation.

NOTE: The 2021 estimates are primarily NIBRS submissions and include nominal Summary Reporting System (SRS) statistics. As a result, estimates are below a statistically acceptable level to be nationally representative and are not comparable to other yearly estimates.

Table 2

Crime in the United States

by Community Type, 2024

Area		Population[1]	**Violent crime**	Murder and nonnegligent manslaughter	Rape	Robbery	Aggravated assault	**Property crime**	Burglary	Larceny-theft	Motor vehicle theft

[1] Population figures are U.S. Census Bureau provisional estimates as of July 1, 2024.

[2] The percentage reported under "Area actually reporting" is based upon the population covered by agencies providing 3 months or more of crime reports to the FBI.

NOTE: Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense. Therefore, no arson data are published in this table.

Table 3

Crime in the United States

Offense and Population Percent Distribution by Region, 2024

Region	Population	**Violent crime**	Murder and nonnegligent manslaughter	Rape	Robbery	Aggravated assault	**Property crime**	Burglary	Larceny-theft	Motor vehicle theft
United States Total[1]	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**
Northeast	17.0%	13.3%	10.2%	10.7%	17.1%	12.8%	14.1%	9.5%	15.8%	10.2%
Midwest	20.5%	18.7%	20.3%	24.1%	16.1%	18.5%	18.1%	18.7%	17.8%	19.0%
South	39.0%	39.6%	48.6%	38.6%	33.1%	41.1%	39.9%	41.0%	40.5%	36.3%
West	23.5%	28.5%	21.0%	26.6%	33.7%	27.6%	27.9%	30.8%	26.0%	34.6%

[1] Because of rounding, the percentages may not add to 100.0.

NOTE: Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense. Therefore, no arson data are published in this table.

[1] The previous year's crime figures have been adjusted.

[2] Population figures are U.S. Census Bureau provisional estimates as of July 1, 2024.

[3] Includes offenses reported by the Metro Transit Police and the District of Columbia Fire and Emergency Medical Services: Arson Investigation Unit.

Area	Year	Population[2]	**Violent crime**		Murder and nonnegligent manslaughter		Rape		Robbery		Aggravated assault		**Property crime**		Burglary		Larceny-theft		Motor vehicle theft	
			Number	Rate per 100,000	Number	Rate per 100,000	Number	Rate per 100,000	Number	Rate per 100,000	Number	Rate per 100,000	Number	Rate per 100,000	Number	Rate per 100,000	Number	Rate per 100,000	Number	Rate per 100,000

[4] Limited data for 2024 were available for Florida.

* Less than one-tenth of 1 percent.

NOTE: Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense. Therefore, no arson data are published in this table.

[1] Population figures are U.S. Census Bureau provisional estimates as of July 1, 2024.

[2] Includes offenses reported by the Metro Transit Police and the District of Columbia Fire and Emergency Medical Services: Arson Investigation Unit.

[3] Limited data for 2024 were available for Florida.

NOTE: Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense. Therefore, no arson data are published in this table.

Table 6

Crime in the United States

by Metropolitan Statistical Area, 2024

[1] The FBI does not publish arson data unless it receives data from either the agency or the state for all 12 months of the calendar year.

[2] Because of changes in this agency's reporting practices, figures are not comparable to previous years' data.

State	City	Population	**Violent crime**	Murder and nonnegligent manslaughter	Rape	Robbery	Aggravated assault	**Property crime**	Burglary	Larceny-theft	Motor vehicle theft	Arson[1]

[3] Limited data for 2024 were available for Florida.

State	University/College	Campus	Student enrollment[1]	**Violent crime**	Murder and nonnegligent manslaughter	Rape	Robbery	Aggravated assault	**Property crime**	Burglary	Larceny-theft	Motor vehicle theft	Arson

[1] The student enrollment figures provided by the United States Department of Education are for the 2023 school year, the most recent available. The enrollment figures include full-time and part-time students.

[2] Student enrollment figures were not available.

[3] Limited data for 2024 were available for Florida.

NOTE: Caution should be exercised in making any intercampus comparisons or ranking schools because university/college crime statistics are affected by a variety of factors. These include demographic characteristics of the surrounding community, ratio of male to female students, number of on-campus residents, accessibility of the campus to outside visitors, size of enrollment, etc.

Table 10

Offenses Known to Law Enforcement

by State by Metropolitan and Nonmetropolitan Counties, 2024

[The data shown in this table do not reflect county totals but are the number of offenses reported by the sheriff's office or county police department.]

[1] Includes state police agencies that report aggregately for the entire state.

[2] Suburban areas include law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area. Suburban areas exclude all metropolitan agencies associated with a principal city. The agencies associated with suburban areas also appear in other groups within this table.

[1] Suburban areas include law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area. Suburban areas exclude all metropolitan agencies associated with a principal city. The agencies associated with suburban areas also appear in other groups within this table.

[1] Total number of murders for which supplemental homicide data were received.

[2] Drowning and strangulation are included in other weapons.

[3] Pushed or thrown out window is included in hands, fists, feet, etc.

NOTE: The weapons of pushed or thrown out window, drowning, and strangulation are only reported by Summary reporting agencies. These weapons are not collected via the National Incident-Based Reporting System.

Table 21

Robbery

by State, Types of Weapons, 2024

State	Total robberies[1]	Firearms	Knives or cutting instruments	Other weapons	Strong-arm	Agency count	Population

[1] The number of aggravated assaults from agencies that submitted 12 months of data in 2024 for which breakdowns by type of weapon were included.

[2] Limited data for 2024 were available for Florida.

Table 23

Offense Analysis

Number and Percent Change, 2023–2024

[16,018 agencies; 2024 estimated population 319,623,079]

Classification		Number of offenses 2024	Percent change from 2023	Percent distribution[1]	Average value
Murder		**15,905**	**-15.2**	**-**	
Rape		**119,950**	**-5.7**	**-**	
Robbery:	**Total**	**198,399**	**-9.3**	**100.0**	**$2,943**
Robbery by location:	Street/highway	64,766	-10.3	32.6	3,178
	Commercial house	37,491	-8.8	18.9	2,169
	Gas or service station	7,430	-11.6	3.7	4,116
	Convenience store	13,391	-7.3	6.7	1,087
	Residence	31,966	-7.7	16.1	2,936
	Bank	2,176	-22.7	1.1	7,079
	Miscellaneous	41,179	-8.7	20.8	3,455
Burglary:	**Total**	**743,460**	**-7.8**	**100.0**	**4,421**
Burglary by location:	Residence (dwelling):	386,994	-9.1	52.1	4,517
	Residence Night	165,997	-7.7	22.3	4,372
	Residence Day	206,575	-9.5	27.8	4,402
	Residence Unknown	14,422	-20.0	1.9	7,821
	Nonresidence (store, office, etc.):	356,466	-6.3	47.9	4,318
	Nonresidence Night	179,475	-7.9	24.1	3,992
	Nonresidence Day	162,898	-3.5	21.9	4,504
	Nonresidence Unknown	14,093	-16.5	1.9	6,317
Larceny-theft (except motor vehicle theft):	**Total**	**4,047,293**	**-6.4**	**100.0**	**2,122**
Larceny-theft by type:	Pocket-picking	29,269	-8.5	0.7	1,986
	Purse-snatching	12,789	-9.7	0.3	1,385
	Shoplifting	1,188,124	+8.1	29.4	467
	From motor vehicles (except accessories)	818,068	-15.4	20.2	1,315
	Motor vehicle accessories	261,796	-28.5	6.5	1,227
	Bicycles	110,997	-1.9	2.7	867
	From buildings	313,288	-10.7	7.7	2,539
	From coin-operated machines	5,092	-8.0	0.1	1,707
	All others	1,307,870	-5.1	32.3	4,329
Larceny-theft by value:	Over $200	2,048,835	-10.7	50.6	4,146
	$50 to $200	815,991	+0.5	20.2	106
	Under $50	1,182,467	-3.0	29.2	12
Motor vehicle theft		**834,085**	**-20.2**	**-**	**12,475**

[1] Because of rounding, the percentages may not add to 100.0.

Table 24

Property Stolen and Recovered

by Type and Value, 2024

[16,018 agencies; 2024 estimated population 319,623,079]

Type of property	Value of property		Percent recovered
	Stolen	Recovered	
Total	**$22,914,464,778**	**$6,220,708,634**	**27.1**
Currency, notes, etc.	3,036,369,097	54,892,912	1.8
Jewelry and precious metals	1,432,433,116	30,319,583	2.1
Clothing and furs	635,872,038	33,565,618	5.3
Locally stolen motor vehicles	10,410,437,138	5,351,698,232	51.4
Office equipment	388,606,610	15,884,264	4.1
Televisions, radios, stereos, etc.	203,343,781	7,861,338	3.9
Firearms	125,751,257	12,930,327	10.3
Household goods	299,531,148	12,755,542	4.3

[1] Not all agencies submit reports for arson to the FBI. As a result, the number of reports the FBI uses to compute the percent of offenses cleared for arson is less than the number it uses to compute the percent of offenses cleared for all other offenses.

[2] Suburban area includes law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area. Suburban area excludes all metropolitan agencies associated with a principal city. The agencies associated with suburban areas also appear in other groups within this table.

[1] Not all agencies submit reports for arson to the FBI. As a result, the number of reports the FBI uses to compute the percent of offenses cleared for arson is less than the number it uses to compute the percent of offenses cleared for all other offenses.

[2] Suburban area includes law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area. Suburban area excludes all metropolitan agencies associated with a principal city. The agencies associated with suburban areas also appear in other groups within this table.

	Synthetic or manufactured drugs	0.8	1.6	0.4	0.7	0.8
	Other dangerous nonnarcotic drugs	5.0	6.3	4.2	5.3	4.2
Possession:	Total	87.7	75.6	89.9	88.1	91.9
	Heroin or cocaine and their derivatives	16.1	24.8	14.9	15.9	12.4
	Marijuana	24.5	13.5	32.0	30.5	11.6
	Synthetic or manufactured drugs	5.6	5.3	3.7	4.6	9.6
	Other dangerous nonnarcotic drugs	41.5	31.9	39.3	37.1	58.3

Table 29

Estimated Number of Arrests

United States, 2024

Total[1]	**7,522,824**
Murder and nonnegligent manslaughter	10,522
Rape	18,784
Robbery	64,804
Aggravated assault	325,313
Burglary	110,925
Larceny-theft	725,109
Motor vehicle theft	66,191
Arson	8,429
Violent crime[2]	419,423
Property crime[2]	910,654
Other assaults	1,018,216
Forgery and counterfeiting	36,445
Fraud	85,643
Embezzlement	8,811
Stolen property; buying, receiving, possessing	70,427
Vandalism	162,380
Weapons; carrying, possessing, etc.	163,091
Prostitution and commercialized vice	12,811
Sex offenses (except rape and prostitution)	20,202
Drug abuse violations	822,488
Gambling	2,036
Offenses against the family and children	47,175
Driving under the influence	804,926
Liquor laws	96,890
Drunkenness[3]	6,339
Disorderly conduct	271,642
Vagrancy	24,471
All other offenses	2,531,936
Suspicion[4]	0
Curfew and loitering law violations	6,818

[1]Does not include suspicion.

[2]Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

[3]Drunkenness figures were only submitted by agencies via the Summary Reporting System (SRS). As of 2021, drunkenness is no longer a separate offense in the National Incident-Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

[4]Figures for the category of suspicion include only data submitted by agencies to the SRS, because suspicion data is not collected as a crime category via NIBRS.

Table 30

Number and Rate of Arrests

by Region, 2024

[Rate: Number of arrests per 100,000 inhabitants]

Suspicion[4]	4	*	3	*	0	0.0	0	0.0	1	*
Curfew and loitering law violations	6,112	2.0	553	1.0	2,416	3.9	1,655	1.5	1,488	2.0

[1] Does not include suspicion.

[2] Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

[3] Drunkenness figures were only submitted by agencies via the Summary Reporting System (SRS). As of 2021, drunkenness is no longer a separate offense in the National Incident-Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

[4] Figures for the category of suspicion include only data submitted by agencies to the SRS, because suspicion data is not collected as a crime category via NIBRS.

* Less than one-tenth of 1 percent.

[1]Suburban areas include law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area. Suburban areas exclude all metropolitan agencies associated with a principal city. The agencies associated with suburban areas also appear in other groups within this table.

[2]Does not include suspicion.

[3]Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

[4]Drunkenness figures were only submitted by agencies via the Summary Reporting System (SRS). As of 2021, drunkenness is no longer a separate offense in the National Incident-Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

[5]Figures for the category of suspicion include only data submitted by agencies to the SRS, because suspicion data is not collected as a crime category via NIBRS.

* Less than one-tenth of 1 percent.

[1]Does not include suspicion.

[2]The rape figures in this table are aggregate totals of the data submitted based on both the legacy and revised Uniform Crime Reporting definitions.

[3]Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

[4]The 2015 drunkenness figures were submitted by agencies that reported via the Summary Reporting System (SRS) and National Incident-Based Reporting System (NIBRS). As of 2021, drunkenness is no longer a separate offense in NIBRS, but it is included with All Other Offenses (except traffic) category.

[5]Figures for the category of suspicion include only data submitted by agencies to the SRS, because suspicion is not collected as a crime category via NIBRS.

[1]Does not include suspicion.

[2]The rape figures in this table are aggregate totals of the data submitted based on both the legacy and revised Uniform Crime Reporting definitions.

[3]Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

[4]The 2015 drunkenness figures were submitted by agencies that reported via the Summary Reporting System (SRS) and National Incident-Based Reporting System (NIBRS). As of 2021, drunkenness is no longer a separate offense in NIBRS, but it is included with All Other Offenses (except traffic) category.

[5]Figures for the category of suspicion include only data submitted by agencies to the SRS, because suspicion is not collected as a crime category via NIBRS.

Curfew and loitering law violations	9,522	5,321	-44.1	9,522	5,321	-44.1	-	-	-

[1]Does not include suspicion.

[2]Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

[3]The 2020 figures for drunkenness were submitted by agencies that reported via the Summary Reporting System (SRS) and those that reported via National Incident-Based Reporting System (NIBRS). As of 2021, drunkenness is no longer a separate offense in NIBRS, but it is included with All Other Offenses (except traffic) category.

[4]Figures for the category of suspicion include only data submitted by agencies to the SRS, because suspicion is not collected as a crime category via NIBRS.

[1]Does not include suspicion.

[2]Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

[3]Drunkenness figures were only submitted by agencies via the Summary Reporting System (SRS). As of 2021, drunkenness is no longer a separate offense in the National Incident-Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

[4]Figures for the category of suspicion include only data submitted by agencies to the SRS, because suspicion data is not collected as a crime category via NIBRS.

* Less than one-tenth of 1 percent.

[1]Because of rounding, the percentages may not add to 100.0.

[2]Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

[3]Drunkenness figures were only submitted by agencies via the Summary Reporting System (SRS). As of 2021, drunkenness is no longer a separate offense in the National Incident-Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

[4]Figures for the category of suspicion include only data submitted by agencies to the SRS, because suspicion data is not collected as a crime category via NIBRS.

* Less than one-tenth of 1 percent.

[1]Because of rounding, the percentages may not add to 100.0.

[2]Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

[3]Drunkenness figures were only submitted by agencies via the Summary Reporting System (SRS). As of 2021, drunkenness is no longer a separate offense in the National Incident-Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

[4]Figures for the category of suspicion include only data submitted by agencies to the SRS, because suspicion data is not collected as a crime category via NIBRS.

* Less than one-tenth of 1 percent.

[1]Because of rounding, the percentages may not add to 100.0.

[2]The ethnicity totals are representative of those agencies that provided ethnicity breakdowns. Not all agencies provide ethnicity data; therefore, the race and ethnicity totals will not equal.

[3]Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

[4]Drunkenness figures were only submitted by agencies via the Summary Reporting System (SRS). As of 2021, drunkenness is no longer a separate offense in the National Incident-Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

[5]Figures for the category of suspicion include only data submitted by agencies to the SRS, because suspicion data is not collected as a crime category via NIBRS.

*Less than one-tenth of 1 percent.

[1]Because of rounding, the percentages may not add to 100.0.

[2]The ethnicity totals are representative of those agencies that provided ethnicity breakdowns. Not all agencies provide ethnicity data; therefore, the race and ethnicity totals will not equal.

[3]Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

[4]Drunkenness figures were only submitted by agencies via the Summary Reporting System (SRS). As of 2021, drunkenness is no longer a separate offense in the National Incident-Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

[5]Figures for the category of suspicion include only data submitted by agencies to the SRS, because suspicion data is not collected as a crime category via NIBRS.

*Less than one-tenth of 1 percent.

[1]Because of rounding, the percentages may not add to 100.0.

[2]Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

[3]Drunkenness figures were only submitted by agencies via the Summary Reporting System (SRS). As of 2021, drunkenness is no longer a separate offense in the National Incident-Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

[4]Figures for the category of suspicion include only data submitted by agencies to the SRS, because suspicion data is not collected as a crime category via NIBRS.

* Less than one-tenth of 1 percent.

[1]Because of rounding, the percentages may not add to 100.0.

[2]The ethnicity totals are representative of those agencies that provided ethnicity breakdowns. Not all agencies provide ethnicity data; therefore, the race and ethnicity totals will not equal.

[3]Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

[4]Drunkenness figures were only submitted by agencies via the Summary Reporting System (SRS). As of 2021, drunkenness is no longer a separate offense in the National Incident-Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

[5]Figures for the category of suspicion include only data submitted by agencies to the SRS, because suspicion data is not collected as a crime category via NIBRS.

*Less than one-tenth of 1 percent.

[1]Because of rounding, the percentages may not add to 100.0.

[2]The ethnicity totals are representative of those agencies that provided ethnicity breakdowns. Not all agencies provide ethnicity data; therefore, the race and ethnicity totals will not equal.

[3]Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

[4]Drunkenness figures were only submitted by agencies via the Summary Reporting System (SRS). As of 2021, drunkenness is no longer a separate offense in the National Incident-Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

[5]Figures for the category of suspicion include only data submitted by agencies to the SRS, because suspicion data is not collected as a crime category via NIBRS.

*Less than one-tenth of 1 percent.

[1]Because of rounding, the percentages may not add to 100.0.

[2]Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

[3]Drunkenness figures were only submitted by agencies via the Summary Reporting System (SRS). As of 2021, drunkenness is no longer a separate offense in the National Incident-Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

[4]Figures for the category of suspicion include only data submitted by agencies to the SRS, because suspicion data is not collected as a crime category via NIBRS.

* Less than one-tenth of 1 percent.

[1]Because of rounding, the percentages may not add to 100.0.

[2]The ethnicity totals are representative of those agencies that provided ethnicity breakdowns. Not all agencies provide ethnicity data; therefore, the race and ethnicity totals will not equal.

[3]Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

[4]Drunkenness figures were only submitted by agencies via the Summary Reporting System (SRS). As of 2021, drunkenness is no longer a separate offense in the National Incident-Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

[5]Figures for the category of suspicion include only data submitted by agencies to the SRS, because suspicion data is not collected as a crime category via NIBRS.

* Less than one-tenth of 1 percent.

[1]Because of rounding, the percentages may not add to 100.0.

[2]The ethnicity totals are representative of those agencies that provided ethnicity breakdowns. Not all agencies provide ethnicity data; therefore, the race and ethnicity totals will not equal.

[3]Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

[4]Drunkenness figures were only submitted by agencies via the Summary Reporting System (SRS). As of 2021, drunkenness is no longer a separate offense in the National Incident-Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

[5]Figures for the category of suspicion include only data submitted by agencies to the SRS, because suspicion data is not collected as a crime category via NIBRS.

* Less than one-tenth of 1 percent.

[1]Because of rounding, the percentages may not add to 100.0.

[2]The ethnicity totals are representative of those agencies that provided ethnicity breakdowns. Not all agencies provide ethnicity data; therefore, the race and ethnicity totals will not equal.

[3]Drunkenness figures were only submitted by agencies via the Summary Reporting System (SRS). As of 2021, drunkenness is no longer a separate offense in the National Incident-Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

[4]Figures for the category of suspicion include only data submitted by agencies to the SRS, because suspicion data is not collected as a crime category via NIBRS.

[5]Figures for suspicion include only data submitted by Summary reporting agencies because suspicion is not collected as a crime via NIBRS.

[1]Because of rounding, the percentages may not add to 100.0.

[2]The ethnicity totals are representative of those agencies that provided ethnicity breakdowns. Not all agencies provide ethnicity data; therefore, the race and ethnicity totals will not equal.

[3]Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

[4]Drunkenness figures were only submitted by agencies via the Summary Reporting System (SRS). As of 2021, drunkenness is no longer a separate offense in the National Incident-Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

[5]Figures for the category of suspicion include only data submitted by agencies to the SRS, because suspicion data is not collected as a crime category via NIBRS.

* Less than one-tenth of 1 percent.

[1]Suburban areas include law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area. Suburban areas exclude all metropolitan agencies associated with a principal city.

[2]Does not include suspicion.

[3]Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

[4]Drunkenness figures were only submitted by agencies via the Summary Reporting System (SRS). As of 2021, drunkenness is no longer a separate offense in the National Incident-Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

[5]Figures for the category of suspicion include only data submitted by agencies to the SRS, because suspicion data is not collected as a crime category via NIBRS.

[1]Suburban areas include law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area. Suburban areas exclude all metropolitan agencies associated with a principal city.

[2]Does not include suspicion.

[3]Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

[4]Drunkenness figures were only submitted by agencies via the Summary Reporting System (SRS). As of 2021, drunkenness is no longer a separate offense in the National Incident-Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

[5]Figures for the category of suspicion include only data submitted by agencies to the SRS, because suspicion data is not collected as a crime category via NIBRS.

[1]Suburban areas include law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area. Suburban areas exclude all metropolitan agencies associated with a principal city.

[2]Because of rounding, the percentages may not add to 100.0.

[3]Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

[4]Drunkenness figures were only submitted by agencies via the Summary Reporting System (SRS). As of 2021, drunkenness is no longer a separate offense in the National Incident-Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

[5]Figures for the category of suspicion include only data submitted by agencies to the SRS, because suspicion data is not collected as a crime category via NIBRS.

* Less than one-tenth of 1 percent.

[1]Suburban areas include law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area. Suburban areas exclude all metropolitan agencies associated with a principal city.

[2]Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

[3]Drunkenness figures were only submitted by agencies via the Summary Reporting System (SRS). As of 2021, drunkenness is no longer a separate offense in the National Incident-Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

[4]Figures for the category of suspicion include only data submitted by agencies to the SRS, because suspicion data is not collected as a crime category via NIBRS.

* Less than one-tenth of 1 percent.

[1]Suburban areas include law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area. Suburban areas exclude all metropolitan agencies associated with a principal city.

[2]Because of rounding, the percentages may not add to 100.0.

[3]The ethnicity totals are representative of those agencies that provided ethnicity breakdowns. Not all agencies provide ethnicity data; therefore, the race and ethnicity totals will not equal.

[4]Violent crimes are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

[5]Drunkenness figures were only submitted by agencies via the Summary Reporting System (SRS). As of 2021, drunkenness is no longer a separate offense in the National Incident-Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

[6]Figures for the category of suspicion include only data submitted by agencies to the SRS, because suspicion data is not collected as a crime category via NIBRS.

* Less than one-tenth of 1 percent.

[1]Does not include traffic arrests.

[2]Violent crimes in this table are offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

[3]Drunkenness figures were only submitted by agencies via the Summary Reporting System (SRS). As of 2021, drunkenness is no longer a separate offense in the National Incident-Based Reporting System (NIBRS), but it is included with All Other Offenses (except traffic) category.

[4]Figures for the category of suspicion include only data submitted by agencies to the SRS, because suspicion data is not collected as a crime category via NIBRS.

[5]Includes arrests reported by the Metro Transit Police. This agency has no population associated with it.

[6]Limited data for 2024 were available for Florida.

[7]The Florida arrest counts for offenses against the family and children, drunkenness, disorderly conduct, vagrancy, suspicion, and curfew and loitering law violations are included under the category All other offenses (except for the data submitted by NIBRS agencies using those specific breakdowns).

NOTE: Because the number of agencies submitting arrest data varies from year to year, users are cautioned about making direct comparisons between 2022 arrest totals and those published in previous years' editions of *Crime in the United States*. Further, arrest figures may vary widely from state to state because some Part II crimes are not considered crimes in some states.

Data Declarations and Methodology for Federal Tables

Federal Table 1
Offenses Known to Law Enforcement by Federal Agency, 2024

Data Declaration

The FBI collects these data through the Uniform Crime Reporting (UCR) Program.

General comment

This table provides the volume of violent crime (murder and nonnegligent manslaughter, rape, robbery, and aggravated assault) and property crime (burglary, larceny-theft, and motor vehicle theft) as reported by federal law enforcement agencies that contributed data to the UCR Program. (Note: Arson is not included in the property crime total in this table; however, complete arson data were provided and appear in the arson column.)

Caution against ranking

Readers should take into consideration relevant factors in addition to an agency's crime statistics when making any valid comparisons of crime among different agencies or locales. *UCR Statistics: Their Proper Use* provides more details.

Methodology

The data used in creating this table are from federal agencies submitting 12 months of complete offense data for 2024.

Federal Table 2
Full-time Law Enforcement Employees by Federal Agency, 2024

Data Declaration

The FBI collects these data through the Uniform Crime Reporting (UCR) Program.

General comment

This table provides the total number of law enforcement employees, total officers, and total civilians employed by participating federal agencies.

Methodology

The information in this table is derived from law enforcement employee counts (as of October 31, 2024) submitted by participating agencies. The UCR Program defines law enforcement officers as individuals who ordinarily carry a firearm and a badge, have full arrest powers, and are paid from governmental funds set aside specifically to pay sworn law enforcement. Civilian employees include full-time agency personnel such as clerks, radio dispatchers, meter attendants, stenographers, jailers, correctional officers, and mechanics.

[1] The Bureau of Indian Affairs submits these statistics to the FBI Uniform Crime Reporting Program on a monthly basis throughout the calendar year and can be found in Table 11 of *Crime in the United States, 2024* .

Federal Table 2

Full-time Law Enforcement Employees

by Federal Agency, 2024

Agency	Unit/Office	Total law enforcement employees	Total officers	Total civilians
Architect of the Capitol	Office of Inspector General	3	2	1
Central Intelligence Agency Security Protective Service		460	460	0
Corporation for National and Community Service	Office of Inspector General	8	8	0
DC Inspector General Office		36	22	14
Drug Enforcement Administration	Wilmington Resident Office	21	17	4
Federal Housing Finance Agency	Office of Inspector General	55	40	15
Library of Congress	Office of Inspector General	3	3	0
Peace Corps	Office of Inspector General	7	6	1
Pension Benefit Guaranty Corporation	Office of Inspector General	24	2	22
Smithsonian Institution	Office of Inspector General	4	3	1
Tennessee Valley Authority	Office of Inspector General	26	18	8
United States Agency for International Development	Office of Inspector General	60	45	15
United States Army		1,561	689	872
United States Department of Agriculture	Office of Inspector General	421	113	308
United States Department of Education	Office of Inspector General	67	61	6
United States Department of Health and Human Services	Office of Inspector General, Office of Investigati	577	451	126
United States Department of Housing and Urban Development	Office of Inspector General	179	138	41
United States Department of Justice:	Federal Bureau of Investigation	37,827	14,177	23,650
	Office of Inspector General	553	132	421
United States Department of Labor	Office of Inspector General	311	133	178
United States Department of the Interior:	Bureau of Indian Affairs[1]			
	Office of Inspector General	86	58	28
United States Department of Transportation	Office of Inspector General	117	96	21
United States Department of Treasury	Special Inspector General for Pandemic Recover	14	11	3
United States Department of Veterans Affairs Police Service		6,198	4,944	1,254
United States Environmental Protection Agency	Office of Inspector General	53	43	10
United States Federal Deposit Insurance Corporation	Office of Inspector General	72	66	6
United States General Services Administration	Office of Inspector General	77	61	16
United States Nuclear Regulatory Commission	Office of Inspector General	15	12	3
United States Office of Personnel Management	Office of the Inspector General	35	23	12
United States Securities and Exchange Commission	Office of Inspector General	16	11	5
United States Treasury Inspector General for Tax Administration		356	261	95

[1] The Bureau of Indian Affairs submits these statistics to the FBI Uniform Crime Reporting Program on a yearly basis and can be found in Table 81 of *Crime in the United States, 2024* .

Methodology

The tabular presentation that follows briefly describes the data sources and the methods used to construct Tables 70–81.

(1) Table	(2) Database	(3) Table Construction	(4) General Comments
70	The information in this table is derived from law enforcement employee counts (as of October 31, 2024) submitted by participating agencies.	This table provides the number and rate per 1,000 inhabitants of law enforcement employees broken down by region, geographic division, and population group. The totals for full-time law enforcement employees in metropolitan and nonmetropolitan counties are combined in this table. For the 2024 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 through 2023 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2023 Census population estimate to derive the agency's 2024 population estimate.	The UCR Program defines law enforcement officers as individuals who ordinarily carry a firearm and a badge, have full arrest powers, and are paid from governmental funds set aside specifically to pay sworn law enforcement. Civilian employees include full-time agency personnel such as clerks, radio dispatchers, meter attendants, stenographers, jailers, correctional officers, and mechanics.
71	The information in this table is derived from law enforcement officer counts (as of October 31, 2024) submitted by participating agencies.	This table provides the number and rate per 1,000 inhabitants of sworn law enforcement officers broken down by region, geographic division, and population group. The totals for full-time law enforcement officers in metropolitan and nonmetropolitan counties are combined in this table. For the 2024 population estimates used in this table,	The UCR Program defines law enforcement officers as individuals who ordinarily carry a firearm and a badge, have full arrest powers, and are paid from governmental funds set aside specifically to pay sworn law enforcement.

		the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 through 2023 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2023 Census population estimate to derive the agency's 2024 population estimate.	
72	The information in this table is derived from law enforcement employee counts (as of October 31, 2024) submitted by participating agencies.	This table includes the number of agencies that fall within specified rate ranges of employment by population group for law enforcement personnel, both sworn officers and civilian employees. The FBI derived the rate of full-time law enforcement employees per population group by first dividing the aggregated total of personnel for the group by the aggregated estimated populations covered by the contributing agencies within the group and then multiplying the resulting figure by 1,000. For the 2024 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 through 2023 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2023 Census population estimate to derive the agency's 2024 population estimate.	The UCR Program defines law enforcement officers as individuals who ordinarily carry a firearm and a badge, have full arrest powers, and are paid from governmental funds set aside specifically to pay sworn law enforcement. Civilian employees include full-time agency personnel such as clerks, radio dispatchers, meter attendants, stenographers, jailers, correctional officers, and mechanics. Agencies with no resident population, i.e., those associated with universities and colleges (see Table 79), other agencies (see Table 81), and some state agencies; are excluded from this table. Therefore, the total number of agencies used in this table differs from that provided in other law enforcement employee tables.

73	The information in this table is derived from law enforcement officer counts (as of October 31, 2024) submitted by participating agencies.	This table includes the number of agencies that fall within specified rate ranges of employment by population group for law enforcement officers. The FBI derived the rate of full-time law enforcement officers per population group by first dividing the aggregated total of officers for the group by the aggregated estimated populations covered by the contributing agencies within the group and then multiplying the resulting figure by 1,000. For the 2024 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 through 2023 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2023 Census population estimate to derive the agency's 2024 population estimate.	The UCR Program defines law enforcement officers as individuals who ordinarily carry a firearm and a badge, have full arrest powers, and are paid from governmental funds set aside specifically to pay sworn law enforcement. Agencies with no resident population; i.e., those associated with universities and colleges (see Table 79), other agencies (see Table 81), and some state agencies; are excluded from this table. Therefore, the total number of agencies used in this table differs from that provided in other law enforcement officer tables.
74	The information in this table is derived from law enforcement employee counts (as of October 31, 2024) submitted by participating agencies.	This table includes the number of reported sworn law enforcement officers and civilian employees broken down by population group. The totals are also broken down by percent male and percent female. For the 2024 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 through 2023 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2023 Census population estimate to derive the agency's 2024 population estimate.	The UCR Program defines law enforcement officers as individuals who ordinarily carry a firearm and a badge, have full arrest powers, and are paid from governmental funds set aside specifically to pay sworn law enforcement. Civilian employees include full-time agency personnel such as clerks, radio dispatchers, meter attendants, stenographers, jailers, correctional officers, and mechanics.

75	The information in this table is derived from civilian law enforcement counts (as of October 31, 2024) submitted by participating agencies.	This table includes data about civilian law enforcement employees by population group. For the 2024 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 through 2023 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2023 Census population estimate to derive the agency's 2024 population estimate.	Civilian employees include full-time agency personnel such as clerks, radio dispatchers, meter attendants, stenographers, jailers, correctional officers, and mechanics.
76	The information in this table is derived from law enforcement employee counts (as of October 31, 2024) submitted by participating agencies.	This table provides the number of state law enforcement employees, the number of male officers, the number of female officers, the number of male civilian employees, and the number of female civilian employees listed alphabetically by state.	The UCR Program defines law enforcement officers as individuals who ordinarily carry a firearm and a badge, have full arrest powers, and are paid from governmental funds set aside specifically to pay sworn law enforcement. Civilian employees include full-time agency personnel such as clerks, radio dispatchers, meter attendants, stenographers, jailers, correctional officers, and mechanics. Caution should be used when comparing data from one state to that of another. The responsibilities of the various state police, highway patrol, and department of public safety agencies range from full law enforcement duties to only traffic patrol, which can impact both the level of employment for agencies as well as the ratio of sworn officers to

			civilians employed. Any valid comparison must take these factors and the other identified variables affecting crime into consideration.
77	The information in this table is derived from law enforcement employee counts (as of October 31, 2024) submitted by participating agencies.	This table provides the number of law enforcement employees, the number of male officers, the number of female officers, the number of male civilian employees, and the number of female civilian employees listed alphabetically by state. For the 2024 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 through 2023 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2023 Census population estimate to derive the agency's 2024 population estimate.	The UCR Program defines law enforcement officers as individuals who ordinarily carry a firearm and a badge, have full arrest powers, and are paid from governmental funds set aside specifically to pay sworn law enforcement. Civilian employees include full-time agency personnel such as clerks, radio dispatchers, meter attendants, stenographers, jailers, correctional officers, and mechanics.
78	The information in this table is derived from law enforcement employee counts (as of October 31, 2024) submitted by participating agencies.	This table provides the number of law enforcement officers and civilians employed by city/town law enforcement agencies listed alphabetically by state. For the 2024 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2020 through 2023 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2023 Census population estimate to derive the agency's 2024 population estimate.	The UCR Program defines law enforcement officers as individuals who ordinarily carry a firearm and a badge, have full arrest powers, and are paid from governmental funds set aside specifically to pay sworn law enforcement. Civilian employees include full-time agency personnel such as clerks, radio dispatchers, meter attendants, stenographers, jailers, correctional officers, and mechanics.

79	The information in this table is derived from law enforcement employee counts (as of October 31, 2024) submitted by participating agencies.	This table provides the number of law enforcement officers and civilians employed by universities and colleges listed alphabetically by state. The student enrollment figures provided by the United States Department of Education are for the 2023 school year, the most recent year for which the data are available. The figures include full-time and part-time students.	The UCR Program defines law enforcement officers as individuals who ordinarily carry a firearm and a badge, have full arrest powers, and are paid from governmental funds set aside specifically to pay sworn law enforcement. Civilian employees include full-time agency personnel such as clerks, radio dispatchers, meter attendants, stenographers, jailers, correctional officers, and mechanics.
80	The information in this table is derived from law enforcement employee counts (as of October 31, 2024) submitted by participating agencies.	This table provides the number of law enforcement officers and civilians employed by agencies in metropolitan and nonmetropolitan counties listed alphabetically by state.	The UCR Program defines law enforcement officers as individuals who ordinarily carry a firearm and a badge, have full arrest powers, and are paid from governmental funds set aside specifically to pay sworn law enforcement. Civilian employees include full-time agency personnel such as clerks, radio dispatchers, meter attendants, stenographers, jailers, correctional officers, and mechanics.

81	The information in this table is derived from law enforcement employee counts (as of October 31, 2024) submitted by participating agencies.	This table provides the number of law enforcement officers and civilians employed by state, tribal, and other agencies, listed alphabetically by state.	The UCR Program defines law enforcement officers as individuals who ordinarily carry a firearm and a badge, have full arrest powers, and are paid from governmental funds set aside specifically to pay sworn law enforcement. Civilian employees include full-time agency personnel such as clerks, radio dispatchers, meter attendants, stenographers, jailers, correctional officers, and mechanics.

User's note

Because of law enforcement's varied service requirements and functions, as well as the distinct demographic traits and characteristics of each jurisdiction, readers should use caution when drawing comparisons between agencies' staffing levels based on police employment data from the UCR Program. In addition, the data presented here reflect existing staffing levels and should not be interpreted as preferred officer strengths recommended by the FBI. Lastly, it should be noted that the totals given for sworn officers for any particular agency reflect not only the patrol officers on the street, but also the officers assigned to various other duties such as those in administrative and investigative positions and those assigned to special teams.

[1] Full-time law enforcement employees include civilians.

[2] The designation county is a combination of both metropolitan and nonmetropolitan counties.

[3] Suburban areas include law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area. Suburban areas exclude all metropolitan agencies associated with a principal city. The agencies associated with suburban areas also appear in other groups within this table.

[1] The designation county is a combination of both metropolitan and nonmetropolitan counties.

[2] Suburban areas include law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area. Suburban areas exclude all metropolitan agencies associated with a principal city. The agencies associated with suburban areas also appear in other groups within this table.

Table 72

Full-time Law Enforcement Employees[1]

Range in Rate per 1,000 Inhabitants
by Population Group, 2024

Rate range		**Total cities[2] (9,799 cities; population 211,970,139)**	Group I (91 cities, 250,000 and over; population 63,709,415)	Group II (230 cities, 100,000 to 249,999; population 33,330,910)	Group III (468 cities, 50,000 to 99,999; population 32,553,462)	Group IV (888 cities, 25,000 to 49,999; population 30,699,399)	Group V (1,823 cities, 10,000 to 24,999; population 29,028,903)	Group VI (6,299 cities, under 10,000; population 22,648,050)

[1] Full-time law enforcement employees include civilians.

[2] The number of agencies used to compile these figures differs from other tables that include data about law enforcement employees because agencies with no resident population are excluded from this table. Agencies not included in this table are associated with universities and colleges (see Table 79) and other agencies (see Table 81), as well as some state agencies that have concurrent jurisdiction with other local law enforcement.

[3] Because of rounding, the percentages may not add to 100.0.

[1] Police employee data were not received from the State Police/Highway Patrol for the state.

[2] Data reported are the number of law enforcement employees for the state of New Jersey.

NOTE: Caution should be used when comparing data from one state to that of another. The responsibilities of the various state police, highway patrol, and department of public safety agencies range from full law enforcement duties to only traffic patrol, which can impact both the level of employment for agencies as well as the ratio of sworn officers to civilians employed. Any valid comparison must take these factors and the other identified variables affecting crime into consideration.

Cargo Theft, 2024

Cargo Theft, 2024, is the eleventh cargo theft report released by the FBI's Uniform Crime Reporting (UCR) Program. Forty-eight (48) states participated in the data collection in 2024 as well as the Bureau of Indian Affairs and the District of Columbia. In 2024, 46 states submitted at least one cargo theft incident.

The FBI's UCR Program collects cargo theft data to inform the law enforcement community, federal and state legislators, academia, and the public at large about this particular crime. The data can be used to create awareness and to measure the impact cargo theft has on the economy and potential threats to national security. Often, cargo theft offenses are part of larger criminal schemes and have been found to be components of organized crime rings, drug trafficking, and funding for terrorism. The UCR collection of cargo theft data is relatively new with only 11 years of data published, but the number of agencies reporting cargo theft incidents has increased each year

On January 1, 2021, the FBI's UCR Program transitioned to a National Incident-Based Reporting System (NIBRS) only data collection. Since the transition, the FBI's UCR Program has worked diligently to offer resources such as programming and technical support, training, and outreach to law enforcement agencies. Despite more than 11,500 law enforcement agencies submitting NIBRS data, participation for 2021 remained below a statistically acceptable level to be nationally representative. For data years 2022–2024, to provide nationally representative data, the FBI accepted Summary Reporting System (SRS) data submissions from non-transitioned agencies.

Participation

Participation in the UCR Program is voluntary, and agencies or states may choose not to participate. Since the first publication of cargo theft data in 2013, the number of states and federal agencies participating has steadily increased each year.

Although participation in the cargo theft data collection has steadily increased each year since its inception, several factors have a direct impact on this important data collection:

- States may not have the resources required to make the necessary technical changes or to align their local and state statutes with federal requirements.
- States may not have the necessary resources to conduct data quality checks on reported incidents associated with cargo theft, which could result in inaccurate data.
- States may not have adequate resources to train participants on how to recognize and properly record cargo theft incidents.
- States may not perceive cargo theft as a priority or a significant problem within their states and make decisions based on their immediate needs regarding resource allocation.

USA Patriot Improvement and Reauthorization Act of 2005

Due to the significant economic impact cargo theft has on the United States economy, and the potential for use by terrorist organizations, Congress mandated H.R. 3199, the USA Patriot Improvement and Reauthorization Act of 2005, on March 9, 2006. It required the Attorney General to "take the steps necessary to ensure that reports of cargo theft collected by federal, state, and local officials are reflected as a separate category in the Uniform Crime Reporting System, or any successor system, by no later than December 31, 2006." In response to this mandate, the Criminal Justice Information Services Advisory Policy Board approved a definition for collecting cargo theft in December 2006. In 2010, data specifications required to capture cargo theft data in the UCR Program's SRS as well as NIBRS were finalized, and the FBI's UCR Program released the first cargo theft report in 2013.

What is cargo theft?

Cargo theft is defined as "The criminal taking of any cargo including, but not limited to, goods, chattels, money, or baggage that constitutes, in whole or in part, a commercial shipment of freight moving in commerce, from any pipeline system, railroad car, motor truck, or other vehicle, or from any tank or storage facility, station house, platform, or depot, or from any vessel or wharf, or from any aircraft, air terminal, airport, aircraft terminal or air navigation facility, or from any intermodal container, intermodal chassis, trailer, container freight station, warehouse, freight distribution facility, or freight consolidation facility. For purposes of this definition, cargo shall be deemed as moving in commerce at all points between the point of origin and the final destination, regardless of any temporary stop while awaiting transshipment or otherwise."

This definition does not serve as a legal description for prosecutorial purposes. Instead, it was developed to capture the essence of the national cargo theft problem in the United States. The legal elements of knowledge and intent were intentionally omitted.

Quality data concerning cargo theft can help us better understand this crime and the threats associated with it. As more agencies choose to report their incidents, the FBI's UCR Program will be able to provide more information about cargo theft on a national scale. For additional information on the FBI UCR Program's collection of cargo theft incidents, visit https://www.fbi.gov/about-us/cjis/ucr/ucr-program-data-collections.

Under the umbrella of the FBI's UCR Program, cargo theft data has traditionally been released on FBI.gov on the UCR Publications webpage. However, beginning in 2021, all UCR data is being released exclusively on the FBI's Crime Data Explorer (CDE) website where data users can access and sort a variety of data. The content of the CDE comes from data collections such as Law Enforcement Officers Killed and Assaulted, Hate Crime Statistics, NIBRS, and National Use-of-Force. UCR data from previous years will also be accessible on the CDE. Cargo Theft reports from previous years can be accessed at https://ucr.fbi.gov/crime-in-the-u.s in *Crime in the United States* publications.

The following Cargo Theft tables are available as part of this compressed file download:

Table 1
Cargo Theft by State
by Incidents, and Stolen, Recovered Values, 2024

Table 2
Cargo Theft Property Stolen and Recovered
by Type and Value, 2024

Table 3
Cargo Theft by Location, 2024

Table 4
Cargo Theft by Victim Type, 2024

Table 5
Cargo Theft by Offense, 2024

Data Declarations and Methodology

Table 1
Cargo Theft by State
by Incidents, and Stolen, Recovered Values, 2024

The FBI collects these data through the Uniform Crime Reporting Program's Summary Reporting System and National Incident-Based Reporting System.

General comment

This table presents by state the total number of agencies that submitted data about cargo theft incidents, the number of incidents reported, the reported value of stolen property, and the value of recovered property. The table also lists the percentage of recovered value for each submitting state.

Due to technical system changes and data quality issues, some cargo theft data may be inflated.

Methodology

The data used in creating this table were from all law enforcement agencies submitting one or more cargo theft incidents for at least 1 month of the calendar year. The published data, therefore, do not necessarily represent reports from each participating agency for all 12 months of the calendar year.

Table 2
Cargo Theft Property Stolen and Recovered
by Type and Value, 2024

The FBI collects these data through the Uniform Crime Reporting (UCR) Program's Summary Reporting System and National Incident-Based Reporting System.

General comment

The value of stolen and recovered property and the percentage of recovered value of each property type are reflected within this table.

Due to technical system changes and data quality issues, some cargo theft data may be inflated.

Note: Based on UCR guidelines, the property descriptions of credit/debit cards, nonnegotiable instruments, documents/personal or business, and identity-intangible, must be submitted with zero value for stolen and/or recovered.

Methodology

The data used in creating this table were from all law enforcement agencies submitting one or more cargo theft incidents for at least 1 month of the calendar year. The published data, therefore, do not necessarily represent reports from each participating agency for all 12 months of the calendar year.

Table 3
Cargo Theft by Location, 2024

The FBI collects these data through the Uniform Crime Reporting (UCR) Program's Summary Reporting System and National Incident-Based Reporting System (NIBRS).

General comment

Cargo theft is the criminal taking of any cargo including, but not limited to, goods, chattels, money, or baggage that constitutes, in whole or in part, a commercial shipment of freight moving in commerce, from any pipeline system, railroad car, motor truck, or other vehicle, or from any tank or storage facility, station house, platform, or depot, or from any vessel or wharf, or from any aircraft, air terminal, airport, aircraft terminal or air navigation facility, or from any intermodal container, intermodal chassis, trailer, container freight station, warehouse, freight distribution facility, or freight consolidation facility. For purposes of this definition, cargo shall be deemed as moving in commerce at all points between the point of origin and the final destination, regardless of any temporary stop while awaiting transshipment or otherwise.

This table presents the number of location types reported in cargo theft incidents.

Due to technical system changes and data quality issues, some cargo theft data may be inflated.

Note: In NIBRS, a location may be entered for each offense; therefore, an incident may have more than one location code reported.

Methodology

The data used in creating this table were from all law enforcement agencies submitting one or more cargo theft incidents for at least 1 month of the calendar year. The published data, therefore, do not necessarily represent reports from each participating agency for all 12 months of the calendar year.

To arrive at the totals provided, the UCR Program counted one for each offense location reported in an incident.

Table 4
Cargo Theft by Victim Type, 2024

The FBI collects these data through the Uniform Crime Reporting (UCR) Program's Summary Reporting System and National Incident-Based Reporting System.

General comment

This table presents the number of victim types in each of the cargo theft incidents reported to the FBI. The victim of a cargo theft may be an individual, a business, an institution, or society as a whole.

Due to technical system changes and data quality issues, some cargo theft data may be inflated.

Methodology

The data used in creating this table were from all law enforcement agencies submitting one or more cargo theft incidents for at least 1 month of the calendar year. The published data, therefore, do not necessarily represent reports from each participating agency for all 12 months of the calendar year.

To arrive at the totals provided, the UCR Program counted one for each victim type reported in an incident.

Table 5
Cargo Theft by Offense, 2024

The FBI collects these data through the Uniform Crime Reporting (UCR) Program's Summary Reporting System and National Incident-Based Reporting System.

General comment

Cargo theft is the criminal taking of any cargo including, but not limited to, goods, chattels, money, or baggage that constitutes, in whole or in part, a commercial shipment of freight moving in commerce, from any pipeline system, railroad car, motor truck, or other vehicle, or from any tank or storage facility, station house, platform, or depot, or from any vessel or wharf, or from any aircraft, air terminal, airport, aircraft terminal or air navigation facility, or from any intermodal container, intermodal chassis, trailer, container freight station, warehouse, freight distribution facility, or freight consolidation facility. For purposes of this definition, cargo shall be deemed as moving in commerce at all points between the point of origin and the final destination, regardless of any temporary stop while awaiting transshipment or otherwise.

Because cargo theft is defined as "the criminal **taking of** any cargo . . .," specific crimes against property apply to cargo theft. The applicable crimes against property include:

120 = Robbery
23D = Theft from building
23F = Theft from motor vehicle
23H = All other larceny
26A = False pretenses, swindle, confidence game
26B = Credit card, automatic teller machine fraud
26C = Impersonation
26E = Wire fraud
26F = Identity theft
26G = Hacking, computer invasion
210 = Extortion, blackmail
220 = Burglary, breaking & entering
240 = Motor vehicle theft
270 = Embezzlement
510 = Bribery

In addition, cargo theft is not considered an offense by itself; all offenses that happen within a cargo theft incident are to be reported. Cargo theft data are derived by capturing the additional element of "theft of cargo" in incidents that contain any of the applicable offenses.

This table shows the number of offenses specific to cargo theft and the number of additional offenses reported within a verified cargo theft incident.

Due to technical system changes and data quality issues, some cargo theft data may be inflated.

Methodology

The data used in creating this table were from all law enforcement agencies submitting one or more cargo theft incidents for at least 1 month of the calendar year. The published data, therefore, do not necessarily represent reports from each participating agency for all 12 months of the calendar year.

To arrive at the totals provided, the UCR Program counted one offense for each offense type reported in an incident.

Table 1

Cargo Theft by State

by Incidents, and Stolen, Recovered Values, 2024[1]

State	Number of agencies reporting an incident	Number of incidents reported	Value of property		Percent recovered
			Stolen	Recovered	
Total	**2,300**	**16,183**	**$483,384,469**	**$46,768,483**	**9.7**

[1] Due to technical system changes and data quality issues, some cargo theft data may be inflated.

[2] According to Uniform Crime Reporting guidelines, the value of property stolen and/or recovered must be zero for this property description.

* Less than one-tenth of 1 percent.

Table 3

Cargo Theft by Location, 2024[1]

Location type	Total locations
Abandoned, condemned structure	10
Air, bus, train terminal	154
Amusement park	7
Arena, stadium, fairgrounds, coliseum	17
ATM separate from bank	10
Auto dealership new, used	120
Bank, savings and loan	124
Bar, night club	94
Camp, campground	18
Church, synagogue, temple mosque	62
Commercial, office building	1,046
Community center	23
Construction site	308
Convenience store	456
Cyberspace	144
Daycare facility	13
Department, discount store	418
Dock, wharf, freight, modal terminal	312
Drug store, doctor's office, hospital	113
Farm facility	45
Field, woods	144
Gambling facility, casino, race track	91
Government, public building	132
Grocery, supermarket	270
Highway, road, alley, street, sidewalk	2,493
Hotel, motel, etc.	277
Industrial site	292
Jail, prison, penitentiary, corrections facilit	10
Lake, waterway, beach	17
Liquor store	71
Military installation	5
Parking, drop lot, garage	3,386
Park, playground	189
Rental storage facility	290
Residence, home	5,179
Rest area	39

Location type	Total locations
Restaurant	328
School, college	9
School, college, university	149
School, elementary, secondary	106
Service, gas station	408
Shelter, mission, homeless	8
Shopping mall	102
Specialty store (TV, fur, etc.)	363
Tribal lands	2
Other, unknown	1,453

[1] Due to technical system changes and data quality issues, some cargo theft data may be inflated.

Table 4

Cargo Theft by Victim Type, 2024[1]

Victim type	Total victims
Business	5,685
Financial Institution	20
Government	174
Individual	10,878
Law Enforcement Officer	10
Other	61
Religious Organization	25
Society, public	166
Unknown	16

[1] Due to technical system changes and data quality issues, some cargo theft data may be inflated.

Table 5

Cargo Theft by Offense, 2024[1]

Offense	Number reported
Grand total of offenses	**19,304**
Cargo theft applicable offenses	
All other larceny	5,416
Burglary	2,334
Credit card, automated teller machine fraud	385
Embezzlement	134
Extortion, blackmail	20
False pretenses, swindle, confidence game	669
Hacking, computer invasion	11
Identity theft	233
Impersonation	106
Motor vehicle theft	2,484
Robbery	446
Theft from building	766
Theft from motor vehicle	4,407
Wire fraud	75
Total cargo theft applicable offenses	17,486
Other offenses occurring with cargo offenses	
Aggravated assault	41
Animal cruelty	1
Arson	1
Betting, wagering	1
Counterfeiting, forgery	64
Criminal Sexual Contact	1
Destruction of property	1,176
Drug equipment violations	57
Drug, narcotic violations	97
Gambling equipment violations	1
Intimidation	28
Kidnapping, abduction	18
Pocket picking	6
Pornography, obscene material	1
Purse snatching	7
Rape	4
Shoplifting	26

Offense	Number reported
Simple assault	105
Sodomy	1
Stolen property offense	83
Theft from coin operated machine or device	1
Theft of motor vehicle parts or accessories	53
Weapon law violations	45
Total other offenses occurring with cargo offense	1,818

[1] Due to technical system changes and data quality issues, some cargo theft data may be inflated.

Expanded Homicide Data Table 1

Murder Victims

by Race, Ethnicity, and Sex, 2024

Race	Total	Sex		
		Male	Female	Unknown

2024	**432**	382	260	10	2	110	30	7	13

[1] The killing of a felon, during the commission of a felony, by a private citizen.

NOTE: Prior years' crime data has been updated; therefore, data presented in this table may not match previously published data.

Aggravated Assault Table

Aggravated Assault, Types of Weapons Used

Percent Distribution by Region, 2024

Region	Total all weapons[1]	Firearms	Knives or cutting instruments	Other weapons (clubs, blunt objects, etc.)	Personal weapons (hands, fists, feet, etc.)
Total	**100.0**	**32.8**	**16.6**	**29.9**	**20.7**
Northeast	100.0	14.9	25.3	34.4	25.3
Midwest	100.0	35.9	14.6	29.0	20.5
South	100.0	43.2	15.0	27.2	14.6
West	100.0	24.5	16.0	32.3	27.2

[1] Because of rounding, the percentages may not add to 100.0.

Arson Table 1

Arson Rate

by Population Group, 2024

[14,379 agencies; 2024 estimated population 308,166,698; rate per 100,000 inhabitants]

Population group	Rate
TOTAL ALL AGENCIES	**10.0**
TOTAL CITIES	**12.7**
Group I (250,000 and over)	16.7
1,000,000 and over (Group I subset)	13.6
500,000 to 999,999 (Group I subset)	20.4
250,000 to 499,999 (Group I subset)	17.5
Group II (100,000 to 249,999)	14.3
Group III (50,000 to 99,999)	11.1
Group IV (25,000 to 49,999)	8.5
Group V (10,000 to 24,999)	8.4
Group VI (under 10,000)	13.5
Metropolitan counties	7.2
Nonmetropolitan counties	9.2
Suburban areas[1]	7.6

[1] Suburban areas include law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area. Suburban areas exclude all metropolitan agencies associated with a principal city. The agencies associated with suburban areas also appear in other groups within this table.

Arson Table 2

Arson

by Type of Property, 2024

[16,098 agencies; 2024 estimated population 319,655,544]

Property classification	Number of arson offenses	Percent distribution[1]	Percent not in use	Average damage[2]	Total clearances	Percent of arsons cleared[3]	Percent of clearances under 18
Total	**33,289**	**100.0**		**$46,921**	**9,200**	**27.6**	**10.1**
Total structure:	11,531	34.6	1.8	$119,103	3,365	29.2	10.1
Single occupancy residential	4,083	12.3	1.5	$58,573	1,251	30.6	9.0

Human Trafficking, 2024

Human Trafficking, *2024,* is the eleventh report from the FBI Uniform Crime Reporting (UCR) Program's Human Trafficking data collection. Fifty (50) states, the District of Columbia, and the U.S. territories of Guam and Puerto Rico participated. The 2024 report shows a total of 3,702 incidents of human trafficking were reported: 2,914 were in the category of commercial sex acts, and 783 were instances of involuntary servitude. (Puerto Rico submitted five incidents in the Total column and did not specify whether those incidents were under the category of commercial sex acts or involuntary servitude.) Agencies arrested 798 offenders in correlation with these incidents. Of these, 790 were adults and 8 were juveniles.

Participation

Since its inception in 2013, the FBI's Human Trafficking data collection has seen a steady increase in state participation as well as an increase in the number of incidents reported. The program will continue efforts to expand, gather, and make available information regarding human trafficking incidents.

Trafficking Victims Protection Act

In January 2013, as authorized by the William Wilberforce Trafficking Victims Protection Reauthorization Act of 2008, the FBI's UCR Program began collecting offense and arrest data regarding human trafficking. The act requires the FBI to collect human trafficking offense data and to make distinctions between prostitution, assisting or promoting prostitution, and purchasing prostitution.

To comply with the Wilberforce Act, the FBI's UCR Program created two additional offenses in the Summary Reporting System (SRS) and the National Incident-Based Reporting System (NIBRS) through which the FBI's UCR Program collects both offense and arrest data. The definitions for these offenses are:

Human Trafficking/Commercial Sex Acts: inducing a person by force, fraud, or coercion to participate in commercial sex acts, or in which the person induced to perform such act(s) has not attained 18 years of age.

Human Trafficking/Involuntary Servitude: obtaining of a person(s) through recruitment, harboring, transportation, or provision, and subjecting such persons by force, fraud, or coercion into involuntary servitude, peonage, debt bondage, or slavery (not to include commercial sex acts).

The data tables included in this report reflect the offenses and arrests recorded by state and local law enforcement agencies that currently have the ability to report the data to the FBI's UCR Program. As such, they should not be interpreted as a definitive statement of the level or characteristics of human trafficking in the nation as a whole. The data declaration pages, which will help the user better understand the data, and the methodology used for the four following tables are located in the *Data Declarations and Methodology* section of this report. In addition, a *Questions and Answers* section about human trafficking data is provided as a supplement to this report.

Under the umbrella of the FBI's UCR Program, human trafficking data has traditionally been released on FBI.gov on the UCR Publications webpage. However, beginning in 2021, all UCR data is being released exclusively on the FBI's Crime Data Explorer (CDE) website, where data users can access and sort a variety of data. The content of the CDE comes from data collections such as Law Enforcement Officers Killed and Assaulted, Hate Crime Statistics, NIBRS, and National Use-of-Force. UCR data from previous years will also be accessible on the CDE. Human Trafficking reports from previous years can also be accessed at https://ucr.fbi.gov/crime-in-the-u.s in *Crime in the United States* publications.

Note: Regarding the data reported to the FBI's UCR Program, it is important to note that these data represent only one view of a complex issue—the law enforcement perspective. However, due to the nature of human trafficking, many of these crimes are never reported to the local, state, tribal, and federal law enforcement agencies that investigate them. In addition to the law enforcement facet in fighting these crimes, there are victim service organizations whose mission it is to serve the needs of the victims of human trafficking. In order to have the complete picture of human trafficking, it would be necessary to gather information from all these sources.

The following Human Trafficking tables are available as part of this compressed file download:

Table 1
Human Trafficking
Offenses and Clearances by State, 2024

Table 2
Human Trafficking Arrests
by Age by State, 2024

by Race by State, 2024

Table 4
Human Trafficking Arrests
by Ethnicity by State, 2024

Data Declarations and Methodology

Human Trafficking Table 1

Offenses and Clearances by State, 2024

The FBI collects these data through the Uniform Crime Reporting (UCR) Program's Summary Reporting System and National Incident-Based Reporting System.

General Comment

This table includes the states that have added human trafficking offenses to their data collection. Even though a state program included human trafficking, the individual agencies in that state may or may not have added it to their collections. Each law enforcement agency is responsible for reporting its crime data directly to the FBI.

This table provides the volume of human trafficking offenses as reported by state. For UCR purposes, juveniles are individuals under the age of 18 years. Adults are 18 years of age or older.

Methodology

The data used in creating this table were from law enforcement agencies submitting one or more human trafficking incidents for at least 1 month of the calendar year. Also included are zero incident data for states that have incorporated human trafficking offenses in their data collection where no 2024 human trafficking incidents were reported to the FBI's UCR Program.

The published data, therefore, do not necessarily represent reports from each participating agency for all 12 months of the calendar year. When the FBI determines an agency's data collection methodology does not comply with national UCR guidelines, the figure(s) for that agency's offense(s) will not be included in the table, and the discrepancy will be explained in a footnote.

Human Trafficking Table 2

by Age by State, 2024

The FBI collects these data through the Uniform Crime Reporting (UCR) Program's Summary Reporting System and National Incident-Based Reporting System.

General Comment

This table provides the number of juvenile and adult male and female persons arrested for human trafficking offenses by state in 2024. These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistic in this table could, in some cases, represent multiple arrests of the same person. For UCR purposes, juveniles are individuals under the age of 18 years. Adults are 18 years of age and older.

Methodology

The data used in creating this table were from law enforcement agencies submitting one or more human trafficking arrests for at least 1 month of the calendar year. The published data, therefore, do not necessarily represent reports from each participating agency for all 12 months of the calendar year.

Human Trafficking Table 3

by Race by State, 2024

The FBI collects these data through the Uniform Crime Reporting (UCR) Program's Summary Reporting System and National Incident-Based Reporting System.

General Comment

This table provides the number of persons arrested for human trafficking offenses by state in 2024 broken down by race of the arrestee. These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistics in this table could, in some cases, represent multiple arrests of the same person. For UCR purposes, juveniles are under the age of 18 years. Adults are 18 years of age and older.

Methodology

The data used in creating this table were from law enforcement agencies submitting one or more human trafficking arrests for at least 1 month of the calendar year. The published data, therefore, do not necessarily represent reports from each participating agency for all 12 months of the calendar year.

Human Trafficking Table 4

by Ethnicity by State, 2024

The FBI collects these data through the Uniform Crime Reporting (UCR) Program's Summary Reporting System and National Incident-Based Reporting System.

General Comment

This table provides the number of persons arrested for human trafficking offenses by state in 2024 broken down by ethnicity of the arrestee. These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistics in this table could, in some cases, represent multiple arrests of the same person. For UCR purposes, juveniles are individuals under the age of 18 years. Adults are 18 years of age and older.

Methodology

The data used in creating this table were from law enforcement agencies submitting one or more human trafficking arrests for at least 1 month of the calendar year. The published data, therefore, do not necessarily represent reports from each participating agency for all 12 months of the calendar year.

Human Trafficking, 2024
Questions and Answers

Q: How long has human trafficking data been collected?
A: The Uniform Crime Reporting (UCR) Program began collecting human trafficking data in January 2013.

Q: What does it mean for an offense to be cleared?
A: An offense can be cleared by arrest or exceptional means.

An offense is cleared by arrest, or solved for crime reporting purposes, when at least one person is (1) arrested, (2) charged with the commission of the offense, and (3) turned over to the court for prosecution.

If an agency can answer all the following questions in the affirmative, it can clear the offense exceptionally.

1. Has the investigation definitely established the identity of the offender?
2. Is there enough information to support an arrest, charge, and turning over to the court for prosecution?
3. Is the exact location of the offender known so that the subject could be taken into custody now?
4. Is there some reason outside law enforcement control that precludes arresting, charging, and prosecuting the offender?

Generally, an offense can be exceptionally cleared when it falls into one of the following categories. (This list is not all-inclusive.)

1. Death of the offender.
2. Offender is prosecuted by state or local authorities in another city for a different offense or is prosecuted in another city or state by the federal government for an offense which may be the same.
3. Extradition denied/in the custody of other jurisdiction.
4. The handling of a juvenile offender—either orally or by written notice to parents—in instances involving minor offenses, such as petty larceny.
5. Prosecution denied (for other than the lack of probable cause).

Although agencies may administratively close a case, this does not necessarily mean that the agency can clear the offense for UCR purposes.

Q: Were agencies that submitted less than 12 months of data included in the human trafficking report?
A: Yes, all submissions were included.

Q: What is the cutoff age for juveniles and adults?
A: For UCR purposes, juveniles are individuals under the age of 18 years. Adults are 18 years of age and older.

Q: What is the difference between the Summary Reporting System (SRS) and the National Incident-Based Reporting System (NIBRS) collections?
A: The FBI's UCR Program administers two data collections—the SRS and NIBRS. The general concepts for collecting, scoring, and reporting UCR data are applicable to both the SRS and NIBRS. Both

systems collect information on crimes reported to law enforcement or crimes law enforcement have witnessed and include reports in which no one was arrested.

The SRS provides monthly reports on ten Part I offenses known to law enforcement and reports on persons arrested. The Part I offenses of murder, rape, robbery, aggravated assault, human trafficking–commercial sex acts, human trafficking–involuntary servitude, burglary, motor vehicle theft, larceny-theft, and arson are considered indicators of the level of crime occurring within the United States. Data are collected at the aggregate level and lack incident-level details for crimes other than homicide. Within the SRS, the Hierarchy Rule governs multiple offense reporting. When more than one crime was committed by the same person or group of persons and the time and space intervals separating the crimes were insignificant, then the crime highest in the hierarchy is the only offense reported.

NIBRS is a more detail-oriented crime data collection system that captures specific elements about crimes and offenders through incident-based reporting. These details include information such as the date, time, location, and circumstance of the criminal incident; the characteristics of the victim and offender (such as the age, sex, race, and ethnicity); victim/offender relationship; the involvement of weapons or drugs; property loss; whether the crime was motivated by bias; or if a computer was used to perpetuate certain types of crimes.

Q: What are the benefits of NIBRS?
A: NIBRS provides a more comprehensive view of crime in the United States and offers greater flexibility in data compilation and analysis. When used to its full potential, NIBRS provides greater detail about when and where a crime occurred, what form it took, and the characteristics of its victims and offenders. Because it provides a broader depiction of the data, NIBRS provides law enforcement agencies with more exact information with which to address the concerns of its constituency regarding crime in their communities and to allocate resources. Likewise, legislators, municipal planners/administrators, academicians, sociologists, advocacy groups, and the public are provided with access to more extensive crime information than the SRS can offer. The data allow a better opportunity to study crime and criminal behavior.

The FBI intends for NIBRS to become the law enforcement community's standard for quantifying crime. Efforts are underway to assist states not yet certified as NIBRS contributors and expand NIBRS's ability to provide national crime data management standards and services to inform, educate, and strengthen communities through the UCR Program.

On January 1, 2021, the FBI's UCR Program transitioned to a NIBRS-only data collection. Since the transition, the FBI's UCR Program has worked diligently to offer resources such as programming and technical support, training, and outreach to law enforcement agencies. Despite more than 11,500 law enforcement agencies submitting NIBRS data, participation for 2021 remained below a statistically acceptable level to be nationally representative. For data years 2022–2024, to provide nationally representative data, the FBI accepted SRS data submissions from non-transitioned agencies.
